Plug-in Type

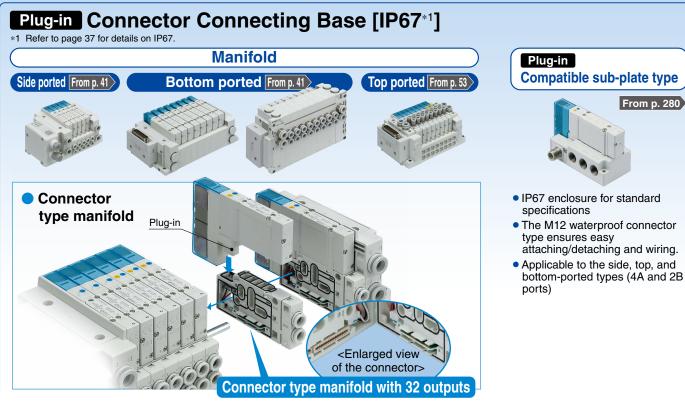

Due to the flow increase, the valve size can be reduced! Saves energy and space

SY3000/5000/7000 Series

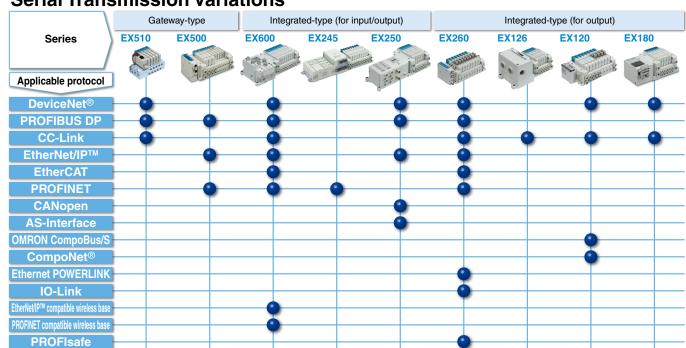

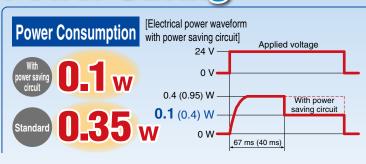

D-sub Connector Flat Ribbon Cable Terminal Block Box Lead Wire Circular Connector Serial Transmission

# **Serial Transmission Variations**

# **Power Saving**

#### Power consumption is reduced by the power saving circuit.

Power consumption is decreased to approx. 1/3 by reducing the wattage required to hold the valve in an energized state. (Effective energizing time is over 67 ms at 24 VDC.) Refer to the electrical power waveform to the left.

- \* Only products with an indicator light are equipped with the power saving circuit.
- The value in ( ) is for the quick response and high pressure types.

# Long Service Life

## Metal seal

(Service life: 200 million cycles)\*1

- According to SMC life test conditions
- Please contact SMC if life test data is required.

# Space Saving / Improved Operability

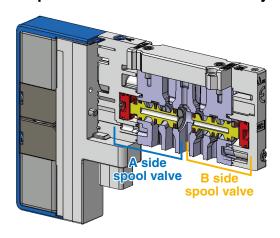

# Wiring, piping, and operation are integrated on one side.

A multiple-layer type is available as an From p. 204 option that saves space Piping in the lateral direction. Can be operated from the top (Wiring) SUP stop valve spacer with residual pressure release valve Individual SUP/EXH

# A 4-position dual 3-port valve is available.

(Only for the rubber seal type)

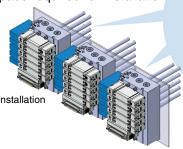

Two 3-port valves built into one body

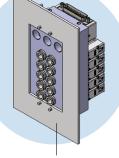

# A bottom-ported type is available (A and B ports).

Space saving

By using the bottom-ported type, it is possible to reduce the amount of space required for installation.

• 3-port valves on the A and B sides can be operated independently.

- When used as a 3-port valve, only half the number of stations is required.
- Can also be used as a 4-position, 5-port valve
- A 4-position dual 3-port valve with a back pressure check valve is also available.
- Combination examples

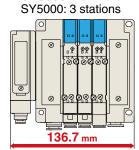

Series	A side	B side
SY□A <sub>3</sub> 0	N.C. valve	N.C. valve
SY□B <sub>3</sub> 0	N.O. valve	N.O. valve
SY□C <sub>3</sub> 0	N.C. valve	N.O. valve

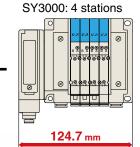

Different sizes (SY3000/5000 or SY5000/7000) can be mixed! From p. 165

2 sets

Panel fitting

It is possible to reduce installation space, the number of serial units, and the amount of wiring. SY5000 manifold SY3000 manifold For serial transmission EX260

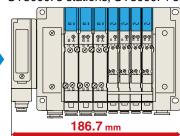

Mixed manifold

SY5000: 3 stations, SY3000: 4 stations

Overall manifold length

reduction

Number of serial units

Installation

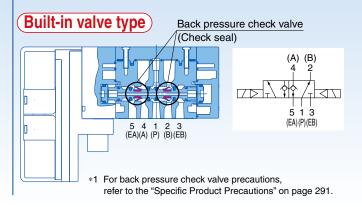

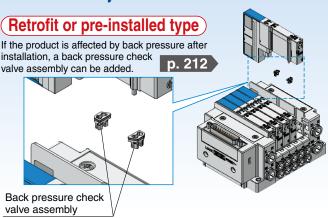

# Improved Safety

# **Back Pressure Check Valve**

This prevents actuator and air operated valve malfunctions caused by the exhaust from other valves.\*1

Indicator

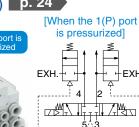

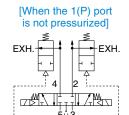

# With residual pressure release valve (SY5000/7000) p. 24

For residual pressure release of the 3-position closed center valve

- ·The pressure of the 4 (A) and 2 (B) ports is exhausted automatically when the pressure of the 1 (P) port is exhausted.
- ·The pressure can be visualized using the indicator (red).
- ·Since this valve is not a spacer type, the flow rate is equivalent to that of the normal closed center valve.

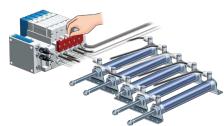

IP67 compliant

# LOCK Lever Type SUP Stop Valve Spacer (With residual pressure release valve) A lever has been added to manual override button! Solenoid valves can be replaced individually Easy to visually check without shutting off the main pressure!\*1 2-action operation Push STEP No tools are required. Locked Turn

#### Air for solenoid valves can be shut off individually!

The operation of an actuator can be checked by individually shutting off the air for the solenoid valves on the base while the main air is being supplied during a trial operation.

#### Solenoid valves can be replaced individually!

The solenoid valves can be replaced individually without stopping the equipment during maintenance.

For air operated valves, such as sanitary valves, and automatic valve

<sup>\*1</sup> This product is only for internal pilot specifications as the external pilot air cannot be shut off.

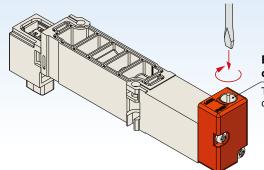

# Improved Safety

# Slotted Type

# **SUP Stop Valve Spacer**

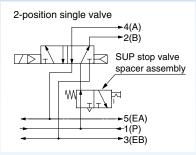

(With residual pressure release valve) p. 205

Air supply to each valve can be stopped individually. The valve and cylinder can be replaced without stopping other devices and equipment.

Button for manual release of residual pressure

To exhaust residual pressure on the cylinder side

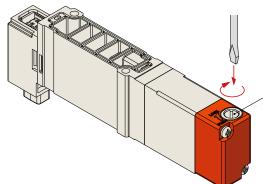

2-position single valve example

# **Slotted Type**

# **Double Check Spacer**

(With residual pressure release valve) p. 206

Long intermediate stops and position holding are possible.

# Button for manual release of residual pressure

To exhaust residual pressure on the cylinder side

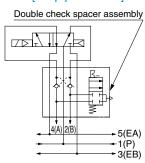

#### [Intermediate stop]

Double check spacer assembly

Exhaust center

-1(P)

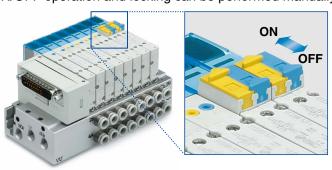

#### [Drop prevention]

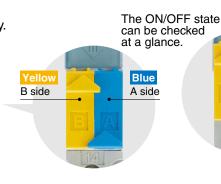

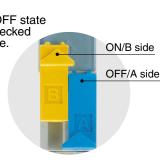

2-position single/double

# With slide locking manual override

ON/OFF operation and locking can be performed manually.

# **Improved Safety**

# Made to Order

With safety slide locking manual override SY3000/5000/7000-X13 p. 34

The double action manual override prevents accidental operation!

# SY7000-X13 on! SY3000-X13

#### Double-action operation

Before operation
The slide locking manual overrides cannot be turned ON with the safety slide cover in place. (OFF status: Locked)

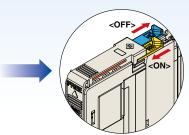

Safety slide cover

Slide locking manual overrides
Slide locking manual overrides

The safety slide cover is operated and moves upward. (Unlocked)

Operation 2 The slide locking manual overrides can be operated.

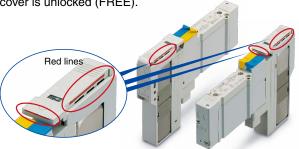

<Horizontal sliding>

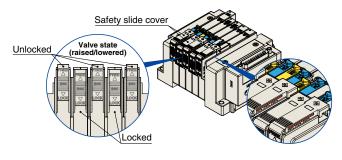

\* The safety slide cover cannot be locked when the slide locking manual override is turned ON.

#### Visual check

Red lines visible from three directions can be checked to confirm whether the safety slide cover is unlocked (FREE).

Safety slide covers can be checked from their raised and lowered positions.

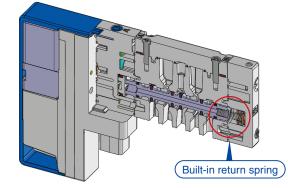

# Made to Order

2-Position Single Solenoid Valve with Built-in Return Spring (Only rubber seal type) SY3000/5000/7000-X350 p. 34

<Vertical sliding>

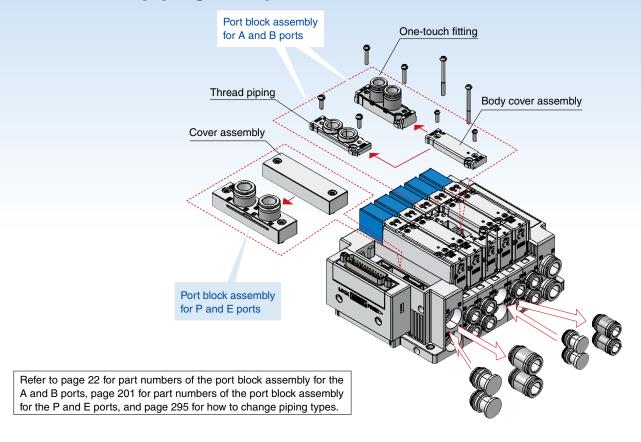

The main valve returns to the OFF position when it is not pressurized.

The main valve has a built-in spring which allows it to return to origin (the OFF position) when the supply pressure is stopped. This product can be used in SRP/CS (safety-related parts of control systems) constructions in accordance with safety standards (ISO 13849).

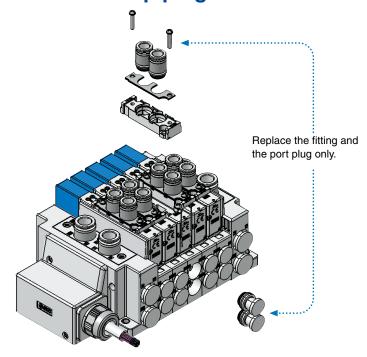

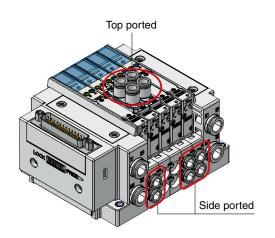

# To mount the piping on top

# To mount the piping on the side

# Mixed top-ported and sideported mounting is possible.

# For SY3000 Blanking Plate with Output p.211

■ The blanking plate extracts the individual signal of the manifold valve.

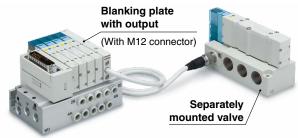

# **Application Examples**

For the control of separately mounted valves

For the control of vacuum ejectors by means of Fieldbus unit signals

Vacuum unit ZK2 Series

# Valve with Pressure Sensor p.32

Monitoring the output pressure of the solenoid valve contributes to preventive maintenance.

• The output pressure of the 4(A) and 2(B) ports can be detected.

 Detects errors such as incorrect switching, response delay, back pressure interference, pressure drop, etc.

• Identifies faulty parts of actuators, solenoid valves, etc.

• The required amount of space and installation labor can be reduced by directly mounting pressure switches on the solenoid valves.

# ■ Space saving, Reduced installation labor

#### Mountable manifolds

Metal base

Side ported/Type 50□

Connector

Bottom ported/Type 51□ Side ported/Type 10□ connecting base Bottom ported/Type 11□

#### Pressure sensor Rated pressure range:

- 0 to 1 MPa
- Power supply voltage: 12 to 24 VDC ±10%
- Output specifications: Analog output 1 to 5 V (In rated pressure range) Output impedance: Approx. 1  $k\Omega$

# **Application Examples**

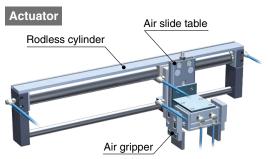

For the detection of output pressure Operation can be checked by monitoring the pressure

#### For the identification of faulty parts

A faulty part can quickly be identified by monitoring the operation of solenoid valves.

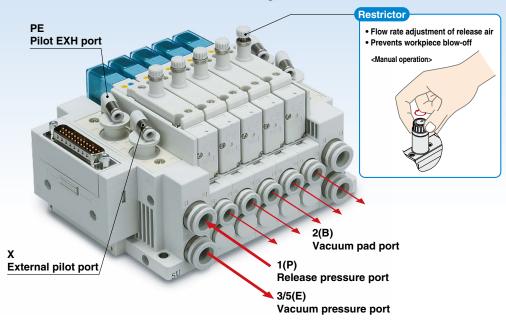

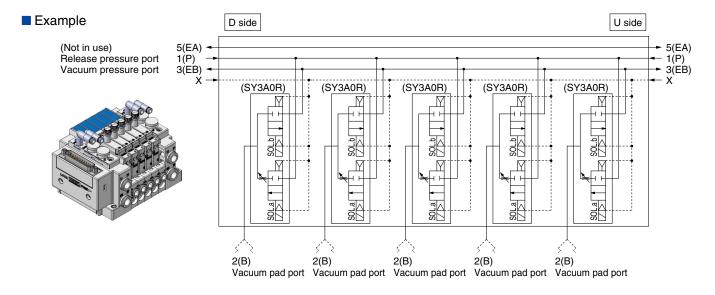

# Only for External Pilot Vacuum Release Valve with Restrictor SY 5 A R Series P. 26

Vacuum suction and release can be controlled with a single valve!

