CAT.E103B ®

SMC eliminates a variety of static electricity generated problems.

The adsorption of multiple sheets

The clogging of parts feeders

Discomfort due to electric shocks in the workplace

The electrostatic breakdown of substrates and IC chips

Failure to eject workpieces from unloaders

Uneven painting

Ionizers

Bar Type IZS40/41/42 Series

Separate Controller, Bar Type IZT40/41(-L)/42(-L) Series

Separate Controller, Nozzle Type IZT43(-L) Series

Desktop Duster Box ZVB Series

Nozzle Type IZN10E Series

Fan Type IZF Series

Ionizer Gun (Handheld Type) IZG10 Series

Handheld Electrostatic Meter

Handheld Electrostatic Meter IZH10

For more information

Static Neutralization Area

* The distance from the target workpiece varies depending on the size, etc., and should be used as a guideline.

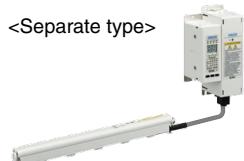

Wide

- Bar type

IZS40/41/42 Series p. 16

<Separate type>

The length of the bar can be selected, allowing for a wide range of neutralization.

Workpiece Size (Guide)

* The distance from the target workpiece varies depending on the size, etc., and should be used as a guideline.

Large

Small

- Bar type

IZS40/41/42 Series p. 16

IZT40/41(-L)/42(-L) Series p. 48

- Fan type

IZF Series p. 146

- Nozzle type

IZN10E Series p. 118

IZG10 Series p. 178

- Ionizer gun (Handheld type)

IZG10 Series p. 178

Various nozzles can be attached to the tip of the main body, allowing for the local static neutralization of narrow sections.

<Separate type>

Separate bars and controllers can be used for the static neutralization of narrow sections close to the workpiece.

Static Neutralization Method

Potential amplitude reduction specification (Dual AC type)

Potential amplitude:

25 V or less

IZS42 Series p. 16

IZT42(-L) Series p. 48

High-speed static neutralization specification

Rapid static neutralization:

0.1 s

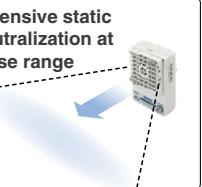

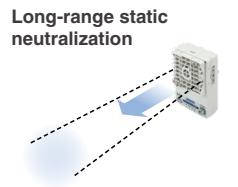

IZS41 Series p. 16

IZT41(-L) Series p. 48

* This is to be used as a guide only. Please note that the effects vary depending on the operating conditions.

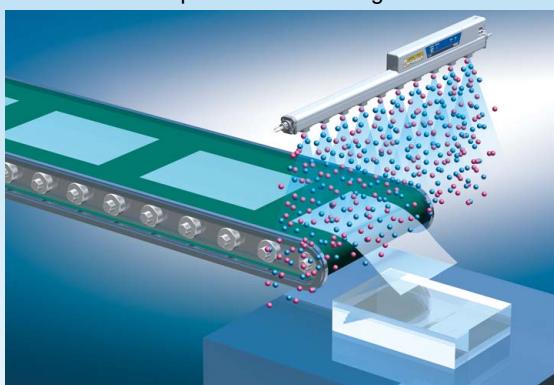

For the static neutralization of films

- Prevents the adhesion of dust
- Prevents winding failure due to wrinkles, etc.

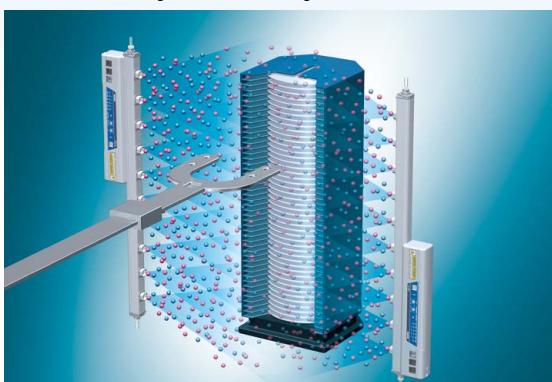

For the static neutralization of film-molded goods

- Prevents goods from adhering to the conveyor
- Prevents the dispersion of finished goods

