3-Port Solenoid Valve Modular Type/ Residual Pressure Release Valve with Detection of Main Valve Position

VP546/746 Series

Features

- Can be connected to modular type F.R.L. units (AC-D series)
- With main valve position detection function
The main valve position detection function is used to detect inconsistencies between input signals and valve operations.
- A model with a soft start-up function is also available.
- Variations

Residual Pressure Release Valve		Dual Residual Pressure Release Valve If one of the valves fails to operate, the other one releases the residual pressure.	
	With soft start-up function 		With soft start-up function 

- A variety of safety limit switches (Made by OMRON or Rockwell Automation) are available.
- Features a check valve built into the pilot flow path (Supports pilot pressure drops caused by pressure fluctuations on the inlet side)

Caution

To ensure the safest possible operation of this product, please be sure to thoroughly read the "Safety Instructions" in our "Best Pneumatics" catalog before use.