- Can be mounted on the same manifold as standard valves
  - \* When an individual EXH spacer is used

# Mountable manifolds Side ported Bottom ported Top ported Type 10 Type 11 Type 12 \* External pilot specification

# Applicable to EX600-W Series Wireless Systems p. 113 p. 123 p. 165 p. 169 p. 177

#### Noise resistance

- Uses the 2.4 GHz ISM frequency band
- Frequency hopping: Every 5 ms

#### Communication cables not required

- Reduced wiring work, space, and cost
- Minimized disconnection risk

#### ■ High-speed connection

 From the remote power supply ON to start of communication:

Min. 250 ms

# ■ Number of I/O points

• Max. 1280 inputs/1280 outputs (Max. 128 inputs/128 outputs per module)

#### ■ Communication response

 Wireless communication signal Response time: 5 ms

# ■ Compatible protocol

EtherNet/IP

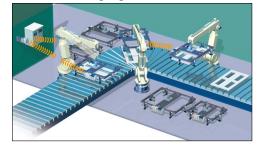

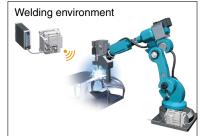

# **Application Examples**

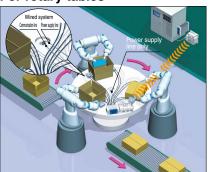

#### For tool changing

# For spot welding

#### For rotary tables

# The EX260 series supports safety communication (PROFIsafe). p. 135-1

# ■ This is a Fieldbus unit which supports safety standard ISO 13849-compliant safety circuit constructions.

PROFIsafe is established as an international standard (IEC 61784-3-3). It is a communication protocol that transmits safety-related data by PROFINET communication and can be used up until safety standards ISO 13849-1 PL e and IEC 61508/IEC 62061 SIL 3.

#### Using the safety communication protocol

Refer to the EX260 Web Catalog for details on units that support the safety communication protocol.

When using a manifold valve within an ISO 13849-compliant safety system, the device needs to be considered from both the pneumatic circuit and the electric side.

Devices (including valves) need to be selected based on whether their functions are in line with the safety level of the equipment as a whole. The use of valves that have been validated as being compliant with ISO 13849-2 may be required.

For details on valves that have been validated, please contact SMC.

In addition, refer to "Safety Instructions" for precautions on model selection.

# How to Order Pilot Valve Assembly (With a gasket and two mounting screws)

#### **⚠** Caution

- The coil specification and voltage (including light/surge voltage suppressor) cannot be changed by changing the pilot valve assembly.
- When selecting the coil type with power saving circuit, it is not possible to change to high pressure/power saving circuit type.

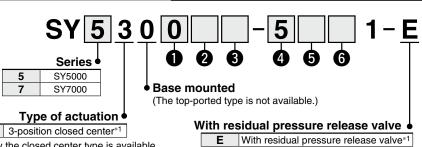

- Loosen B tight flat head screw to remove the pilot cover in the direction indicated by the arrow ①.
- Remove the pilot valve mounting screws.
- Remove the pilot valve in the direction indicated by the arrow 2.
- \* Assemble by following the removal procedure in reverse.
- Ensure the gasket is mounted, and take care not to bend the socket.
- Be noted for mounting that there are two types of lengths for the pilot valve mounting screws.

# With Residual Pressure Release Valve

# **How to Order Manifold Assembly**

SS5Y3-10F1-05DR-C6---1 set (Type 10 5-station manifold base part no.) \*SY3A0R-5U1 (3-position 3-port with restrictor part no.)---5 sets

- → The asterisk denotes the symbol for the assembly. Prefix it to the part numbers of the valve, etc.
- For the valve arrangement, the valve closest to the D side is considered the 1st station.
- Under the manifold part number, state the valves to be mounted in order starting
  with the 1st station as shown in the figure above. If the arrangement becomes
  too complicated, specify the details on a manifold specification sheet.

# B port size One-touch fitting (Metric size)

Nil	Round head combination screw
В	Hexagon socket head cap screw

- When ordering a valve individually, the base gasket is not included. Since the base gasket is attached to the manifold, please order the base gasket separately if it is needed for maintenance. Refer to page 198 or 266 for base gasket and mounting screw part numbers.
- "B" and "H" cannot be selected for the individual SUP/EXH spacer assembly or interface regulator.

Specific Product Precautions

# **SY3000/5000** Series

# **Valve Specifications**

Valve construction		3-position 3-port valve with restrictor	
Seal		Rubber seal	
Fluid		Air	
Type of actuation		Normally closed	
Operating pressure range [MPa]	Release pressure port 1(P)	0 to 0.6	
	Vacuum pressure port 3(EB), 3/5(E)	-100 kPa to 0.7*1	
Talige [WFa]	Pilot X port	Release pressure + 0.1 or more (Min. 0.25) to 0.7	
Restrictor operation		Manual	

- \*1 Can be used with positive pressure to suit the application
- \* Other specifications are common to the valve specifications on page 15.
- \* Quick response type is not available.

How to Order Valves (With mounting screw)

# Series

OCI ICO		
5	SY5000	
7	SY7000	

## Type of actuation

1	2-position	Single
2	z-position	Double
3		Closed center
4	3-position	Exhaust center
5		Pressure center
<b>A</b> *1	4 manitina	N.C./N.C.
B*1 C*1	4-position dual 3-port	N.O./N.O.
C*1	duai 3-port	N.C./N.O.

\*1 Only the rubber seal type is available for the 4-position dual 3-port valve.

# 3 Seal type

0	Rubber seal
1	Metal seal

## 4 Pilot type

	7:	
Nil	Internal pilot	
R	External pilot	

#### Back pressure check valve (Built-in valve type)

Nil	None
Н	Built-in

- Only the rubber seal type is available. A manifold installed type is available if a back pressure check valve with a metal seal is required. Refer to page 212 for ordering examples. However, it is not recommended to use the built-in valve type and the manifold installed type at the same time because it will reduce the flow.
- The built-in valve type back pressure check valve is not available for the 3-position type or the SY7000.

#### 6 Pilot valve option

Nil	Standard (0.7 MPa)	
B Quick response type (0.7 MP		
<b>K</b> *1	High pressure type (1.0 MPa)	

\*1 Only the metal seal type is available for the high pressure type.

#### Coil type

O con type		
Nil	Standard	
Т	With power saving circuit (Continuous duty type)	

- \* Be sure to select the power saving circuit type if the valve is to be continuously energized for long periods of time.
- Be careful of the energizing time when the power saving circuit is selected. Refer to page 292 for details.

#### Rated voltage

5	24 VDC
6	12 VDC

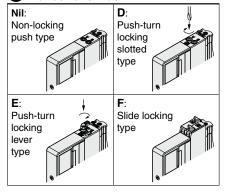

\* The applicable rated voltage varies depending on the manifold wiring type.

## 9 Light/surge voltage suppressor and common specification

Symbol	With light	Surge voltage suppressor	Common specification
Nil	_	_	
R	_	•	Non-polar
U	•		
S	_		Positive
Z	•		common
NS	_		Negative
NZ	•		common

- \* For the non-polar type, be careful of surge voltage intrusion. Refer to page 293 for details. (Excludes when an SI unit manifold is used)
- Only "Z" and "NZ" are available with a power saving circuit.
- Select "R," "U," "S," or "Z" for the valve when the SI unit output polarity is positive common. Select "R," "U," "NS," or "NZ" for the valve when the SI unit output polarity is negative common.

# Manual override

#### (II) A, B port size One-touch fitting (Metric)

Symbol	A, B port	SY5000	SY7000
C6	ø6	•	•

12 Type of mounting screw

Nil	Round head combination screw
В	Hexagon socket head cap screw
K	Round head combination screw (Drop prevention type)
Н	Hexagon socket head cap screw (Drop prevention type)

- \* For "K" and "H," the valve body cover has a drop prevention construction to stop the mounting screws from falling out when the valve is removed for maintenance, etc.
- When ordering a valve individually, the base gasket is not included.

Since the base gasket is attached to the manifold, please order the base gasket separately if it is needed for maintenance. Refer to page 198 for base gasket and mounting screw part numbers

"B" and "H" cannot be selected for the individual SUP/EXH spacer assembly or interface regulator.

# (13) Pressure sensor

Symbol	Included quantity
P1	1 pc.
P2	2 pcs.

- \* The top-ported type valve and the C6 (ø6) One-touch fitting are used.
- The PSE540-R06 pressure sensor is included in the product package.
- When "P1" is selected, one plug (KQ2P-06) is included in the product package.

# **How to Order Manifold Assembly**

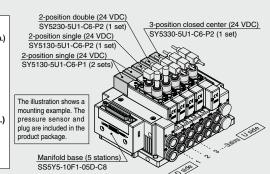

# Example (SS5Y5-10F1 )

SS5Y5-10F1-05D-C8

- ···1 set (Type 10 5-station manifold base part no.)
- \*SY5130-5U1-C6-P1 ··· 2 sets (2-position single part no.)
- \*SY5130-5U1-C6-P2
- ···1 set (2-position double part no.)

  \* SY5230-5U1-C6-P2
- set (2-position double part no.)
- \*SY5330-5U1-C6-P2
- ···1 set (3-position closed center part no.)
  - The asterisk denotes the symbol for the assembly.

Prefix it to the part numbers of the

For the valve arrangement, the valve closest to the D side is considered the 1st station.

Under the manifold part number, state the valves to be mounted in order starting with the 1st station as shown in the figure above. If the arrangement becomes too complicated, specify the details on a manifold specification sheet.

# **SY5000/7000** Series

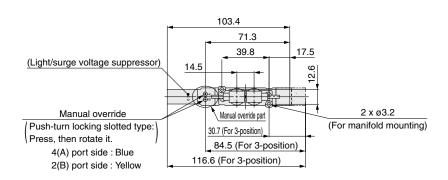

# **Pressure Sensor Specifications**

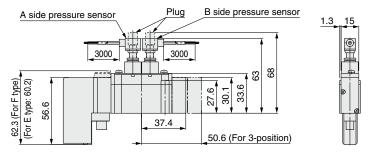

Model		PSE540
Rated pressure range		0 to 1 MPa*1
Power supply	voltage	12 to 24 VDC ±10%, Ripple (p-p) 10% or less (with reverse connection protection)
Current consumption		15 mA or less
Output specifications		Analog output 1 to 5 V (within rated pressure range), 0.6 to 1 V (within extension analog output range), Output impedance: Approx. 1 k $\Omega$
Linearity		±0.7% F.S. or less
Environment	Enclosure*2	IP40
Temperature characteristics		±2% F.S. (25°C reference)
Sensor cable		Oilproof heavy-duty vinyl cable (ellipse), 3 cores, 2.7 x 3.2, 3 m, Conductor area: 0.15 mm², Insulator O.D.: 0.9 mm

Valve Specifications

## SY3000/5000/7000 Series Made to Order

Please contact SMC for detailed dimensions, specifications, and lead times.

## 1 Main Valve Fluororubber Specification

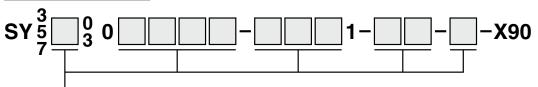

**Symbol** -X90

Made to Order

Fluororubber is used for rubber parts of the main valve to allow use in applications such as the following.

· When using a lubricant other than the recommended turbine oil, and there is a possibility of malfunction due to swelling of the spool valve seals.

Applicable valves series SY3 $\bigcirc_3^0$ 0, SY5 $\bigcirc_3^0$ 0, SY7 $\bigcirc_3^0$ 0 (Only rubber seal type)

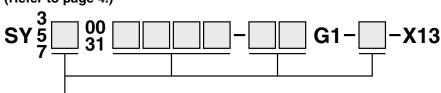

Entry is the same as standard products.

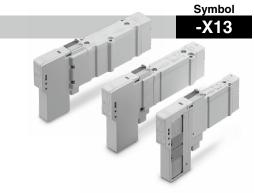

Specifications and performance are the same as standard products.

## 2 With Safety Slide Locking Manual Override

A safety lock is added to the slide locking manual override. (Refer to page 4.)

Entry is the same as standard products. Specifications and performance are the same as standard products.

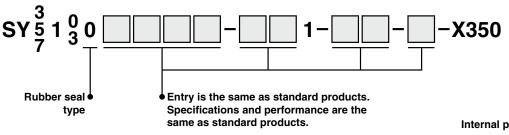

**Symbol** 

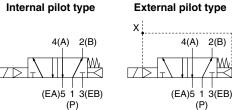

## 3 2-Position Single Solenoid Valve with Built-in Return Spring (Only rubber seal type)

-X350

A 2-position single solenoid valve with a spring built into the main valve The main valve returns to origin (the OFF position) via the spring when it is not pressurized.

Internal pilot type

\* For the external pilot type, exhaust the external pilot (X) port and the main pressure simultaneously.

If the main pressure cannot be exhausted due to the system specifications, please contact SMC separately.

\* The manual option is only applicable to the non-locking push type.

<sup>\*</sup> Calculation of effective area S and sonic conductance C: S = 5.0 x C

#### **Connector Wiring Layout**

For both serial and parallel wiring, additional valves are sequentially assigned pins on the connector. This makes it completely unnecessary to disassemble the connector unit.

■ Single solenoid valve is installed to all double wiring. (in the case of all double wiring)

\* These diagrams are for the purpose of explanation, and differ from the connector wiring used for testing.

02	2 stations	Specified layout*2	02	2 stations	Specified layout*2
:	:	(Up to 18 solenoids	•	:	(Up to 8 solenoids
18	18 stations	available)	08	8 stations	available)

- \*1 Double wiring: 2-position single, double, 3-position, and 4-position valves can be used on all manifold stations. Use of a 2-position single solenoid will result in an unused control signal. If this is not desired, order with a specified layout.
- \*2 Specified layout: Indicate the wiring specifications on the manifold specification sheet. (Note that 2-position double, 3-position, and 4position valves cannot be used where single wiring has been specified.)
- This also includes the number of the blanking plate assembly.

#### **How to Order Manifold Assembly**

Example (SS5Y3-10F1-	□)
	2-position double (24 VDC)
2-position single (24 VDC)	SY3200-5U1 (1 set)
SY3100-5U1 (3 sets)	3-position closed center (24 VDC)
	SY3300-5U1 (1 set)
Manifold base (5 stations) SS5Y3-10F1-05D-C6	

SS5Y3-10F1-05D-C6 ··· 1 set (Type 10 5-station manifold base part no.) \*SY3100-5U1------3 sets (2-position single part no.) \*SY3200-5U1------ 1 set (2-position double part no.) \*SY3300-5U1------1 set (3-position closed center part no.)

- The asterisk denotes the symbol for the assembly. Prefix it to the part numbers of the valve, etc.
- For the valve arrangement, the valve closest to the D side is considered the 1st station. • Under the manifold part number, state the valves to be mounted in order starting with the 1st station as shown in the figure above. If the arrangement becomes too complicated, specify the details on a manifold specification sheet.
- When mixing top-ported configurations, select from those listed on page 54. In such cases, use caution as there is also output on the A and B ports on the base side. Specify on the manifold specification sheet if plugs are required for the A and B ports on the base side.

\*1 Indicate the sizes on the manifold specification sheet in the case of "CM" or "LM." The direction of P, E port fittings is the same as for the A, B port. If selecting "LM," indicate it on the manifold specification sheet for the P, E port fitting direction.

\*2 To avoid interference with the body or piping, select a downward elbow port when mounting the optional spacer assembly (pages 204 to 206).

#### How to Order Valves (With mounting screw)

Refer to page 15 for valve specifications.

#### Series

3	SY3000
5	SY5000
7	SY7000

2 Type of actuation

<u> </u>	O Type of actuation					
1	2-position	Single				
2	2-008111011	Double				
3		Closed center				
4	3-position	Exhaust center				
5		Pressure center				
<b>A</b> *1	4-position	N.C./N.C.				
B*1	dual	N.O./N.O.				
<b>C</b> *1	3-port	N.C./N.O.				

\*1 Only the rubber seal type is available for the 4-position dual 3-port valve.

#### 6 Pilot valve option

	эт тапто орион
Nil	Standard (0.7 MPa)
В	Quick response type (0.7 MPa)
<b>K</b> *1	High pressure type (1.0 MPa)

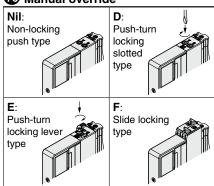

\*1 Only the metal seal type is available for the high pressure type.