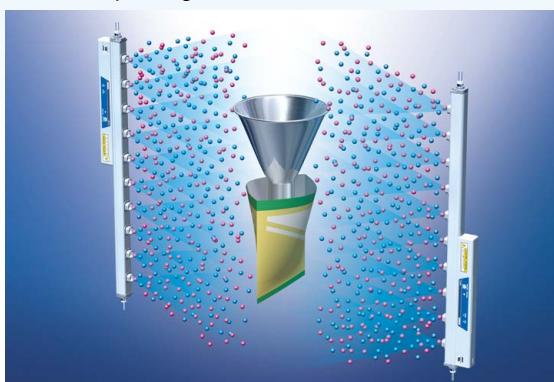

For the static neutralization during wafer transfer

- Prevents breakage due to discharge between wafers and hands

For the static neutralization of packing films

- Prevents the filled substances from adhering to packing films
- Reduces packing mistakes

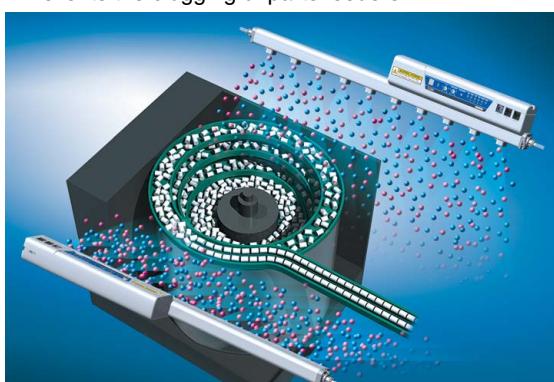

For the static neutralization of lenses

- Removes dust from lenses
- Prevents the adhesion of dust

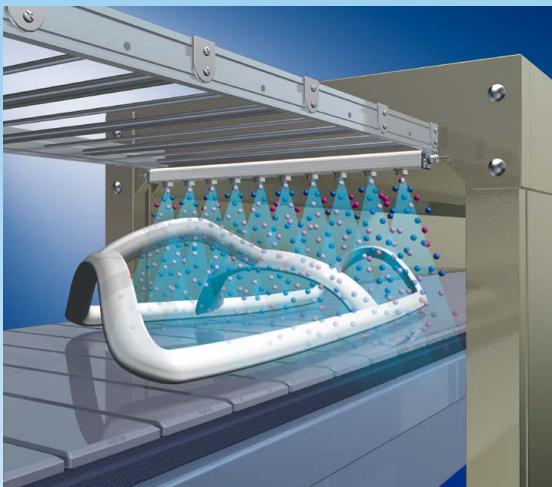

For the static neutralization of parts feeders

- Prevents the clogging of parts feeders

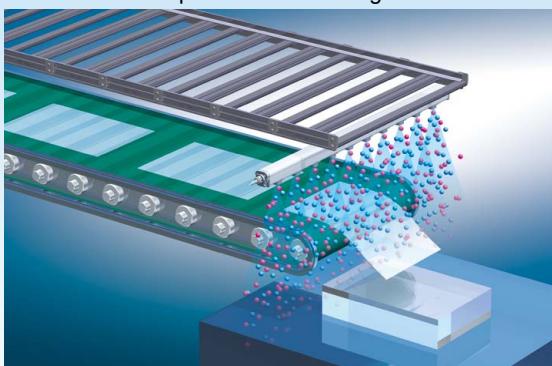

For the static neutralization of resin frames

For the static neutralization of film-molded goods

- Prevents goods from adhering to the conveyor
- Prevents the dispersion of finished goods

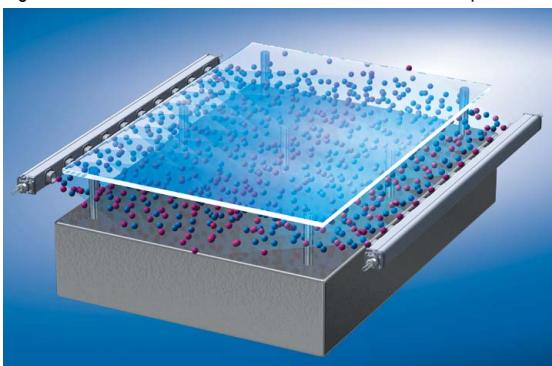

For the static neutralization of packing films

- Prevents the filled substances from adhering to packing films
- Reduces packing mistakes