Coil type

	, po
Nil	Standard
Т	With power saving circuit (Continuous duty type)

- Be sure to select the power saving circuit type if the valve is to be continuously energized for long periods of time.
- Be careful of the energizing time when the power saving circuit is selected. Refer to page 292 for details.

### Manual override

Refer to page 34 for the safety slide locking manual override.

#### 3 Seal type

0	Rubber seal
1	Metal seal

4 Pilot type

Nil	Internal pilot
R	External pilot

#### **5** Back pressure check valve (Built-in valve type)

Nil	None Built-in					
Н						

- \* Only the rubber seal type is available. A manifold installed type is available if a back pressure check valve with a metal seal is required. Refer to page 212 for ordering examples. However, it is not recommended to use the built-in valve type and the manifold installed type at the same time because it will reduce the flow.
- The built-in valve type back pressure check valve is not available for the 3-position type or the SY7000.

#### 8 Rated voltage

	· · · · · · · · · · · · · · · · · · ·
5	24 VDC
6	12 VDC

9 Light/surge voltage suppressor and common specification

Symbol	With light	Surge voltage suppressor	Common specification
Nil	_	_	
R	_		Non-polar
U	•		
S	_		Positive
Z	•	_	common
NS	_		Negative
N7	•		common

- For the non-polar type, be careful of surge voltage intrusion.
- Refer to page 293 for details.
  Only "Z" and "NZ" types are available with a power saving circuit.

Type of mounting screw

	· · · · · · · · · · · · · · · · · · ·
Nil	Round head combination screw
В	Hexagon socket head cap screw
K	Round head combination screw (Drop prevention type)
Н	Hexagon socket head cap screw (Drop prevention type)

- \* For "K" and "H," the valve body cover has a drop prevention construction to stop the mounting screws from falling out when the valve is removed for maintenance, etc.
- When ordering a valve individually, the base gasket is not included. Since the base gasket is attached to the manifold, please order the base gasket separately if it is needed for maintenance. Refer to page 198 for base gasket and mounting screw part numbers.
- "B" and "H" cannot be selected for the individual SUP/EXH spacer assembly, interface regulator, or double check spacer assembly with residual pressure release valve.

## Plug-in Connector Connecting Base

D-sub Connector | Flat Ribbon Cable

# SY3000/5000/7000 Series 5

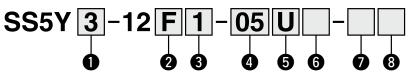

#### **How to Order Manifolds**

Refer to pages 162 to 164 for the dimensions of Type 12/Top-ported type.

Type 12

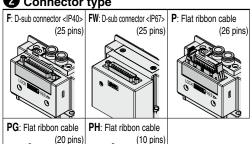

Top Ported

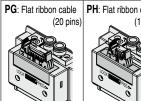

#### Series

3	SY3000
5	SY5000
7	SY7000

2 Connector type

O i , = port ontry				
<b>U</b> *1	U side (2 to 10 stations)			
<b>D</b> *1	D side (2 to 10 stations)			
B	Both cidos (2 to 24 stations)			

\*1 6 For type "S", SUP/EXH block assembly with a built-in silencer, choose U or D for P, E port entry.

#### **How to Order Manifold Assembly**

#### Example (SS5Y3-12F1-□) 2-position double (24 VDC) 2-position single (24 VDC) SY3230-5U1-C6 (1 set) SY3130-5U1-C6 (3 sets) 3-position closed center (24 VDC) SY3330-5U1-C6 (1 set) Manifold base (5 stations) SS5Y3-12F1-05D

SS5Y3-12F1-05D ..... 1 set (Type 12 5-station manifold base part no.)

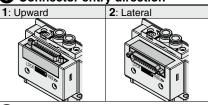

\*SY3130-5U1-C6 ...... 3 sets (2-position single part no.) \*SY3230-5U1-C6 ...... 1 set (2-position double part no.)

\*SY3330-5U1-C6 ...... 1 set (3-position closed center part no.)

The asterisk denotes the symbol for the assembly. Prefix it to the part numbers of the valve, etc.

• For the valve arrangement, the valve closest to the D side is considered the 1st station. • Under the manifold part number, state the valves to be mounted in order starting with the 1st station as shown in the figure above. If the arrangement becomes too complicated, specify the details on a manifold specification sheet.

#### 3 Connector entry direction

The connector entry direction for connector type "FW" D-sub connector <IP67> cannot be rotated. If it is necessary to change, order the connector block assembly (page 183) separately.

#### 4 Valve stations

#### **F/FW**: D-sub connector (25 pins) **P**: Flat ribbon cable (26 pins)

Stations	Note	Symbol	Stations	Note
2 stations		02	2 stations	
:	Double wiring*1		:	Double wiring*1
12 stations		12	12 stations	
2 stations	Specified layout*2	02	2 stations	Specified layout*2
	(Up to 24 solenoids		:	(Up to 24 solenoids
24 stations	available)	24	24 stations	available)
	2 stations 12 stations 2 stations	2 stations            12 stations         Double wiring*1           2 stations         Specified layout*2            (Up to 24 solenoids)	2 stations          Double wiring*1           12 stations          12 stations         Specified layout*2         02          02   .	2 stations        Double wiring*1   .

#### **PG**: Flat ribbon cable (20 pins) **PH**: Flat ribbon cable (10 pins)

G. Flat hibbori cable (20 pins)			 <u>гп.</u>	rial II	bbon cable (10 pins)
Symbol	Stations	Note	Symbol	Stations	Note
02	2 stations		02	2 stations	
-	:	Double wiring*1	- E	:	Double wiring*1
09	9 stations		04	4 stations	
02	2 stations	Specified layout*2	02	2 stations	Specified layout*2
•	:	(Up to 18 solenoids		:	(Up to 8 solenoids
18	18 stations	available)	08	8 stations	available)

- \*1 Double wiring: 2-position single, double, 3-position, and 4-position valves can be used on all manifold stations Use of a 2-position single solenoid will result in an unused control signal. If this is not desired, order with a specified layout.
- \*2 Specified layout: Indicate the wiring specifications on the manifold specification sheet. (Note that 2-position double, 3-position, and 4-position valves cannot be used where single wiring has been
- This also includes the number of the blanking plate assembly.

#### 6 SUP/EXH block assembly

	, = ,		
Nil	Internal pilot		
S	Internal pilot, Built-in silencer		
R	External pilot		

The P and E ports are only available on the U and D sides for the built-in silencer type. 3/5(E) port is plugged. The silencer exhaust port is located on the opposite side of the P and E port entry. (Example: When the P and E port entry is on the D side, the silencer exhaust port is on the U side.)

#### 8 Mounting

Nil	Direct mounting		
D	DIN rail mounting (With DIN rail)		
D0	DIN rail mounting (Without DIN rail)		
D3	For 3 stations	Specify a length	
- i	i longer than that of		
D24	For 24 stations the standard rail.		

Refer to page 295 for the fixation of DIN rail mounting type manifold.

#### P, E port size (One-touch fittings)

			<u>_                                </u>
Symbol	SY3000	SY5000	SY7000
Nil	ø8	ø10	ø12
N	ø5/16"	ø3/8"	ø1/2"

\* For N, sizes are in inches.

Valve Specifications

Valve Construction

## Refer to page 15 for valve specifications.

How to Order Valves (With mounting screw)

#### 1 Series

3	SY3000
5	SY5000
7	SY7000

2 Type of actuation

1	2-position	Single
2		Double
3		Closed center
4	3-position	Exhaust center
5		Pressure center
<b>A</b> *1	1 dual	N.C./N.C.
<b>B</b> *1		N.O./N.O.
C*1		N.C./N.O.

\*1 Only the rubber seal type is available for the 4-position dual 3-port valve.

#### 3 Seal type

0	Rubber seal	
1	Metal seal	

#### 4 Pilot type

	7.
Nil	Internal pilot
R	External pilot

## Back pressure check valve (Built-in valve type)

Nil	None
Н	Built-in

- \* Only the rubber seal type is available. A manifold installed type is available if a back pressure check valve with a metal seal is required. Refer to page 212 for ordering examples. However, it is not recommended to use the built-in valve type and the manifold installed type at the same time because it will reduce the flow.
- \* The built-in valve type back pressure check valve is not available for the 3-position type or the SY7000.

#### 6 Pilot valve option

Nil	Standard (0.7 MPa)	
В	Quick response type (0.7 MPa)	
<b>K</b> *1	High pressure type (1.0 MPa)	

\*1 Only the metal seal type is available for the high pressure type.

Coil type

• con type		, po
	Nil	Standard
	Т	With power saving circuit (Continuous duty type)

- \* Be sure to select the power saving circuit type if the valve is to be continuously energized for long periods of time.
- Be careful of the energizing time when the power saving circuit is selected. Refer to page 292 for details.

#### 8 Rated voltage

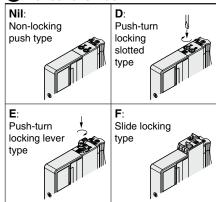

5	24 VDC
6	12 VDC

## 9 Light/surge voltage suppressor and common specification

Symbol	With light	Surge voltage suppressor	Common specification
Nil	_	_	
R	_		Non-polar
U	•	•	
S	_		Positive
Z	•		common
NS	_		Negative
NZ	•		common

- For the non-polar type, be careful of surge voltage intrusion.
   Refer to page 293 for details.
- Only "Z" and "NZ" types are available with a power saving circuit.

#### Manual override

\* Refer to page 34 for the safety slide locking manual override.

## A, B port size

#### Thread piping

Symbol	Port size	Applicable series
M5	M5 x 0.8	SY3000
01	1/8	SY5000
02	1/4	SY7000

N7	ø1/4"	•	•	•
N9	ø5/16"	_	•	•
N11	ø3/8"	_	_	•

#### 12 Thread type

Nil	Rc
F	G
N	NPT
T	NPTF

\* Only Nil is available for M5.

#### Type of mounting screw

Nil	Round head combination screw
B Hexagon socket head cap screw	
K	Round head combination screw (Drop prevention type)
Н	Hexagon socket head cap screw (Drop prevention type)

- \* For "K" and "H," the valve body cover has a drop prevention construction to stop the mounting screws from falling out when the valve is removed for maintenance, etc.
- When ordering a valve individually, the base gasket is not included.
  Since the base gasket is attached to the manifold, please order the base gasket separately if it is needed for maintenance. Refer to page 198 for base gasket and mounting screw part numbers.
- "B" and "H" cannot be selected for the individual SUP/EXH spacer assembly or interface regulator.

В	Both sides (2 to 24 stations)

#### 6 SUP/EXH block assembly

_	
Nil	Internal pilot
S	Internal pilot, Built-in silencer
R	External pilot

- \* 3/5(E) port is plugged for the built-in silencer type.
- \* When the built-in silencer type is used, keep the exhaust port from coming into direct contact with water or other liquids.

#### 3 Valve stations

#### TC: Spring type terminal block box

Symbol	Stations	Note
02	2 stations	
:	:	Double wiring *1
16	16 stations	_
02	2 stations	Specified layout *2
:	i	(Up to 32 solenoids
24	24 stations	available)

- \*1 Double wiring: 2-position single, double, 3-position, and 4-position valves can be used on all manifold stations.
  - Use of a 2-position single solenoid will result in an unused control signal. If this is not desired, order with a specified layout.
- Specified layout: Indicate the wiring specifications with the manifold specification sheet. (Note that 2-position double, 3-position, and 4-position valves cannot be used where single wiring has been speci-
- This also includes the number of the blanking plate assembly.

#### Mounting and Option

#### Symbol Mounting Option Nil Direct AA Name plate (with station number) mounting Name plate (without station number) BA DIN rail Mithout name plate Name plate (with station number) Name plate (without station number) $\mathsf{D}\Box$ В□

#### **DIN Rail Option**

- \*1 Indicate the sizes on the manifold specification sheet in the case of "CM" or "LM." The direction of P, E port fittings is the same as for the A, B port. If selecting "LM," indicate it on the manifold specification sheet for the P, E port fitting direction.
- \*2 To avoid interference with the body or piping, select a downward elbow port when mounting the optional spacer assembly.

## **How to Order Manifold Assembly**

Example (SS5Y3-10TC-

#### 2-position double (24 VDC) 3-position closed center (24 VDC) SY3200-5U1 (1 set) SY3300-5U1 (1 set) 2-position single (24 VDC) SY3100-5U1 (3 sets) Manifold base (5 stations) SS5Y3-10TC-05D-C6 SS5Y3-10TC-05D-C6.....1 set (Type 10 5-station manifold base part no.) \* SY3100-5U1 ----- 3 sets (2-position single part no.) \* SY3200-5U1 ...... 1 set (2-position double part no.) \* SY3300-5U1 ...... 1 set (3-position closed center part no.) The asterisk denotes the symbol for the assembly. Prefix it to the part numbers of the valve, etc.

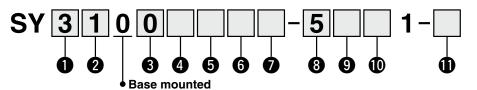

- For the valve arrangement, the valve closest to the D side is considered the 1st station.
- Under the manifold part number, state the valves to be mounted in order starting with the 1st station as shown in the figure above. If the arrangement becomes too complicated, specify the details on a manifold specification sheet.

Valve Specifications

Valve Construction

#### How to Order Valves (With mounting screw)

Refer to page 15 for valve specifications.

#### Series

3	SY3000
5	SY5000
7	SY7000

2 Type of actuation

Opposition	Single					
2-position	Double					
	Closed center					
3-position	Exhaust center					
	Pressure center					
	N.C./N.C.					
	N.O./N.O.					
dual 5-port	N.C./N.O.					
	2-position 3-position 4-position dual 3-port					

\*1 Only the rubber seal type is available for the 4-position dual 3-port valve.

3 Seal type

0	Rubber seal
1	Metal seal

4 Pilot type

Nil	Internal pilot
R	External pilot

#### 5 Back pressure check valve (Built-in valve type)

Nil	None
Н	Built-in

- \* Only the rubber seal type is available. A manifold installed type is available if a back pressure check valve with a metal seal is required. Refer to page 212 for ordering examples. However, it is not recommended to use the built-in valve type and the manifold installed type at the same time because it will reduce the flow.
- The built-in valve type back pressure check valve is not available for the 3-position type or the SY7000.

#### 6 Pilot valve option

Nil Standard (0.7 MPa)							
В	Quick response type (0.7 MPa)						
<b>K</b> *1	High pressure type (1.0 MPa)						

\*1 Only the metal seal type is available for the high pressure type.

**∩** Coil type

<del>•</del> • • •	ii type
Nil	Standard
Т	With power saving circuit (Continuous duty type)

- \* Be sure to select the power saving circuit type if the valve is to be continuously energized for long periods of time.
- Be careful of the energizing time when the power saving circuit is selected. Refer to page 292 for details.

#### Rated voltage

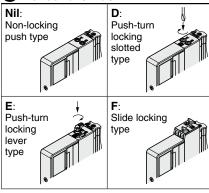

•	iou ronago
5	24 VDC
6	12 VDC

9 Light/surge voltage suppressor and common specification

Symbol	With light	Surge voltage suppressor	Common specification		
Nil	_	_			
R	_		Non-polar		
U	•				
S	_		Positive		
Z	•	_	common		
NS	_		Negative		
NZ	•		common		

- For the non-polar type, be careful of surge voltage intrusion.
- Refer to page 293 for details.
  Only "Z" and "NZ" types are available with a power saving circuit.

#### Manual override

Refer to page 34 for the safety slide locking manual override.

#### Type of mounting screw

Nil	Round head combination screw
В	Hexagon socket head cap screw
K	Round head combination screw (Drop prevention type)
Н	Hexagon socket head cap screw (Drop prevention type)

\* For "K" and "H," the valve body cover has a drop prevention construction to stop the mounting screws from falling out when the valve is removed for maintenance, etc.

When ordering a valve individually, the base gasket is not included. Since the base gasket is attached to the manifold, please order the base gasket separately if it is needed for maintenance. Refer to page 198 for base gasket and mounting screw part numbers.

"B" and "H" cannot be selected for the individual SUP/EXH spacer assembly, interface regulator, or double check spacer assembly with residual pressure release valve.

#### 3 Valve stations

#### TC: Spring type terminal block box

Stations	Note				
2 stations					
:	Double wiring *1				
16 stations					
2 stations	Considered laws with \$2				
:	Specified layout *2 (Up to 32 solenoids available)				
24 stations	(Op to 32 soleriolds available)				
	2 stations : 16 stations 2 stations :				

\*1 Double wiring: 2-position single, double, 3-position, and 4-position valves can be used on all manifold stations.

Use of a 2-position single solenoid will result in an unused control signal. If this is not desired, order with a specified layout.

- \*2 Specified layout: Indicate the wiring specifications with the manifold specification sheet. (Note that 2-position double, 3-position, and 4-position valves cannot be used where single wiring has been specified.)
- This also includes the number of the blanking plate assembly.

#### 4 P, E port entry

	1
U	U side (2 to 10 stations)
D	D side (2 to 10 stations)
В	Both sides (2 to 24 stations)

#### 5 SUP/EXH block assembly

Nil	Internal pilot
S	Internal pilot, Built-in silencer
R	External pilot

- \* The P and E ports are only available on the U and D sides for the built-in silencer type. 3/5(E) port is plugged. The silencer exhaust port is located on the opposite side of the P and E port entry. (Example: When the P and E port entry is on the D side, the silencer exhaust port is on the U side.)
- When the built-in silencer type is used, keep the exhaust port from coming into direct contact with water or other liquids.

## **How to Order Manifold Assembly**

Example (SS5Y3-12TC	;-□)
2-position double (24 VDC) SY3230-5U1-C6 (1 set)	3-position closed center (24 VDC) SY3330-5U1-C6 (1 set)
2-position single (24 VDC) SY3130-5U1-C6 (3 sets)	
	Manifold base (5 stations) SS5Y3-12TC-05D
SS5Y3-12TC-05D 1 set (Ty	pe 12 5-station manifold base part no.)

- \* SY3130-5U1-C6 .......3 sets (2-position single part no.)
- \* SY3230-5U1-C6 ·······1 set (2-position double part no.)
- \* SY3330-5U1-C6 ......1 set (3-position closed center part no.)
  - The asterisk denotes the symbol for the assembly. Prefix it to the part numbers of the valve, etc.
- For the valve arrangement, the valve closest to the D side is considered the 1st station.
- Under the manifold part number, state the valves to be mounted in order starting with the 1st station as shown in the figure above. If the arrangement becomes too complicated, specify the details on a manifold specification sheet.

#### 6 P. E port size (One-touch fittings)

\* Only Nil is available for M5.

#### Type of mounting screw

Nil Round head combination screv	
B Hexagon socket head cap scre	
K	Round head combination screw (Drop prevention type)
Н	Hexagon socket head cap screw (Drop prevention type)

- For "K" and "H," the valve body cover has a drop prevention construction to stop the mounting screws from falling out when the valve is removed for maintenance, etc.
- When ordering a valve individually, the base gasket is not included.
  Since the base gasket is attached to the manifold, please order the base gasket separately if it is needed for maintenance.
  Refer to page 198 for base gasket and mounting screw part numbers.
- "B" and "H" cannot be selected for the individual SUP/EXH spacer assembly or interface regulator.

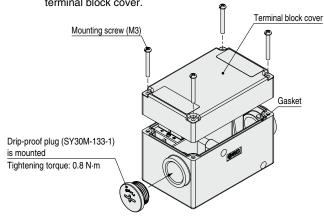

#### **Terminal Block Connection**

#### Step 1. Remove the terminal block cover

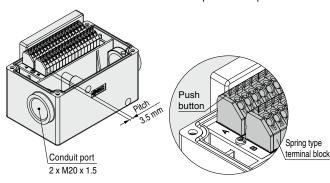

Loosen the 4 mounting screws (M3) to remove the terminal block cover.

Step 2. The diagram below shows the terminal block wiring. All stations are provided with double wiring regardless of the mounted valves.

> Connect each wire to the power supply side, according to the markings provided inside the terminal block.

> Be sure to connect the wire with the push button pressed down.

#### Step 3. Mount the terminal block cover

Securely tighten the mounting screws (M3) to the torque shown in the table below only after confirming that the gasket is installed correctly.

Proper tightening torque [N·m] 0.54 to 0.66

• Applicable wire range: Conductor diameter Ø0.5 to Ø1.2 mm, Stranded wire AWG24 to 16

#### **Electrical Wiring Specifications (IP67 compatible)**

0

If alignment is not specified, the internal wiring will be double wiring (connected to SOL. a and SOL. b) regardless of number of stations, valve types, and option types.

\* When using a valve with no polarity, either positive common or negative common can be used.

Standard wiring				
Terminal no. Polarity

	<u> </u>	COM.	(+)	(-)
			Positive	Negative

#### **Specified Layout**

A mixture of single and double wiring can be specified on the manifold specification sheet. The maximum number of stations is determined according to the number of solenoids. The total number of solenoids should be 32 or less. 1 solenoid is required for the 2-position single, and 2 solenoids for the 2-position double, 3-position, and 4-position.

## Plug-in Connector Connecting Base

**Terminal Block Box** 

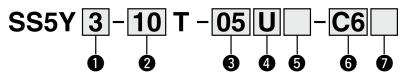

## SY3000/5000/7000 Series

CE CH CHSUS ROHS

#### How to Order Manifolds

Refer to pages 160 (SY5000) and 161 (SY7000) for the dimensions of Type 11/Bottom-ported type.

#### Series

3	SY3000
5	SY5000
7	SY7000

**1** Type

<u> </u>			
10	Side ported		
11	Bottom ported*1		

\*1 The SY5000 manifold base is used for the bottom-ported SY3000. When ordering, refer to the "Plug-in Mixed Mounting Type Manifold" (from page 165).

#### 3 Valve stations

Symbol	Stations	Note	
02	2 stations		
:	- :	Double wiring*1	
10	10 stations		
02	2 stations	0	
:	:	Specified layout*2	
20	20 stations	(Up to 20 solenoids available)	

- \*1 Double wiring: 2-position single, double, 3-position, and 4-position valves can be used on all manifold stations Use of a 2-position single solenoid will result in an unused control signal. If this is not desired, order with a specified layout.
- \*2 Specified layout: Indicate the wiring specifications with the manifold specification sheet. (Note that 2-position double, 3-position, and 4-position valves cannot be used where single wiring has been specified.)
- This also includes the number of the blanking plate assembly.

#### 4 P. E port entry

• : , = port ont. ,		
U	U side (2 to 10 stations)	
D	D side (2 to 10 stations)	
В	Both sides (2 to 20 stations)	

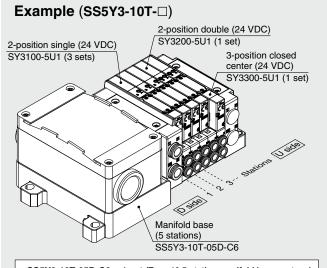

#### 5 SUP/EXH block assembly

Nil	Internal pilot	
S	Internal pilot, Built-in silencer	
R	External pilot	

- \* 3/5(E) port is plugged for the built-in silencer type.
- When the built-in silencer type is used, keep the exhaust port from coming into direct contact with water or other liquids.

#### Refer to the page on the right for 6.

#### How to Order Manifold Assembly

SS5Y3-10T-05D-C6 ··· 1 set (Type 10 5-station manifold base part no.) \*SY3100-5U1------ 3 sets (2-position single part no.) \*SY3200-5U1 ..... 1 set (2-position double part no.) \*SY3300-5U1------1 set (3-position closed center part no.) The asterisk denotes the symbol for the assembly. Prefix it to the part numbers of the valve, etc.

- For the valve arrangement, the valve closest to the D side is considered the 1st station.
- Under the manifold part number, state the valves to be mounted in order starting with the 1st station as shown in the figure above. If the arrangement becomes too complicated, specify the details on a manifold specification sheet.
- When mixing top-ported configurations, select from those listed on page 74. In such cases, use caution as there is also output on the A and B ports on the base side. Specify on the manifold specification sheet if plugs are required for the A and B ports on the base side.

#### Mounting and Option

Symbol	Mounting	Option		
		Name plate	Station number	
Nil	Direct mounting	_	_	
AA		•	•	
BA	mounting	•	_	
D□	DIM!!	_	_	
A□	DIN rail mounting	•	•	
B□	mounting	•	_	

- \* Enter the number of stations inside □ when it is larger than the number of valve stations. (Refer to "DIN Rail Option" below.)
- Only direct mounting is available for the type 11 bottom-ported type.
- Refer to page 295 for the fixation of DIN rail mounting type manifold.

#### **DIN Rail Option**

		-		
ſ	Nil	Standard length		
	0	Without DIN rail (with bracket)		
	3	For 3 stations	Consider a lawrent wail them the	
		:	Specify a longer rail than the total length of specified stations.	
	20	For 20 stations	total length of specified stations.

<sup>\*1</sup> Indicate the sizes on the manifold specification sheet in the case of "CM" or "LM." The direction of P, E port fittings is the same as for the A, B port. If selecting "LM," indicate it on the manifold specification sheet for the P, E port fitting

<sup>\*2</sup> To avoid interference with the body or piping, select a downward elbow port when mounting the optional spacer assembly (pages 204 to 206).

### How to Order Valves (With mounting screw)

Refer to page 15 for valve specifications.

### Series

3	SY3000
5	SY5000
7	SY7000

### 2 Type of actuation

• Type of dotadion			
1	2-position	Single	
2	2-position	Double	
3		Closed center	
4	3-position	Exhaust center	
5		Pressure center	
<b>A</b> *1	4	N.C./N.C.	
<b>B</b> *1	4-position dual 3-port	N.O./N.O.	
C*1	duai 5-port	N.C./N.O.	

\*1 Only the rubber seal type is available for the 4-position dual 3-port valve.

### 3 Seal type

0	Rubber seal
1	Metal seal

### 4 Pilot type

	71
Nil	Internal pilot
R	External pilot

# Back pressure check valve (Built-in valve type)

Nil	None
Н	Built-in

- \* Only the rubber seal type is available. A manifold installed type is available if a back pressure check valve with a metal seal is required. Refer to page 212 for ordering examples. However, it is not recommended to use the built-in valve type and the manifold installed type at the same time because it will reduce the flow.
- \* The built-in valve type back pressure check valve is not available for the 3-position type or the SY7000.

### 6 Pilot valve option

Nil Standard (0.7 MPa)	
В	Quick response type (0.7 MPa)
<b>K</b> *1	High pressure type (1.0 MPa)

\*1 Only the metal seal type is available for the high pressure type.

### Coil type

Con type		
Nil	Standard	
Т	With power saving circuit (Continuous duty type)	

- Be sure to select the power saving circuit type if the valve is to be continuously energized for long periods of time.
- \* Be careful of the energizing time when the power saving circuit is selected. Refer to page 292 for details.

### 8 Rated voltage

5	24 VDC
6	12 VDC

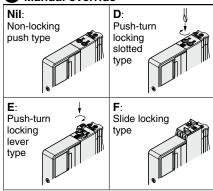

# 9 Light/surge voltage suppressor and common specification

Symbol	With light	Surge voltage suppressor	Common specification	
Nil	_	_		
R	_		Non-polar	
U	•			
S	_		Positive	
Z	•	_	common	
NS	_		Negative	
NZ	•		common	

- For the non-polar type, be careful of surge voltage intrusion.
- Refer to page 293 for details.

  \* Only "Z" and "NZ" types are available with a power saving circuit.

### Manual override

 Refer to page 34 for the safety slide locking manual override.

### Type of mounting screw

Nil	Round head combination screw
В	Hexagon socket head cap screw
K	Round head combination screw (Falling-out-prevention type)
Н	Hexagon socket head cap screw (Falling-out-prevention type)

- For "K" and "H," the valve body cover has a drop prevention construction to stop the mounting screws from falling out when the valve is removed for maintenance, etc.

   When ordering a valve individually, the
- When ordering a valve individually, the base gasket is not included.
  Since the base gasket is attached to the manifold, please order the base gasket separately if it is needed for maintenance.
  Refer to page 198 for base gasket and mounting screw part numbers.
- \* "B" and "H" cannot be selected for the individual SUP/EXH spacer assembly, interface regulator, or double check spacer assembly with residual pressure release valve.

### How to Order Manifolds

Refer to pages 162 to 164 for the dimensions of Type 12/Top-ported type.

### Series

3	SY3000
5	SY5000
7	SY7000

### P. E port entry

<b>U</b> *1	U side (2 to 10 stations)
<b>D</b> *1	D side (2 to 10 stations)
В	Both sides (2 to 20 stations)

\*1 4 For type "S", SUP/EXH block assembly with a built-in silencer, choose U or D for P,

### Valve stations

Symbol	Stations	Note
02	2 stations	
:	:	Double wiring*1
10	10 stations	
02	2 stations	0
:	:	Specified layout*2 (Up to 20 solenoids available)
20	20 stations	(Op to 20 solellolds available)

- \*1 Double wiring: 2-position single, double, 3-position, and 4-position valves can be used on all manifold stations. Use of a 2-position single solenoid will result in an unused control signal. If this is not desired, order with a specified layout.
- \*2 Specified layout: Indicate the wiring specifications on the manifold specification sheet. (Note that 2-position double, 3-position, and 4-position valves cannot be used where single wiring has been specified.)
- This also includes the number of the blanking plate assembly.

### 4 SUP/EXH block assembly

Nil	Internal pilot
S	Internal pilot, Built-in silencer
R	External pilot

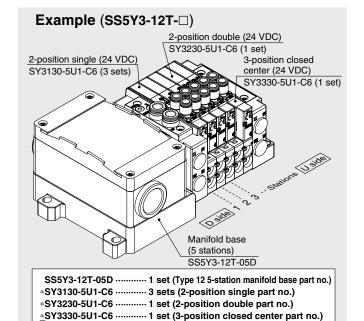

- \* The P and E ports are only available on the U and D sides for the built-in silencer type. 3/5(E) port is plugged. The silencer exhaust port is located on the opposite side of the P and E port entry. (Example: When the P and E port entry is on the D side, the silencer exhaust port is on the U side.)
- When the built-in silencer type is used, keep the exhaust port from coming into direct contact with water or other liquids.

### P, E port size (One-touch fittings)

Symbol	SY3000	SY5000	SY7000
Nil	ø8	ø10	ø12
N	ø5/16"	ø3/8"	ø1/2"

For N, sizes are in inches.

### **How to Order Manifold Assembly**

• For the valve arrangement, the valve closest to the D side is considered the 1st station. • Under the manifold part number, state the valves to be mounted in

The asterisk denotes the symbol for the assembly. Prefix it to the part numbers of the valve, etc.

order starting with the 1st station as shown in the figure above. If the arrangement becomes too complicated, specify the details on a manifold specification sheet.

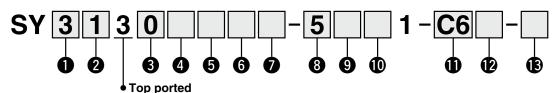

### 6 Mounting

Nil		Direct mounting						
D		DIN rail mounting						
D		(With DIN rail)						
DO		DIN rail mounting						
D0		(Without DIN rail)						
D3	For 3 stations	Specify a length longer						
:	:	than that of the standard						
D20	For 20 stations	rail.						

Refer to page 295 for the fixation of DIN rail mounting type manifold.

### How to Order Valves (With mounting screw)

Refer to page 15 for valve specifications.