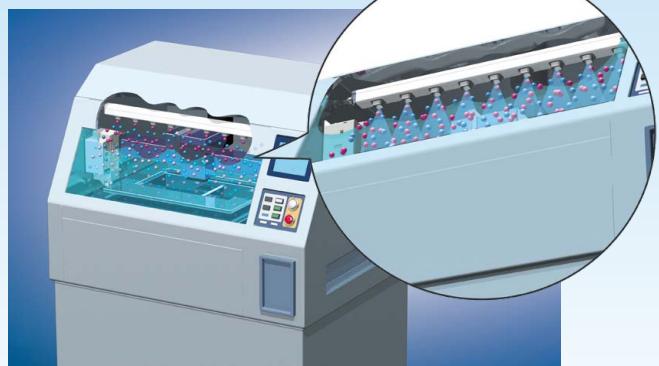

For the static neutralization of glass substrates

- Prevents the breakage of glass substrates by the static electricity generated when the substrate is lifted from the surface plate

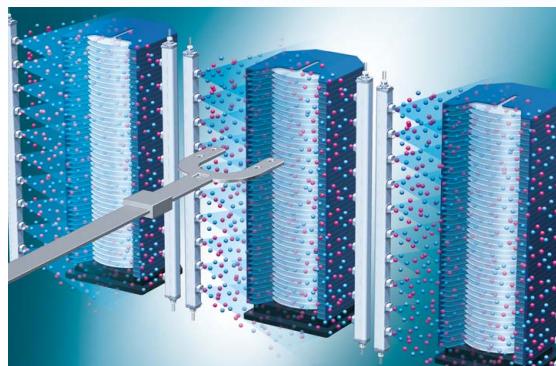

For the static neutralization of substrate cutting machines

For the static neutralization during wafer transfer

- Prevents breakage due to discharge between wafers and hands

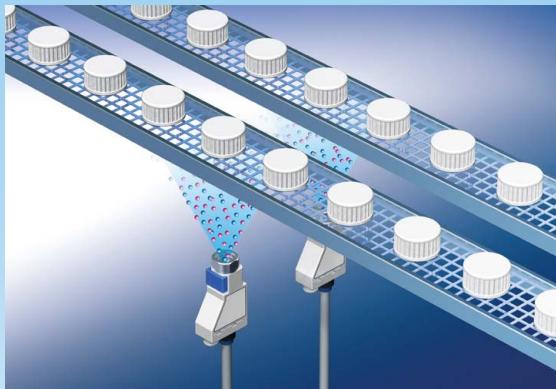

For the static neutralization of lenses

- Removes dust from lenses
- Prevents the adhesion of dust

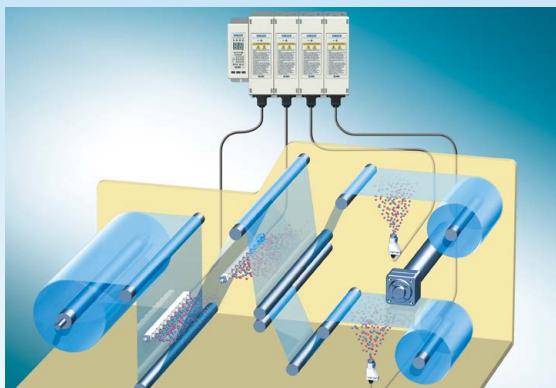

For the static neutralization of caps

- Removes dust from caps and prevents the adhesion of dust

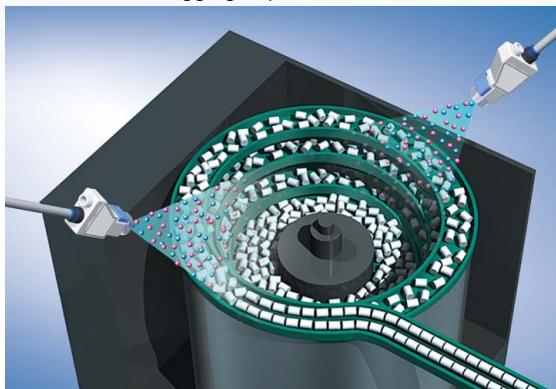

For the static neutralization of films

- Prevents the adhesion of dust
- Prevents winding failure due to wrinkles, etc.