### Series

3	SY3000
5	SY5000

### B Type of mounting screw

Nil	Round head combination screw
B Hexagon socket head cap sc	
K	Round head combination screw (Drop prevention type)
Н	Hexagon socket head cap screw (Drop prevention type)

- \* For "K" and "H," the valve body cover has a drop prevention construction to stop the mounting screws from falling out when the valve is removed for maintenance, etc.
- When ordering a valve individually, the base gasket is not included. Since the base gasket is attached to the manifold, please order the base gasket separately if it is needed for maintenance. Refer to page 198 for base gasket and mounting screw part numbers.
- "B" and "H" cannot be selected for the individual SUP/EXH spacer assembly or interface regulator.

### **Terminal Block Connection**

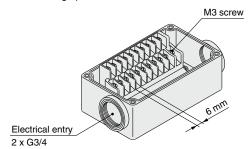

### Step 1. Remove the terminal block cover

Loosen the 4 mounting screws (M4) to remove the terminal block cover.

# Step 2. The diagram below shows the terminal block wiring. All stations are provided with double wiring regardless of the mounted valves.

Connect each wire to the power supply side, according to the markings provided inside the terminal block.

### Step 3. Mount the terminal block cover

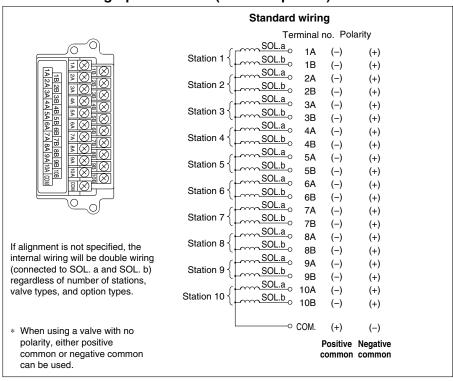

Securely tighten the screws to the torque shown in the table below only after confirming that the gasket is installed correctly.

Proper tightening torque [N·m]

0.7 to 1.2

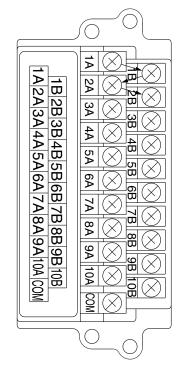

- Applicable crimped terminal: 1.25-3S, 1.25Y-3, 1.25Y-3N, 1.25Y-3.5
- Name plate: VVQ5000-N-T
- Drip-proof plug assembly (for G3/4): AXT100-B06A

### **Electrical Wiring Specifications (IP67 compatible)**

### **Specified Layout**

A mixture of single and double wiring can be specified on the manifold specification sheet. The maximum number of stations is determined according to the number of solenoids. The total number of solenoids should be 20 or less. 1 solenoid is required for the 2-position single, and 2 solenoids for the 2-position double, 3-position, and 4-position.

08	8 stations	available)					

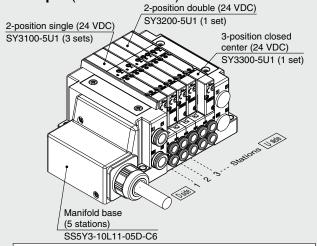

### (L2□)

<u> </u>							
Symbol	Stations	Note					
02	2 stations						
	:	Double wiring*1					
08	8 stations						
02	2 stations	Specified layout*2					
:	:	(Up to 16 solenoids					
16	16 stations	available)					

- \*1 Double wiring: 2-position single, double, 3-position, and 4-position valves can be used on all manifold stations Use of a 2-position single solenoid will result in an unused control signal. If this is not desired, order with a specified layout.
- \*2 Specified layout: Indicate the wiring specifications on the manifold specification sheet. (Note that 2-position double, 3-position, and 4-position valves cannot be used where single wiring has been specified.)
- \* This also includes the number of the blanking plate assembly.

### **Example** (SS5Y3-10L11-□)

How to Order Manifold Assembly

SS313-10L11-05D-C6
SS5Y3-10L11-05D-C6 ··· 1 set (Type 10 5-station manifold base part no.) *SY3100-5U1 ············ 3 sets (2-position single part no.)
*SY3200-5U1
The asterisk denotes the symbol for the assembly.  Prefix it to the part numbers of the valve, etc.
Trenx it to the part numbers of the valve, etc.

- For the valve arrangement, the valve closest to the D side is considered the 1st station.
- Under the manifold part number, state the valves to be mounted in order starting with the 1st station as shown in the figure above. If the arrangement becomes too complicated, specify the details on a manifold specification sheet.
- When mixing top-ported configurations, select from those listed on page 84. In such cases, use caution as there is also output on the A and B ports on the base side. Specify on the manifold specification sheet if plugs are required for the A and B ports on

### 6 P, E port entry

	1
U	U side (2 to 10 stations)
D	D side (2 to 10 stations)
В	Both sides (2 to 24 stations)

### SUP/EXH block assembly

Nil	Internal pilot
S	Internal pilot, Built-in silencer
R	External pilot

- \* 3/5(E) port is plugged for the built-in silencer type.
- When the built-in silencer type is used, keep the exhaust port from coming into direct contact with water or other liquids.

Nil	Standard length												
0	Without DIN rail (with bracket)												
3	For 3 stations Specify a longer rail than the												
i	:	total length of specified											
24	For 24 stations stations.												

- \* Enter the number of stations inside □ when it is larger than the number of valve stations. (Refer to "DIN Rail Option" above.)
  \* Only direct mounting is available for the type 11 bottom-ported type.
  \* Refer to page 295 for the fixation of DIN rail mounting type manifold.

### How to Order Valves (With mounting screw)

Refer to page 15 for valve specifications.

### Series

3	SY3000
5	SY5000
7	SY7000

Type of actuation

O maniting	Single							
2-position	Double							
	Closed center							
3-position	Exhaust center							
	Pressure center							
4 manikina	N.C./N.C.							
	N.O./N.O.							
duai 5-port	N.C./N.O.							
	2-position 3-position 4-position dual 3-port							

\*1 Only the rubber seal type is available for the 4-position dual 3-port valve.

### 3 Seal type

0	Rubber seal
1	Metal seal

4 Pilot type

Nil	Internal pilot
R	External pilot

# Back pressure check valve (Built-in valve type)

Nil	None
Н	Built-in

- \* Only the rubber seal type is available. A manifold installed type is available if a back pressure check valve with a metal seal is required. Refer to page 212 for ordering examples. However, it is not recommended to use the built-in valve type and the manifold installed type at the same time because it will reduce the flow.
- \* The built-in valve type back pressure check valve is not available for the 3-position type or the SY7000.

### 6 Pilot valve option

Nil Standard (0.7 MPa)								
В	Quick response type (0.7 MPa)							
<b>K</b> *1	High pressure type (1.0 MPa)							

\*1 Only the metal seal type is available for the high pressure type.

Coil type

Nil	Standard
Т	With power saving circuit (Continuous duty type)

- Be sure to select the power saving circuit type if the valve is to be continuously energized for long periods of time.
- Be careful of the energizing time when the power saving circuit is selected. Refer to page 292 for details.

### 8 Rated voltage

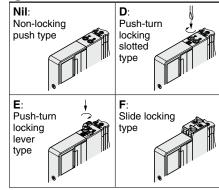

5	24 VDC
6	12 VDC

 Light/surge voltage suppressor and common specification

Symbol	With light	With light Surge voltage suppressor				
Nil	_	_				
R	_		Non-polar			
U	•					
S	_		Positive common			
Z	•	•				
NS	_		Negative			
NZ	•		common			

- For the non-polar type, be careful of surge voltage intrusion.
   Refer to page 293 for details.
- Only "Z" and "NZ" types are available with a power saving circuit.

### Manual override

 Refer to page 34 for the safety slide locking manual override.

### Type of mounting screw

<u> </u>	
Nil	Round head combination screw
В	Hexagon socket head cap screw
K	Round head combination screw (Drop prevention type)
Н	Hexagon socket head cap screw (Drop prevention type)

- For "K" and "H," the valve body cover has a drop prevention construction to stop the mounting screws from falling out when the valve is removed for maintenance, etc.
   When ordering a valve individually, the
- when ordering a vaive individually, the base gasket is not included.
  Since the base gasket is attached to the manifold, please order the base gasket separately if it is needed for maintenance.
  Refer to page 198 for base gasket and mounting screw part numbers.
- mounting screw part numbers.

  "B" and "H" cannot be selected for the individual SUP/EXH spacer assembly, interface regulator, or double check spacer assembly with residual pressure release valve.

1	:	Double wiring*1
08	8 stations	
02	2 stations	Specified layout*2
1	:	(Up to 16 solenoids
16	16 stations	available)

- \*1 Double wiring: 2-position single, double, 3-position, and 4-position valves can be used on all manifold stations. Use of a 2-position single solenoid will result in an unused control signal. If this is not desired, order with a specified layout.
- \*2 Specified layout: Indicate the wiring specifications on the manifold specification sheet. (Note that 2-position double, 3-position, and 4-position valves cannot be used where single wiring has been
- \* This also includes the number of the blanking plate assembly.

### 6 SUP/EXH block assembly

Nil	Internal pilot
S	Internal pilot, Built-in silencer
R	External pilot

- The P and E ports are only available on the U and D sides for the built-in silencer type. 3/5(E) port is plugged. The silencer exhaust port is located on the opposite side of the P and E port entry. (Example: When the P and E port entry is on the D side, the silencer exhaust port is on the U side.)
- When the built-in silencer type is used, keep the exhaust port from coming into direct contact with water or other liquids.

### P, E port size (One-touch fittings)

Symbol	SY3000	SY5000	SY7000
Nil	ø8	ø10	ø12

### **Electrical characteristics**

Item	Property
Conductor resistance Ω/km, 20°C	143 or less
Voltage limit V, 1 minute, AC	2000
Insulation resistance MΩ/km, 20°C	10 or more

 Cannot be used for movable wiring The minimum bending radius of the cable is 55 mm.

## Specified Layout

 For negative common specification, a valve for negative common or a valve without polarity should be used.

A mixture of single and double wiring can be specified on the manifold specification. The maximum number of stations is determined according to the number of solenoids. The total number of solenoids should be 32 or less. 1 solenoid is required for the 2-position single, and 2 solenoids for the 2-position double, 3-position, and 4-position.

### How to Order Manifolds

Refer to pages 160 (SY5000) and 161 (SY7000) for the dimensions of Type 11/Bottom-ported type.

### Series

3	SY3000				
5	SY5000				
7	SY7000				

### **1** Type

וני 🔾	JC
10	Side ported
11	Bottom ported*1

\*1 The SY5000 manifold base is used for the bottom-ported SY3000. When ordering, refer to the "Plug-in Mixed Mounting Type Manifold" (from page

### **3** Valve stations

Symbol	Stations	Note
02	2 stations	
•	:	Double wiring*1
12	12 stations	-
02	2 stations	Considered lawaretes?
1	:	Specified layout*2 (Up to 24 solenoids available)
24	24 stations	(Op to 24 soleriolds available)

- \*1 Double wiring: 2-position single, double, 3-position, and 4-position valves can be used on all manifold stations. Use of a 2-position single solenoid will result in an unused control signal. If this is not desired, order with a specified layout.
- \*2 Specified layout: Indicate the wiring specifications on the manifold specification sheet. (Note that 2-position double, 3-position, and 4-position valves cannot be used where single wiring has been specified.)
- This also includes the number of the blanking plate assembly.

### P, E port entry

U	U side (2 to 10 stations)
D	D side (2 to 10 stations)
В	Both sides (2 to 24 stations)

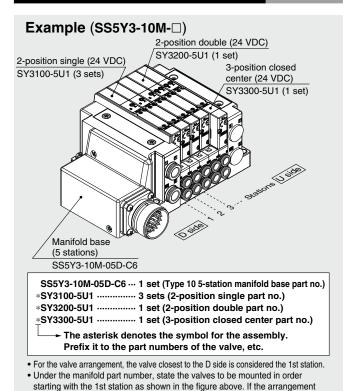

### 5 SUP/EXH block assembly

Nil	Internal pilot
S	Internal pilot, Built-in silencer
R	External pilot

- 3/5(E) port is plugged for the built-in silencer
- When the built-in silencer type is used, keep the exhaust port from coming into direct contact with water or other liquids.

Refer to the page on the right for 6.

### **How to Order Manifold Assembly**

When mixing top-ported configurations, select from those listed on page 94. In such cases, use caution as there is also output on the A and B ports on the base side. Specify on the manifold specification sheet if plugs are required for the A and B ports on

becomes too complicated, specify the details on a manifold specification sheet.

### Mounting and Option

9 1110	arrenig ar	a Option		
Curahal	Mounting	Option

Specific Product Precaution

# Plug-in Connector Connecting Base

**Circular Connector** 

Type 12 Top Ported

# SY3000/5000/7000 Series

CE CR CRUS ROHS

### How to Order Manifolds

Refer to pages 162 to 164 for the dimensions of Type 12/Top-ported type.

### Series

3	SY3000
5	SY5000
7	SY7000

### Valve stations

Symbol	Stations	Note
02	2 stations	
:	:	Double wiring*1
12	12 stations	
02	2 stations	0
:	:	Specified layout*2 (Up to 24 solenoids available)
24	24 stations	(Op to 24 solerious available)

- \*1 Double wiring: 2-position single, double, 3-position, and 4-position valves can be used on all manifold stations. Use of a 2-position single solenoid will result in an unused control signal. If this is not desired, order with a specified layout.
- \*2 Specified layout: Indicate the wiring specifications on the manifold specification sheet. (Note that 2-position double, 3-position, and 4-position valves cannot be used where single wiring has been specified.)
- This also includes the number of the blanking plate assembly.

### P. E port entry

	1
<b>U</b> *1	U side (2 to 10 stations)
<b>D</b> *1	D side (2 to 10 stations)
В	Both sides (2 to 24 stations)

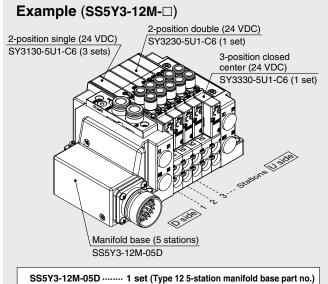

\*1 4 For type "S", SUP/EXH block assembly with a built-in silencer, choose U or D for P, E port entry.

### 4 SUP/EXH block assembly

Nil	Internal pilot
S	Internal pilot, Built-in silencer
R	External pilot

- The P and E ports are only available on the U and D sides for the built-in silencer type. 3/5(E) port is plugged. The silencer exhaust port is located on the opposite side of the P and E port entry. (Example: When the P and E port entry is on the D side, the silencer exhaust port is on the U side.)
- When the built-in silencer type is used, keep the exhaust port from coming into direct contact with water or other liquids.

### **How to Order Manifold Assembly**

\*SY3130-5U1-C6 ....... 3 sets (2-position single part no.) \*SY3230-5U1-C6 ....... 1 set (2-position double part no.)

\*SY3330-5U1-C6 ...... 1 set (3-position closed center part no.)

The asterisk denotes the symbol for the assembly. Prefix it to the part numbers of the valve, etc.

- For the valve arrangement, the valve closest to the D side is considered the 1st station.
- Under the manifold part number, state the valves to be mounted in order starting with the 1st station as shown in the figure above. If the arrangement becomes too complicated, specify the details on a manifold specification sheet.

### **5** P. E port size (One-touch fittings)

Symbol	SY3000	SY5000	SY7000	
Nil	ø8	ø10	ø12	
N	ø5/16"	ø3/8"	ø1/2"	

\* For N, sizes are in inches.

### 6 Mounting

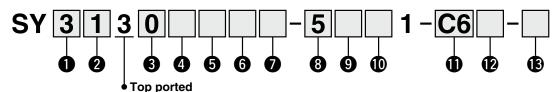

Nil		Direct mounting
D		IN rail mounting (With DIN rail)
D0		IN rail mounting Vithout DIN rail)
D3	For 3 stations	Specify a length longer
:	:	than that of the standard
D24	For 24 stations	rail.

\* Refer to page 295 for the fixation of DIN rail mounting type manifold.

### How to Order Valves (With mounting screw)

Refer to page 15 for valve specifications.

### Series

3	SY3000
5	SY5000
7	SY7000

2 Type of actuation

1	0	Single					
2	2-position	Double					
3		Closed center					
4	3-position	Exhaust center					
5		Pressure center					
<b>A</b> *1	4	N.C./N.C.					
<b>B</b> *1	4-position dual 3-port	N.O./N.O.					
C*1	duai 3-port	N.C./N.O.					

\*1 Only the rubber seal is available for the 4-position dual 3-port valve.

### 3 Seal type

0	Rubber seal
1	Metal seal

A Pilot type

• I not type		
	Nil	Internal pilot
	R	External pilot

# Back pressure check valve (Built-in valve type)

Nil None	
Н	Built-in

- \* Only the rubber seal type is available. A manifold installed type is available if a back pressure check valve with a metal seal is required. Refer to page 212 for ordering examples. However, it is not recommended to use the built-in valve type and the manifold installed type at the same time because it will reduce the flow.
- \* The built-in valve type back pressure check valve is not available for the 3-position type or the SY7000.

### 6 Pilot valve option

Nil	Standard (0.7 MPa)
В	Quick response type (0.7 MPa)
<b>K</b> *1	High pressure type (1.0 MPa)

\*1 Only the metal seal type is available for the high pressure type.

### 7 Coil type

Con type	
Nil	Standard
Т	With power saving circuit (Continuous duty type)

- \* Be sure to select the power saving circuit type if the valve is to be continuously energized for long periods of time.
- \* Be careful of the energizing time when the power saving circuit is selected. Refer to page 292 for details.

### 8 Rated voltage

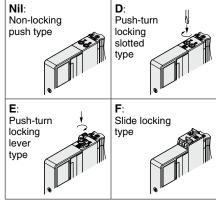

5	24 VDC
6	12 VDC

# 9 Light/surge voltage suppressor and common specification

Symbol	With light	Surge voltage suppressor	Common specification
Nil	_	_	
R	_		Non-polar
U	•	•	
S	_		Positive
Z	•	_	common
NS	_		Negative
NZ	•		common

- For the non-polar type, be careful of surge voltage intrusion.
   Refer to page 293 for details.
- Only "Z" and "NZ" types are available with a power saving circuit.

### Manual override

\* Refer to page 34 for the safety slide locking

### 1 A, B port size

### Thread piping

	~~ p.p9	
Symbol	Port size	Applicable series
M5	M5 x 0.8	SY3000
01	1/8	SY5000
02	1/4	SY7000

N3	ø5/32"	•	•	_
N7	ø1/4"	•	•	•
N9	ø5/16"	_	•	•
N11	ø3/8"	_	_	•

### 12 Thread type

• · · · · · · · · · · · · · · · · · · ·		
	Nil	Rc
	F	G
	N	NPT
	Т	NPTF

\* Only Nil is available for M5.

### Type of mounting screw

Nil Round head combination screv	
В	Hexagon socket head cap screw
K	Round head combination screw (Falling-out-prevention type)
Н	Hexagon socket head cap screw (Falling-out-prevention type)

- \* For "K" and "H," the valve body cover has a drop prevention construction to stop the mounting screws from falling out when the valve is removed for maintenance, etc.
- When ordering a valve individually, the base gasket is not included.
  Since the base gasket is attached to the manifold, please order the base gasket separately if it is needed for maintenance.
  Refer to page 198 for base gasket and mounting screw part numbers.
- \* "B" and "H" cannot be selected for the individual SUP/EXH spacer assembly or interface regulator.

Protective class class II (Mark: (1))

Manifold Options

### **Electrical Wiring Specifications**

If alignment is not specified, the internal wiring will be double wiring (connected to SOL. a and SOL. b) regardless of number of stations, valve types, and option types.

\* When using a valve with no polarity, either positive common or

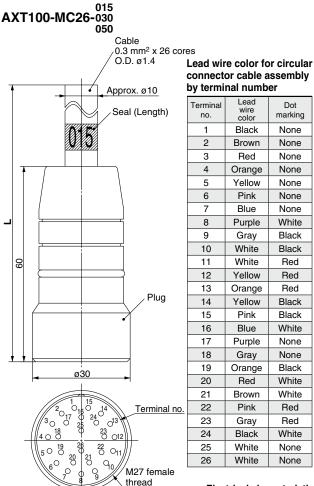

negative common can be used.

### **Specified Layout**

common common

A mixture of single and double wiring can be specified on the manifold specification sheet. The maximum number of stations is determined according to the number of solenoids. The total number of solenoids should be 24 or less. 1 solenoid is required for the 2-position single, and 2 solenoids for the 2-position double, 3-position, and 4-position.

### Cable Assembly

### Circular connector cable assembly

On Calar Com	nootor ouble decembly
Cable	Assembly part no.
length (L)	26 pins
1.5 m	AXT100-MC26-015
3 m	AXT100-MC26-030
5 m	AXT100-MC26-050

- \* Cannot be used for movable wiring
- Lengths other than the above is also available. Please contact SMC for details.

### **Electrical characteristics**

Item	Property
Conductor resistance Ω/km, 20°C	65 or less
Voltage limit V, 1 minute, AC	1000
Insulation resistance MΩ/km, 20°C	5 or more

\* The minimum bending radius of the circular connector cable is 20

Specific Product Precautions

Гуре 10 Side Ported Type 11 **Bottom Ported** 

# Plug-in Connector Connecting Base

**EX500 Gateway Decentralized System 2 (128 Points)** 

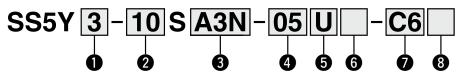

# SY3000/5000/7000 Series

CE CH CRUS ROHS

### How to Order Manifolds

Refer to pages 160 (SY5000) and 161 (SY7000) for the dimensions of Type 11/Bottom-ported type.

### Series

3	SY3000
5	SY5000
7	SY7000

*	For mixed	mounting,	refer to	page	165	and
	later.	•				

10	Side ported
11	Bottom ported*1

- \*1 The SY5000 manifold base is used for the bottom-ported SY3000. When ordering, refer to the "Plug-in Mixed Mounting Type Manifold" (from page 165).
- \* When mixing top-ported configurations, select from those listed on page 110. In such cases, use caution as there is also output on the A and B ports on the base side. Specify on the manifold specification sheet if plugs are required for the A and B ports on the base side.

### SI unit (Number of outputs, Output polarity, May number of valve stations)

maxi number of vario statione,						
0	Without SI unit					
A3N	32 outputs*1*4, 2 to 16 stations (24 stations*3), Negative common*2					

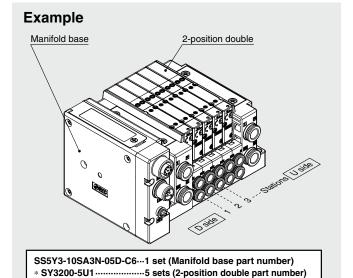

- \*1 16 outputs can be set by switching the built-in setting switch.
- Ensure a match with the common specification of the valve.
- ( ): Maximum number of stations for mixed single and double wiring
- \*4 When using the SI unit with 32 outputs, use the GW unit compatible with the EX500 Gateway Decentralized System 2 (128 points).

### 4 Valve stations

		Stations	Note				
	02	2 stations					
Ī	:	:	Double wiring*1				
ĺ	16	16 stations					
	02	2 stations	Connection delegants				
	:	:	Specified layout*2 (Up to 32 solenoids available)				
	24	24 stations	(Up to 32 solenoids available)				

- \*1 Double wiring: 2-position single, double, 3-position, and 4-position valves can be used on all manifold stations. Use of a 2-position single solenoid will result in an unused control signal. If this is not desired, order with a specified layout.
- \*2 Specified layout: Indicate the wiring specifications on the manifold specification sheet. (Note that 2-position double, 3-position, and 4-position valves cannot be used where single wiring has been specified.)
- \* When the product without the SI unit (S0) is selected, note the maximum number of solenoids of the SI unit that will be mounted. If the layout is specified, indicate it on the manifold specification sheet.
- This also includes the number of the blanking plate assembly.

### **How to Order Manifold Assembly**

For the valve arrangement, the valve closest to the D side is considered

The asterisk denotes the symbol for the assembly. Prefix it to the part numbers of the valve, etc.

• Under the manifold base part number, state the valves to be mounted in order starting with the 1st station as shown in the figure above. If the arrangement becomes too complicated, specify the details on a manifold specification sheet.

### P. E port entry

U	U side (2 to 10 stations)
D	D side (2 to 10 stations)
В	Both sides (2 to 24 stations)

### 6 SUP/EXH block assembly

Nil	Internal pilot
S	Internal pilot, Built-in silencer*1*2
R	External pilot

- \*1 3/5(E) port is plugged for the built-in silencer type.
- \*2 When built-in silencer type is used, keep the exhaust port from coming into direct contact with water or other liquids.
- A separate GW unit and communication cable are required.

For details on the EX500 Gateway Type Serial Transmission System, refer to the Web Catalog and the Operation Manual. For the part numbers of the SI units to be mounted, refer to page 188. Please download the Operation Manual via the SMC website, https://www.smcworld.com

- \*1 Indicate the sizes on the manifold specification sheet.
- \*2 To avoid interference with the body or piping, select a downward elbow port when mounting the optional spacer assembly (pages 204 to 206).
- \*3 The direction of P, E port fittings is the same as for the A, B port. If selecting "LM," indicate it on the manifold specification sheet for the P, E port fitting direction.

8 Mounting and Option

	Mounting	Option		
	Woulding	Name plate	Station number	
Nil	Diament.	_	_	
AA	Direct mounting	•	•	
BA	mounting	•	_	
<b>D</b> □*1	DIN "	_	_	
<b>A</b> □*1	DIN rail mounting	•	•	
<b>B</b> □*1	mounting	•	_	

- \*1 Refer to "DIN Rail Option" below.
- \* Select the direct mounting type for Type 11 (Bottom ported).

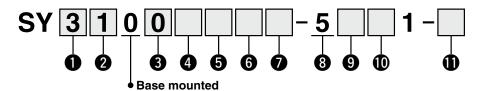

### **DIN Rail Option**

Nil	With DIN bracket, DIN rail with standard length
0	With DIN bracket, without DIN rail
<b>3</b> *1	With DIN bracket, DIN rail for 3 stations
i :	i i
24*1	With DIN bracket, DIN rail for 24 stations

- \*1 Specify a longer rail than the length of valve stations.
- If the DIN rail must be mounted without an SI unit, select "D0" and order the DIN rail separately. Refer to L3 of the dimensions for the DIN rail length. Refer to page 203 for the DIN rail part number.
- \* Refer to page 295 for the fixation of DIN rail mounting type manifold.

### How to Order Valves (With mounting screw)

Refer to page 15 for valve specifications.

Standard (0.7 MPa)

Quick response type (0.7 MPa)

High pressure type (1.0 MPa)

### Series

3	SY3000
5	SY5000
7	SY7000

2 Type of actuation

<u> </u>							
1	0 iti	Single					
2	2-position	Double					
3		Closed center

pressure type.

**K**\*1

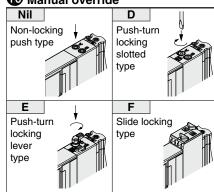

6 Pilot valve option

Coll type										
Nil	Standard									
Т	With power saving circuit (Continuous duty type)*1*2									

\*1 Be sure to select the power saving circuit type if the valve is to be continuously energized for long periods of time.

\*1 Select the metal seal type for the high

\*2 Be careful of the energizing time when the power saving circuit is selected. For details, refer to page 292. Manual override

Refer to page 34 for the safety slide locking manual override.

### 3 Seal type

0	Rubber seal
1	Metal seal

### 4 Pilot type

Nil	Internal pilot
R	External pilot

### 5 Back pressure check valve

Nil	None
H*1	Built-in

- \*1 Select the rubber seal type when the back pressure check valve is built-in. A manifold installed type is available if a back pressure check valve with a metal seal is required. Refer to page 212 for ordering examples. However, it is not recommended to use the built-in valve type and the manifold installed type at the same time because it will reduce the flow.
- Select "Nil" for the 3-position type or the SY7000.

### 8 Rated voltage

<u>U i iu</u>	tou voitage
5	24 VDC

# 9 Light/surge voltage suppressor and common specification

	With light	Surge voltage suppressor	Common specification		
R	_		Non nolar		
U	•		Non-polar		
NS	_	•	Negative		
NZ	•		common		

\* Select "NZ" for models with a power saving

### Type of mounting screw

<u> </u>	
Nil	Round head combination screw
В	Hexagon socket head cap screw
К	Round head combination screw (Drop prevention type)*1
н	Hexagon socket head cap screw (Drop prevention type)*1

- \*1 For "K" and "H," the valve body cover has a drop prevention construction to stop the mounting screws from falling out when the valve is removed for maintenance, etc.
- \* When ordering a valve individually, the base gasket is not included.
  Since the base gasket is attached to the manifold, please order the base gasket separately if it is needed for maintenance.
  Refer to page 198 for base gasket and
- mounting screw part numbers.

  \* Select "Nii" or "K" for the optional individual SUP/EXH spacer assembly, interface regulator, or double check spacer assembly with residual pressure release valve.

Manifold

Type 10 Side Ported Type 11 **Bottom Ported** 

# Plug-in Connector Connecting Base

EX500 Gateway Decentralized System (64 Points)

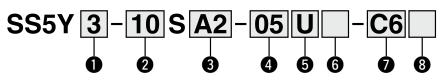

# SY3000/5000/7000 Series

CE CR CRUS ROHS

### How to Order Manifolds

Refer to pages 160 (SY5000) and 161 (SY7000) for the dimensions of Type 11/Bottom-ported type.

### Series

3	SY3000
5	SY5000
7	SY7000

\* For mixed mounting, refer to page 165 and

**1** Type

<u>• ') </u>	•
10	Side ported
11	Bottom ported*1

- \*1 The SY5000 manifold base is used for the bottom-ported SY3000. When ordering, refer to the "Plug-in Mixed Mounting Type Manifold" (from page 165).
- When mixing top-ported configurations, select from those listed on page 112. In such cases, use caution as there is also output on the A and B ports on the base side. Specify on the manifold specification sheet if plugs are required for the A and B ports on the base side.

### SI unit (Number of outputs, Output polarity, Max. number of valve stations)

0	Without SI unit
	16 outputs,
A2	Positive common*1,
	2 to 8 stations (16 stations)*2
	16 outputs,
A2N	Negative common*1,
	2 to 8 stations (16 stations)*2
A2N	

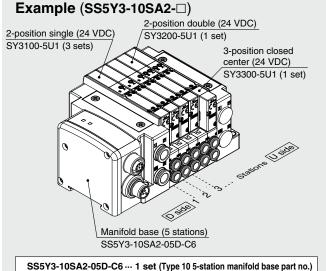

- \*1 Ensure a match with the common specification of the valve to be used.
- ( ): Maximum number of stations for mixed single and double wiring

### 4 Valve stations

	Stations	Note
02	2 stations	
:		Double wiring*1
08	8 stations	
02	2 stations	Considered lawayet*?
:	1 :	Specified layout*2 (Up to 16 solenoids available)
16	16 stations	(Op to 10 solerious available)

- \*1 Double wiring: 2-position single, double, 3-position, and 4-position valves can be used on all manifold stations. Use of a 2-position single solenoid will result in an unused control signal. If this is not desired, order with a specified layout.
- \*2 Specified layout: Indicate the wiring specifications on the manifold specification sheet. (Note that 2-position double, 3-position, and 4-position valves cannot be used where single wiring has been specified.)
- When the product without the SI unit (S0) is selected, note the maximum number of solenoids of the SI unit that will be mounted. If the layout is specified, indicate it on the manifold specification sheet.
- This also includes the number of the blanking plate assembly.