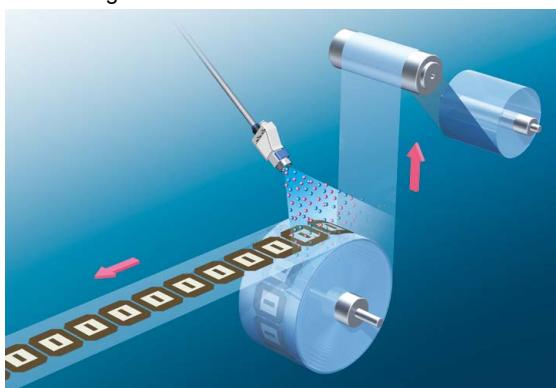

For the static neutralization of parts feeders

- Prevents the clogging of parts feeders

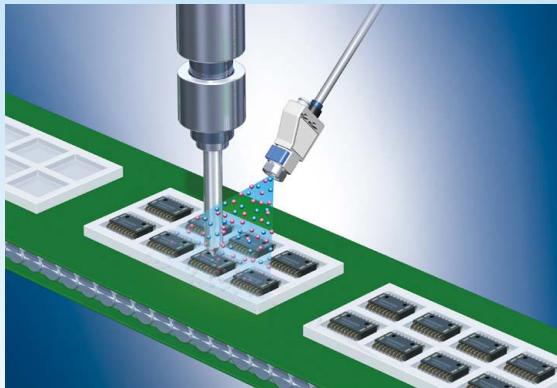

For the removal of dust when detaching from film

- Removes dust generated by static electricity when detaching from film

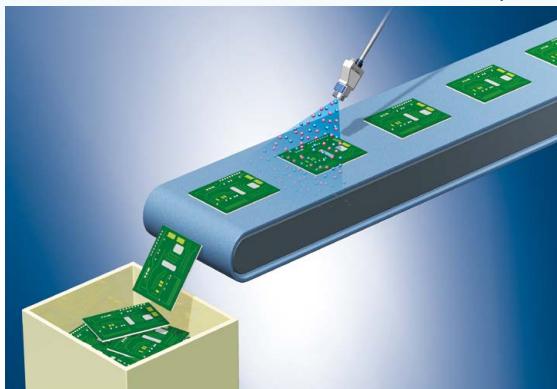

For the spot type static neutralization

- Prevents the electrostatic breakdown of electric parts
- Prevents detachment failure

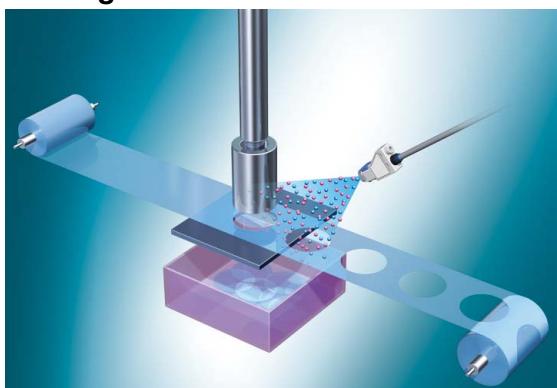

For the static neutralization of electric substrates

- Prevents the electrostatic breakdown of electric parts

For the prevention of punching press sticking

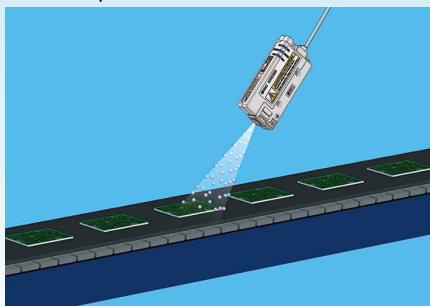

For the dust removal and static neutralization by air blow

- For plastic bottle static neutralization and particle elimination

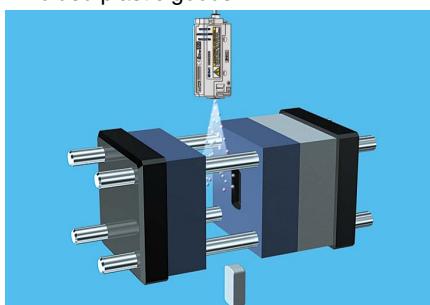

For the static neutralization of electric substrates

- Prevents the electrostatic breakdown of electric parts

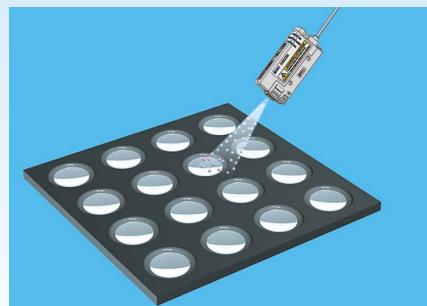

For the static neutralization of molded goods

- Prevents problems with the separation of molded plastic goods

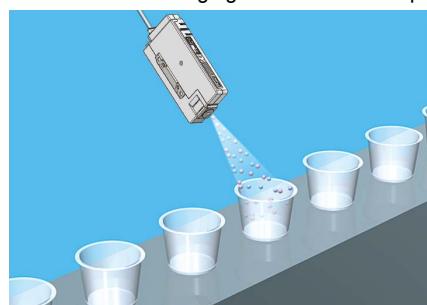

For the static neutralization of lenses

- Removes dust from lenses
- Prevents the adhesion of dust

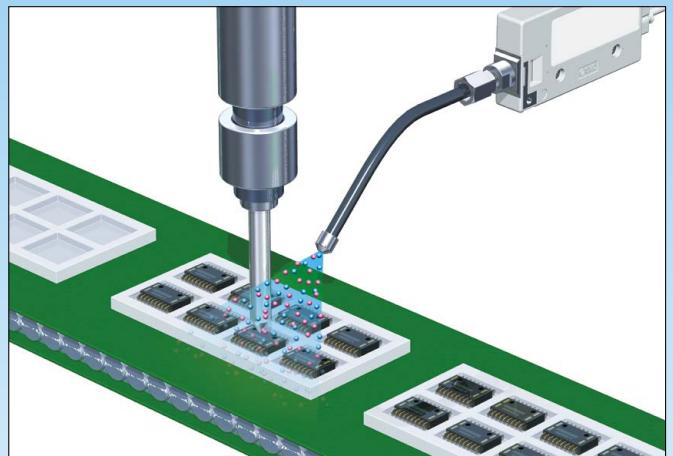

For the static neutralization of plastic cups

- Removes dust clinging to the inside of cups

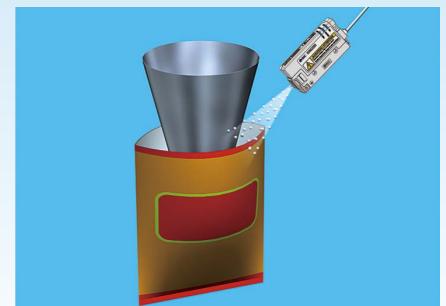

For the spot type static neutralization

- Prevents the electrostatic breakdown of electric parts
- Prevents detachment failure

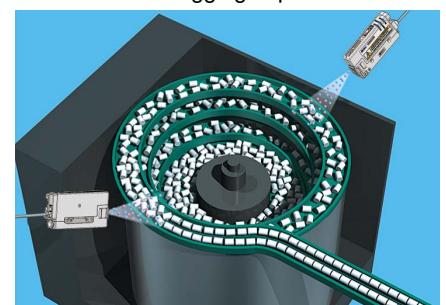

For the static neutralization of packing films

- Prevents the generation of static electricity when opening bags
- Prevents clinging due to static electricity on the inside of candy bags