### **How to Order Manifold Assembly**

\*SY3100-5U1······ 3 sets (2-position single part no.) \*SY3200-5U1------ 1 set (2-position double part no.) \*SY3300-5U1------ 1 set (3-position closed center part no.)

The asterisk denotes the symbol for the assembly. Prefix it to the part numbers of the valve, etc.

- For the valve arrangement, the valve closest to the D side is considered the 1st station.
- Under the manifold part number, state the valves to be mounted in order starting with the 1st station as shown in the figure above. If the arrangement becomes too complicated, specify the details on a manifold specification sheet.

6 P. E port entry

	- portoriu y
U	U side (2 to 10 stations)
D	D side (2 to 10 stations)
В	Both sides (2 to 16 stations)

### 6 SUP/EXH block assembly

Nil	Internal pilot
S	Internal pilot, Built-in silencer
R	External pilot

- 3/5(E) port is plugged for the built-in silencer
- When the built-in silencer type is used, keep the exhaust port from coming into direct contact with water or other liquids.

A separate GW unit and communication cable are required.

For details on the EX500 Gateway Type Serial Transmission System, refer to the Web Catalog and the Operation Manual. For the part numbers of the SI units to be mounted, refer to page 189. Please download the Operation Manual via the SMC website, https://www.smcworld.com

- \*1 Indicate the sizes on the manifold specification sheet.
- \*2 To avoid interference with the body or piping, select a downward elbow port when mounting the optional spacer assembly (pages 204 to 206).
- \*3 The direction of P, E port fittings is the same as for the A, B port. If selecting "LM," indicate it on the manifold specification sheet for the P, E port fitting direction.

8 Mounting and Option

	Mounting	Option		
	Woulding	Name plate	Station number	
Nil	Diagram	_	_	
AA	Direct mounting	•	•	
BA	mounting	•	_	
<b>D</b> □*1	DIN "	_	_	
<b>A</b> □*1	DIN rail mounting	•	•	
<b>B</b> □*1		•	_	

- \*1 Refer to "DIN Rail Option" below.
- \* Select the direct mounting type for Type 11 (Bottom ported).

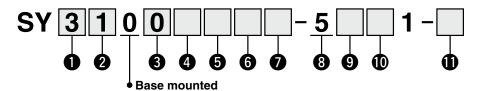

#### **DIN Rail Option**

Nil	With DIN bracket, DIN rail with standard length
0	With DIN bracket, without DIN rail
<b>3</b> *1	With DIN bracket, DIN rail for 3 stations
i :	i i
16* <sup>1</sup>	With DIN bracket, DIN rail for 16 stations

- \*1 Specify a longer rail than the length of valve stations.
- \* If the DIN rail must be mounted without an SI unit, select "D0" and order the DIN rail separately. Refer to L3 of the dimensions for the DIN rail length. Refer to page 203 for the DIN rail part number.
- \* Refer to page 295 for the fixation of DIN rail mounting type manifold.

## How to Order Valves (With mounting screw)

Refer to page 15 for valve specifications.

#### Series

3	SY3000
5	SY5000
7	SY7000

2 Type of actuation

Type of actuation				
1	O manitiam	Single		
2	2-position	Double		
3		Closed center		
4	3-position	Exhaust center		
5		Pressure center		
<b>A</b> *1	4	N.C./N.C.		
<b>B</b> *1	4-position dual 3-port	N.O./N.O.		
<b>C</b> *1		N.C./N.O.		

\*1 Only the rubber seal type is available for the 4-position dual 3-port valve.

3 Seal type

0	Rubber seal
1	Metal seal

Pilot type

	71
Nil	Internal pilot
R	External pilot

# Back pressure check valve (Built-in valve type)

Nil	None
Н	Built-in

- \* Only the rubber seal type is available. A manifold installed type is available if a back pressure check valve with a metal seal is required. Refer to page 212 for ordering examples. However, it is not recommended to use the built-in valve type and the manifold installed type at the same time because it will reduce the flow.
- \* The built-in valve type back pressure check valve is not available for the 3-position type or the SY7000.

## 6 Pilot valve option

Nil	Standard (0.7 MPa)
В	Quick response type (0.7 MPa)
<b>K</b> *1	High pressure type (1.0 MPa)

\*1 Only the metal seal type is available for the high pressure type.

Coil type

Con type		
Nil	Standard	
Т	With power saving circuit (Continuous duty type)	

- Be sure to select the power saving circuit type if the valve is to be continuously energized for long periods of time.
- Be careful of the energizing time when the power saving circuit is selected. Refer to page 292 for details.

8 Rated voltage

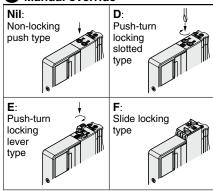

5	24 VDC

# 9 Light/surge voltage suppressor and common specification

Symbol	With light	Surge voltage suppressor	Common specification
R	_		Non-polar
U	•		Non-polai
S	_		Positive
Z	•	_	common
NS	_		Negative
NZ	•		common

\* Only "Z" and "NZ" are available with a power saving circuit. Select "R," "U," "S," or "Z" for the valve when the SI unit specification is A2 (positive common). Select "R," "U," "NS," or "NZ" for the valve when the SI unit specification is A2N (negative common).

## Manual override

 Refer to page 34 for the safety slide locking manual override.

## Type of mounting screw

Nil	Round head combination screw
В	Hexagon socket head cap screw
K	Round head combination screw (Drop prevention type)
Н	Hexagon socket head cap screw (Drop prevention type)

- \* For "K" and "H," the valve body cover has a drop prevention construction to stop the mounting screws from falling out when the valve is removed for maintenance, etc.
- When ordering a valve individually, the base gasket is not included. Since the base gasket is attached to the manifold, please order the base gasket separately if it is needed for maintenance. Refer to page 198 for base gasket and mounting screw part numbers.
- \* "B" and "H" cannot be selected for the individual SUP/EXH spacer assembly, interface regulator, or double check spacer assembly with residual pressure release valve.

## Plug-in Connector Connecting Base

EX500 Gateway Decentralized System 2 (128 Points)

# Type 12 Top Ported

# SY3000/5000/7000 Series

CE UK CHS ROHS

#### How to Order Manifolds

## Series

3	SY3000
5	SY5000
7	SY7000

For mixed mounting, refer to page 165 and

#### SI unit (Number of outputs, Output polarity, Max. number of valve stations)

0	Without SI unit						
	32 outputs*1*4, 2 to 16 stations (24 stations*3), Negative common*2						

- \*1 16 outputs can be set by switching the built-in setting switch.
- \*2 Ensure a match with the common specification of the valve.
- \*3 ( ): Maximum number of stations for mixed single and double wiring
- \*4 When using the SI unit with 32 outputs, use the GW unit compatible with the EX500 Gateway Decentralized System 2 (128 points).

## 3 Valve stations

	Stations	Note			
02	2 stations				
:	:	Double wiring*1			
16	16 stations				
02	2 stations	Connection describe?			
E	:	Specified layout*2 (Up to 32 solenoids available)			
24	24 stations	(Op to 32 solelloids available)			

- \*1 Double wiring: 2-position single, double, 3-position, and 4-position valves can be used on all manifold stations. Use of a 2-position single solenoid will result in an unused control signal. If this is not desired, order with a specified layout.
- \*2 Specified layout: Indicate the wiring specifications on the manifold specification sheet. (Note that 2-position double, 3-position, and 4-position valves cannot be used where single wiring has been specified.)
- When the product without the SI unit (S0) is selected, note the maximum number of solenoids of the SI unit that will be mounted. If the layout is specified, indicate it on the manifold specification sheet.
- This also includes the number of the blanking plate assembly.

## P. E port entry

<u> </u>	= port oriting
<b>U</b> *1	U side (2 to 10 stations)
<b>D</b> *1	D side (2 to 10 stations)
В	Both sides (2 to 24 stations)

\*1 For type "S", SUP/EXH block assembly with a built-in silencer, choose U or D for P, E port entry.

#### 5 SUP/EXH block assembly

Nil	Internal pilot
S*1	Internal pilot, Built-in silencer*2
R	External pilot

- \*1 For type "S", SUP/EXH block assembly with a built-in silencer, choose U or D for P, E port entry. 3/5(E) port is plugged. The silencer exhaust port is located on the opposite side of the P and E port entry. (Example: When the P and E port entry is on the D side, the silencer exhaust port is on the U side.)
- \*2 When the built-in silencer type is used, keep the exhaust port from coming into direct contact with water or other liquids.

## **How to Order Manifold Assembly**

# **Example** 2-position double Manifold base

SS5Y3-12SA3N-05D ......1 set (Manifold base part number) \* SY3230-5U1-C6 ......5 sets (2-position double part number)

The asterisk denotes the symbol for the assembly. Prefix it to the part numbers of the valve, etc.

• For the valve arrangement, the valve closest to the D side is considered the 1st station. Under the manifold base part number, state the valves to be mounted in order starting with the 1st station as shown in the figure above. If the arrangement becomes too complicated, specify the details on a manifold specification sheet.

## 6 P, E port size (One-touch fittings)

	SY3000	SY5000	SY7000	D
Nil	ø8	ø10	ø12	
<b>N</b> *1	ø5/16"	ø3/8"	ø1/2"	

\*1 For N, sizes are in inches.

## Mounting

Nil	Direct mounting
D	With DIN bracket, DIN rail with standard length
D0	With DIN bracket, without DIN rail
D3*1	With DIN bracket, DIN rail for 3 stations
:	:
D24*1	With DIN bracket, DIN rail for 24 stations

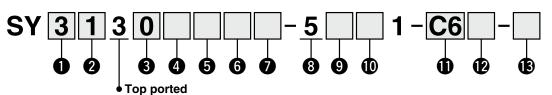

- \*1 Specify a longer rail than the length of valve stations.
- \* If the DIN rail must be mounted without an SI unit, select "D0." Then, refer to L3 of the dimensions for the DIN rail length and order separately. Refer to page 203 for the DIN rail part number.
- Refer to page 295 for the fixation of DIN rail mounting type manifold.
- \* A separate GW unit and communication cable are required.

For details on the EX500 Gateway Type Serial Transmission System, refer to the Web Catalog and the Operation Manual. For the part numbers of the SI units to be mounted, refer to page 188. Please download the Operation Manual via the SMC website, https://www.smcworld.com

## How to Order Valves (With mounting screw)

Refer to page 15 for valve specifications.

## D Series

3	SY3000
5	SY5000
7	SY7000

2 Type of actuation

1	2-position	Single		
2		Double		
3	3-position	Closed center		
4		Exhaust center		
5		Pressure center		
<b>A</b> *1	4 maniting dual	N.C./N.C.		
B*1 C*1	4-position dual 3-port valve	N.O./N.O.		
		N.C./N.O.		

\*1 Select the rubber seal type for the 4-position dual 3-port valve.

## 3 Seal type

0	Rubber seal	
1	Metal seal	

4 Pilot type

Nil	Internal pilot
R	External pilot

## 5 Back pressure check valve (Built-in valve type)

(20110 111 10110 1) (2)		
Nil	None	
H*1	Built-in	

- \*1 Select the rubber seal type when the back pressure check valve is built-in. A manifold installed type is available if a back pressure check valve with a metal seal is required. Refer to page 212 for ordering examples. However, it is not recommended to use the built-in valve type and the manifold installed type at the same time because it will reduce the flow.
- Select "Nil" for the 3-position type or the SY7000.

## 6 Pilot valve option

Nil	Nil Standard (0.7 MPa)		
B Quick response type (0.7 MPa)			
<b>K</b> *1	High pressure type (1.0 MPa)		

\*1 Select the metal seal type for the high pressure type.

#### Coil type

Con type		
Nil	Standard	
Т	With power saving circuit (Continuous duty type)*1*2	

- \*1 Be sure to select the power saving circuit type if the valve is to be continuously energized for long periods of time.
- \*2 Be careful of the energizing time when the power saving circuit is selected. Refer to page 292 for details.

## 8 Rated voltage

_	
5	24 VDC

9 Light/surge voltage suppressor and common specification

	With light	Surge voltage suppressor	Common specification
R U	<u> </u>	•	Non-polar
NS	_		Negative
NZ	•		common

\* Select "NZ" for models with a power saving circuit.

#### Manual override

Nil	D
Non-locking	Push-turn
push type	locking
	slotted
	type
_	_
<b>E</b>	F
E Push-turn	Slide locking
	-
Push-turn v	Slide locking
Push-turn locking lever	Slide locking
Push-turn locking lever	Slide locking
Push-turn locking lever	Slide locking

\* Refer to page 34 for the safety slide locking manual override.

**多SMC** 

## A, B port size

#### Thread piping

	Port size	SY3000	SY5000	SY7000

N3	ø5/32"	•	•	_
N7	ø1/4"	•	•	•
N9	ø5/16"	_	•	•
N11	ø3/8"	_	_	•

### 12 A. B port thread type

Nil	Rc
F	G
N	NPT
Т	NPTF

Select "Nil" for M5.

## 13 Type of mounting screw

Nil	Round head combination screw	
В	Hexagon socket head cap screw	
K	Round head combination screw (Drop prevention type*1)	
н	Hexagon socket head cap screw (Drop prevention type*1)	

\*1 For "K" and "H," the valve body cover has a drop prevention construction to stop the mounting screws from falling out when the valve is removed for maintenance, etc.

## \* When ordering a valve individually, the base gasket is not included.

Since the base gasket is attached to the manifold, please order the base gasket separately if it is needed for maintenance. Refer to page 198 for base gasket and mounting screw part numbers.

Select "Nil" or "K" for the optional individual SUP/EXH spacer assembly or interface regulator.

EtherCAT compatible products (3 Kit type/Symbol: D) are to be discontinued as of October 2022.

As a substitute, please consider the use of an EX260 series product (SI unit specification/Symbol: DA). However, keep in mind that the product specifications, external appearance, etc., differ. For details, please contact your SMC sales representative.

#### **How to Order Manifolds**

SS5Y3-10S6Q 2-05U-C6

Refer to pages 160 (SY5000) and 161 (SY7000) for the dimensions of Type 11/Bottom-ported type.

## Series

3	SY3000
5	SY5000
7	SY7000

## 2 Туре

10	Side ported
11	Bottom ported*1

\*1 The SY5000 manifold base is used for the bottom-ported SY3000. When ordering, refer to the "Plug-in Mixed Mounting Type Manifold" (from page 165).

## 3 SI unit

0	Without SI unit				
Q	DeviceNet® (Version A)				
N	PROFIBUS DP (Version A)				
V	CC-Link				
ZE	EtherNet/IP™ (1 port)				
EA	EtherNet/IP™ (2 ports)				
D	EtherCAT				
F	PROFINET				
FA	PROFINET (IO-Link unit)				
WE EtherNet/IP™ compatible wireless b					
WF	PROFINET compatible wireless base*1				
WS	Wireless remote*1				

- \*1 The wireless system is suitable for use only in a country where it is in accordance with the Radio Act and regulations of that country.
- \* I/O unit cannot be mounted without SI unit.
- Valve plate which connects manifold and SI unit is included, but it is not mounted to a valve without SI unit. For mounting, refer to the EX600 series in the Web Catalog.

## **5** I/O unit stations

Nil	None						
1	1 station						
	:						
9	9 stations						

- \* When not selecting an SI unit, the symbol will be "nil."
- \* SI unit is not included in I/O unit stations.
- \* When I/O unit is selected, it is shipped separately, and assembled by users. Refer to the attached operation manual for mounting.