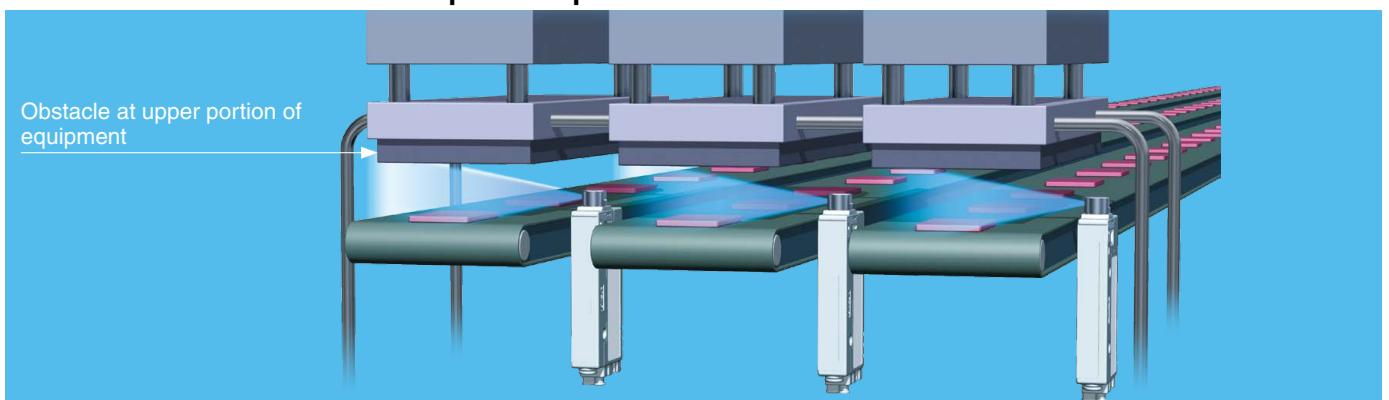

For the static neutralization of parts feeders

- Prevents the clogging of parts feeders

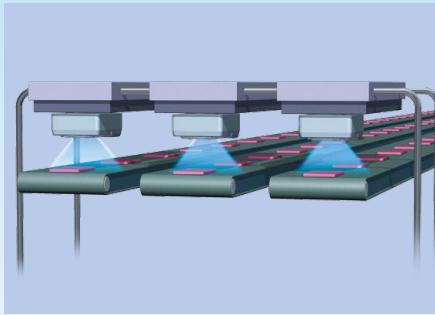

Static neutralization in narrow spaces is possible.

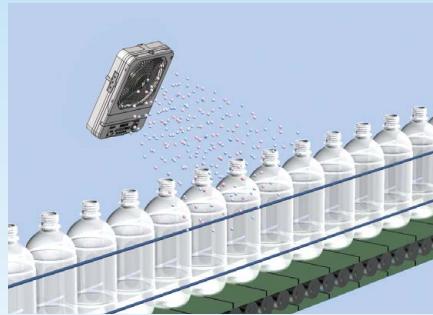

For the static neutralization of conveyors

- Static neutralization in a narrow space

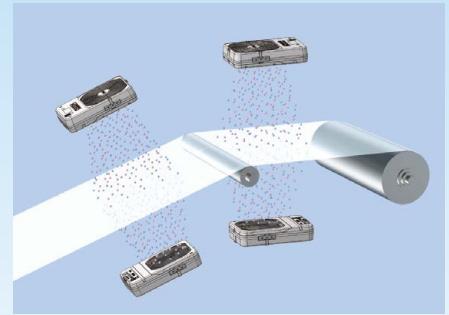

For the static neutralization of PET bottles

- Trip-resistance during conveying
- Prevents adhesion of dust

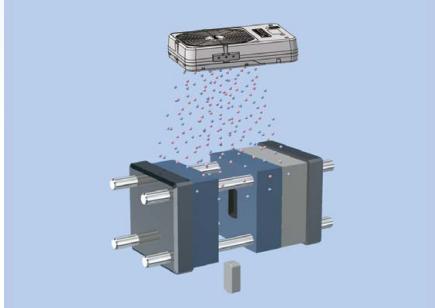

For the static neutralization of films

- Prevents winding failure
- Prevents adhesion of dust

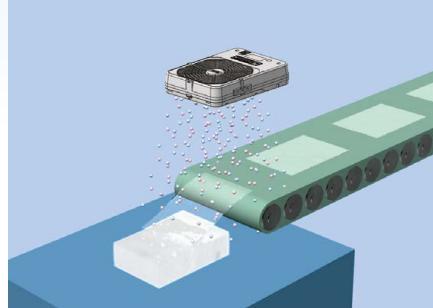

For the static neutralization of molded goods

- Improves detachability of molded goods from a die

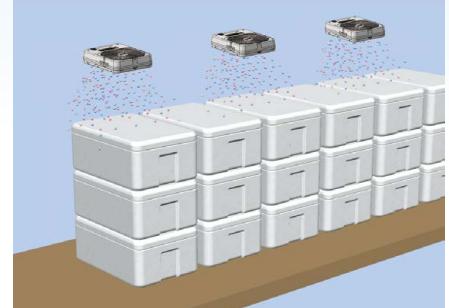

For the static neutralization of film-molded goods

- Sticking and scattering prevention on a conveyor

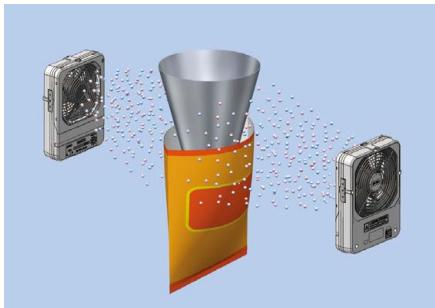

For the static neutralization of packaging materials made from polystyrene foam

- Darkening due to dust adhesion prevented

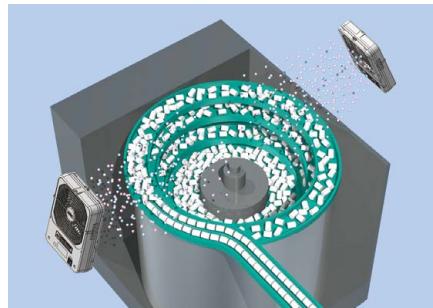

For the static neutralization of packing films

- Prevents the filled substance from adhering to the packing film and reduces packing mistakes

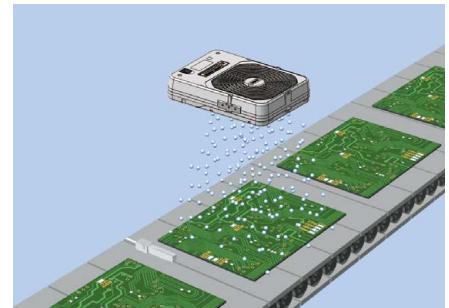

For the static neutralization of parts feeders

- Prevents the clogging of parts feeders

For the static neutralization of electric substrates

- Prevents failures due to ESD and adhesion of dust

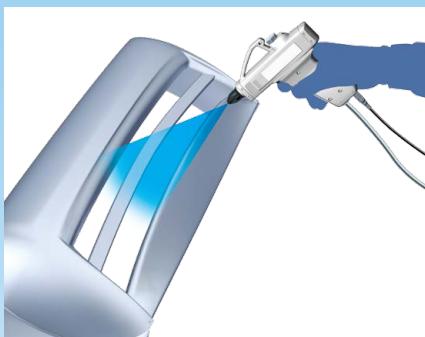

Application Examples

Ionizer Gun (Handheld Type) IZG10 Series

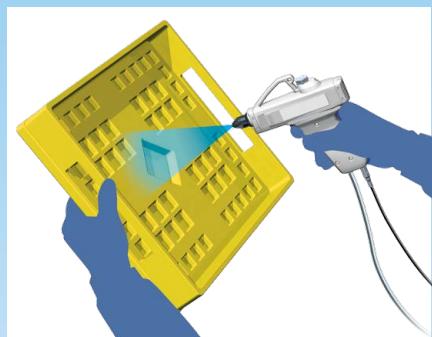

For the static neutralization and dust removal of resin parts

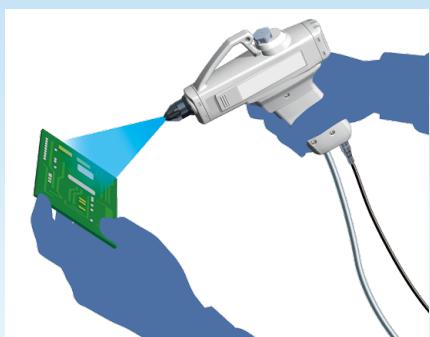

For the static neutralization and dust removal of resin parts

For the dust removal of resin products

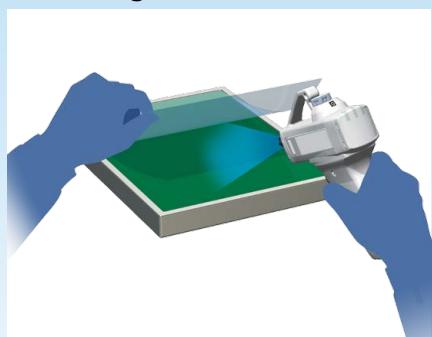

For the static neutralization and dust removal of electric substrates

For the static neutralization and dust removal of resin parts with the ionizer suspended from above

For the dust removal when detaching from film

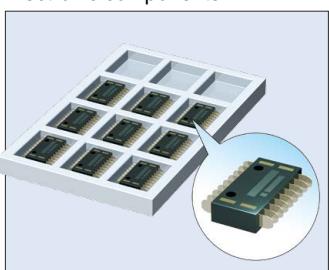

Application Examples

Desktop Duster Box ZVB Series

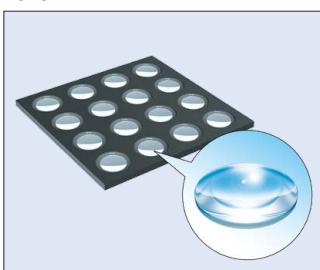

Supports workpieces of various sizes

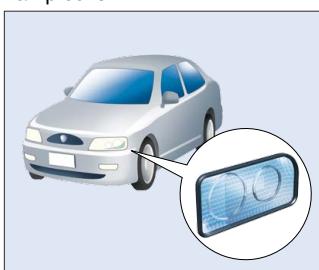

Electronic components

Lens

Lamp cover

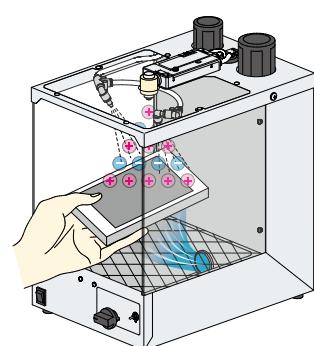

Cosmetic case

Parts for home appliances

Smartphone

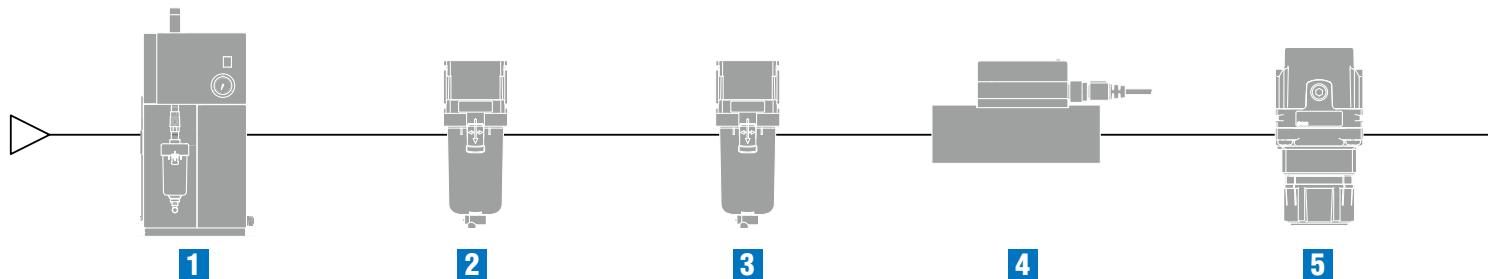

Peripheral Equipment

SMC can provide all the equipment required to supply air to the ionizer.

Consider the equipment below to provide opportunities to decrease maintenance and preventing damage.

Recommended pneumatic circuit diagram

1 Air Dryer

Removes moisture in the compressed air