## **6** Valve stations

Symbol	Stations	Note
02	2 stations	
:		Double wiring*1
16	16 stations	
02	2 stations	Considered lawayet*?
:	:	Specified layout*2 (Up to 32 solenoids available)
24	24 stations	(Op to 32 soleriolds available)

- \*1 Double wiring: 2-position single, double, 3-position, and 4-position valves can be used on all manifold stations. Use of a 2-position single solenoid will result in an unused control signal. If this is not desired, order with a specified layout.
- \*2 Specified layout: Indicate the wiring specifications on the manifold specification sheet. (Note that 2-position double, 3-position, and 4-position valves cannot be used where single wiring has been specified.)
- This also includes the number of the blanking plate assembly.

## Mounting and Option

Symbol	Mounting	Option			
Symbol	Woulding	Name plate	Station number		
Nil	D:	_	_		
AA	Direct mounting	•	•		
BA	inounting	•	_		
D□	DIN	_	_		
A□	DIN rail mounting	•	•		
В□	mounting	•	_		

- \* Enter the number of stations inside □ when it is larger than the number of valve stations. (Refer to "DIN Rail Option" below.)
- Only direct mounting is available for the type 11 bottom-ported type.
- Refer to page 295 for the fixation of DIN rail mounting type manifold.

#### **DIN Rail Option**

	Nil		Standard length						
	0	Without DIN rail (with bracket)							
	3	For 3 stations	Charles a langer rail than the						
	:	÷	Specify a longer rail than the						
:	24	For 24 stations	total length of specified stations.						

\* If the DIN rail must be mounted without an SI unit, select D0. Then, refer to L3 of the dimensions for the DIN rail length and order separately. (Refer to page 203 for the DIN rail part number.)

## 4 SI unit output polarity, end plate type

or arms suspens permitty, or a prime type									
	M12 power supply	7/8 inch	M12 power supply connector IN/OUT, A-coded						
SI unit output polarity	connector B-coded (EX600-ED2)	connector (EX600-ED3)	Pin arrangement 1 (EX600-ED4)	Pin arrangement 2 (EX600-ED5)					
Without SI unit	Nil								
SI unit positive common	2	3	6	8					
SI unit negative common	4	5	7	9					

- Ensure a match with the common specification of the valve to be used.
- \* When not selecting an SI unit, the symbol will be "nil."

## P, E port entry, SUP/EXH block assembly

P, E port entry	Internal pilot	Internal pilot, Built-in silencer	External pilot
U side (2 to 10 stations)	U	С	G
D side (2 to 10 stations)	D	E	Н
Both sides (2 to 24 stations)	В	F	J

- \* 3/5(E) port is plugged for the built-in silencer type.
- \* When the built-in silencer type is used, keep the exhaust port from coming into direct contact with water or other liquids.

#### Refer to the page on the right for 8.

For details on the EX600 Integrated Type (For Input/Output) Serial Transmission System, refer to the **Web Catalog** and the Operation Manual. For the part numbers of the SI units to be mounted, refer to page 191. (IP40 specifications may be required according to the I/O unit to be selected.) Please download the Operation Manual via the SMC website, https://www.smcworld.com

	P, E port size (One-touch fittings)			ø5/16"	ø3/8"	ø1/2"	ø3/8"	ø1/2"						

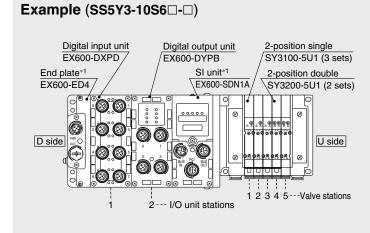

\*1 Indicate the sizes on the manifold specification sheet in the case of "CM" or "LM."

The direction of P, E port fittings is the same as for the A, B port. If selecting "LM," indicate it on the manifold specification sheet for the P, E port fitting direction.

SMC

\*2 To avoid interference with the body or piping, select a downward elbow port when mounting the optional spacer assembly (pages 204 to 206).

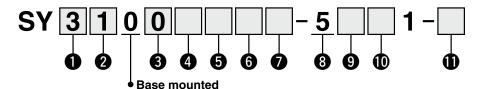

## **How to Order Manifold Assembly**

- - → The asterisk denotes the symbol for the assembly. Prefix it to the part numbers of the valve, etc.
- For the valve arrangement, the valve closest to the D side is considered the 1st station.
- Under the manifold part number, state the valves to be mounted, then the I/O units in order starting with the 1st station as shown in the figure above. If the arrangement becomes too complicated, specify the details on a manifold specification sheet.
- \*1 Do not enter the SI unit part number and the end plate part number together.
- When mixing top-ported configurations, select from those listed on page 124.
  - In such cases, use caution as there is also output on the A and B ports on the base side.
  - Specify on the manifold specification sheet if plugs are required for the A and B ports on the base side.

## How to Order Valves (With mounting screw)

Refer to page 15 for valve specifications.

## 1 Series

3	SY3000
5	SY5000
7	SY7000

2 Type of actuation

ועי	Je oi actuati	OII
1	2-position	Single
2	2-position	Double
3		Closed center
4	3-position	Exhaust center
5		Pressure center
<b>A</b> *1	4	N.C./N.C.
<b>B</b> *1	4-position dual 3-port	N.O./N.O.
C*1	dual 5-port	N.C./N.O.

\*1 Only the rubber seal type is available for the 4-position dual 3-port valve.

3 Seal type

0	Rubber seal
1	Metal seal

4 Pilot type

Nil	Internal pilot
R	External pilot

Back pressure check valve (Built-in valve type)

Nil	None
Н	Built-in

- \* Only the rubber seal type is available. A manifold installed type is available if a back pressure check valve with a metal seal is required. Refer to page 212 for ordering examples. However, it is not recommended to use the built-in valve type and the manifold installed type at the same time because it will reduce the flow.
- The built-in valve type back pressure check valve is not available for the 3-position type or the SY7000.

6 Pilot valve option

Nil	Standard (0.7 MPa)
В	Quick response type (0.7 MPa)
<b>K</b> *1	High pressure type (1.0 MPa)

\*1 Only the metal seal type is available for the high pressure type.

7 Coil type

_		
N	il	Standard
T	•	With power saving circuit (Continuous duty type)

- Be sure to select the power saving circuit type if the valve is to be continuously energized for long periods of time.
- \* Be careful of the energizing time when the power saving circuit is selected. Refer to page 292 for details.

8 Rated voltage

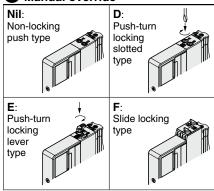

5 24 VDC

Light/surge voltage suppressor and common specification

Symbol	With light	Surge voltage suppressor	Common specification
R	_		Non-polar
U	•		Non-polai
S			Positive
Z	•	_	common
NS			Negative
NZ	•		common

- \* Select "R," "U," "S," or "Z" for the valve when the SI unit output polarity is positive common. Select "R," "U," "NS," or "NZ" for the valve when the SI unit output polarity is negative common.
- Only "Z" and "NZ" types are available with a power saving circuit.

Manual override

 Refer to page 34 for the safety slide locking manual override.

Type of mounting screw

<u> </u>	
Nil	Round head combination screw
В	Hexagon socket head cap screw
K	Round head combination screw (Drop prevention type)
Н	Hexagon socket head cap screw (Drop prevention type)

- \* For "K" and "H," the valve body cover has a drop prevention construction to stop the mounting screws from falling out when the valve is removed for maintenance, etc.
- \* When ordering a valve individually, the base gasket is not included. Since the base gasket is attached to the manifold, please order the base gasket separately if it is needed for maintenance. Refer to page 198 for base gasket and mounting screw part numbers.
- \* "B" and "H" cannot be selected for the individual SUP/EXH spacer assembly, interface regulator, or double check spacer assembly with residual pressure release valve.

EtherCAT compatible products (② Kit type/Symbol: D) are to be discontinued as of October 2022.

As a substitute, please consider the use of an EX260 series product (SI unit specification/Symbol: DA). However, keep in mind that the product specifications, external appearance, etc., differ. For details, please contact your SMC sales representative.

#### **How to Order Manifolds**

Refer to pages 162 to 164 for the dimensions of Type 12/Top-ported type.

SS5Y 3-12S6 Q 2-05 U-

	M12 power supply connector B-coded (EX600-ED2)	M12 power supply connector B-coded (EX600-ED2) (EX600-ED3)	power supply connector B-coded (EX600-ED2) (EX600-ED3) (EX600-ED4)		

- \* When not selecting an SI unit, the symbol will be "nil."
- \* Ensure a match with the common specification of the valve to be used.

## 2 SI unit

0	Without SI unit						
Q	DeviceNet® (Version A)						
N	PROFIBUS DP (Version A)						
V	CC-Link						
ZE EtherNet/IP™ (1 port)							
EA EtherNet/IP™ (2 ports)							
D	EtherCAT						
F	PROFINET						
FA	PROFINET (IO-Link unit)						
WE	EtherNet/IP™ compatible wireless base*1						
WF PROFINET compatible wireless base*1							
WS	WS Wireless remote*1						
*1 The v	wireless system is suitable for use only in						

## 4 I/O unit stations

Nil	None
1	1 station
•	:
9	9 stations

- \* When not selecting an SI unit, the symbol will be "nil."
- SI unit is not included in I/O unit stations.
   When I/O unit is selected, it is shipped
- \* When I/O unit is selected, it is shipped separately, and assembled by users. Refer to the attached operation manual for mounting.

#### **5** Valve stations

Symbol	Stations	Note				
02	2 stations					
:	:	Double wiring*1				
16	16 stations					
02	2 stations	Creation lavares				
:	:	Specified layout*2 (Up to 32 solenoids available)				
24	24 stations	(Op to 32 solellolds available)				

- \*1 Double wiring: 2-position single, double, 3-position, and 4-position valves can be used on all manifold stations.
  Use of a 2-position single solenoid will result in an unused control signal. If this is not desired, order with a specified layout.
  \*2 Specified layout: Indicate the wiring
- Specified layout: Indicate the wiring specifications on the manifold specification sheet. (Note that 2-position double, 3-position, and 4-position valves cannot be used where single wiring has been specified.)
- This also includes the number of the blanking plate assembly.

#### 1 The wireless system is suitable for use only in a country where it is in accordance with the Radio Act and regulations of that country.

- I/O unit cannot be mounted without Sl unit.
- Valve plate which connects manifold and SI unit is included, but it is not mounted to a valve without SI unit. For mounting, refer to the EX600 series in the Web Catalog.

## **How to Order Manifold Assembly**

#### **Example (SS5Y3-12S6**□-□) Digital input unit Digital output unit 2-position single SY3130-5U1-C6 (3 sets) EX600-DXPD EX600-DYPB SI unit\*1 End plate\*1 2-position double EX600-SDN1A EX600-ED4 SY3230-5U1-C6 (2 sets) 00000 D side U side 1 2 3 4 5 --- Valve stations 2 --- I/O unit stations

*313130-301-00 ************ 3 sets (2-position single part no.)
*SY3230-5U1-C62 sets (2-position double part no.)
*EX600-DXPD 1 set I/O unit part number (Station 1)
*EX600-DYPB 1 set I/O unit part number (Station 2)
The asterick denotes the symbol for the assembly

SS5Y3-12S6Q72-05B ....... 1 set (Type 12 5-station manifold base part no.)

Prefix it to the part numbers of the valve, etc.

• For the valve arrangement, the valve closest to the D side is considered the 1st station.

 Under the manifold part number, state the valves to be mounted, then the I/O units in order starting with the 1st station as shown in the figure above. If the arrangement becomes too complicated, specify the details on a manifold specification sheet.

\*1 Do not enter the SI unit part number and the end plate part number together

## 6 P, E port entry, SUP/EXH block assembly

P, E port entry	Internal pilot	Internal pilot, Built-in silencer	External pilot
U side (2 to 10 stations)	U	C*1	G
D side (2 to 10 stations)	D	<b>E</b> *1	Н
Both sides (2 to 24 stations)	В	_	J

- \*1 For SUP/EXH block assembly specifications, built-in silencer types will have P port entry stipulated.
- \* The P and E ports are only available on the U and D sides for the built-in silencer type. 3/5(E) port is plugged. The silencer exhaust port is located on the opposite side of the P and E port entry. (Example: When the P and E port entry is on the D side, the silencer exhaust port is on the U side.)
- \* When the built-in silencer type is used, keep the exhaust port from coming into direct contact with water or other liquids.

## P, E port size (One-touch fittings)

<u>• . , .</u>	_ port orzo	(One tout	,,, ,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,	
Symbol	SY3000	SY5000	SY7000	D
Nil	ø8	ø10	ø12	
N	ø5/16"	ø3/8"	ø1/2"	

\* For N, sizes are in inches.

#### 8 Mounting

Nil	Direct mounting						
D	DIN rail mounting (With DIN rail)						
D0	DIN rail mour	DIN rail mounting (Without DIN rail)					
D3	For 3 stations	Specify a length longer					
•	:	than that of the standard					
D24	For 24 stations	rail.					

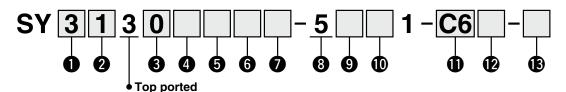

- \* If the DIN rail must be mounted without an SI unit, select D0. Then, refer to L3 of the dimensions for the DIN rail length and order separately. (Refer to page 203 for the DIN rail part number.)
- \* Refer to page 295 for the fixation of DIN rail mounting type manifold.

For details on the EX600 Integrated Type (For Input/Output) Serial Transmission System, refer to the **Web Catalog** and the Operation Manual. For the part numbers of the SI units to be mounted, refer to page 191. (IP40 specifications may be required according to the I/O unit to be selected.) Please download the Operation Manual via the SMC website, https://www.smcworld.com

## How to Order Valves (With mounting screw)

Refer to page 15 for valve specifications.

#### Series

3	SY3000
5	SY5000
7	SY7000

2 Type of actuation

Type of detadtion				
1	2-position	Single		
2		Double		
3	3-position	Closed center		
4 5		Exhaust center		
		Pressure center		
<b>A</b> *1	4	N.C./N.C.		
B*1 C*1	4-position dual 3-port	N.O./N.O.		
		N.C./N.O.		

\*1 Only the rubber seal type is available for the 4-position dual 3-port valve.

Seal type

0	Rubber seal
1	Metal seal

4 Pilot type

Nil	Internal pilot
R	External pilot

O Da	ck pressure check valve
Nil	None
Н	Built-in

- Only the rubber seal type is available. A manifold installed type is available if a back pressure check valve with a metal seal is required. Refer to page 212 for ordering examples. However, it is not recommended to use the built-in valve type and the manifold installed type at the same time because it will reduce the flow.
- The built-in valve type back pressure check valve is not available for the 3-position type or the SY7000.

## 6 Pilot valve option

Nil	Standard (0.7 MPa)		
В	Quick response type (0.7 MPa)		
<b>K</b> *1	High pressure type (1.0 MPa)		

\*1 Only the metal seal type is available for the high pressure type.

#### Coil type

<b>9</b> 00	ii type
Nil	Standard
T	With power saving circuit (Continuous duty type)

- \* Be sure to select the power saving circuit type if the valve is to be continuously energized for long periods of time.
- Be careful of the energizing time when the power saving circuit is selected. Refer to page 292 for details.

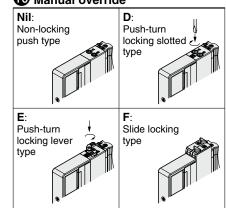

## 8 Rated voltage

#### Light/surge voltage suppressor and common specification

Symbol	With light	Surge voltage suppressor	Common specification
R	_		Non-polar
U	•		Non-polai
S	_		Positive
Z	•	_	common
NS	_		Negative
NZ	•		common

- \* Select "R," "U," "S," or "Z" for the valve when the SI unit output polarity is positive common. Select "R," "U," "NS," or "NZ" for the valve when the SI unit output polarity is negative common.
- Only "Z" and "NZ" types are available with a power saving circuit.

## Manual override

Refer to page 34 for the safety slide locking manual override.

SMC

## A, B port size

#### Thread piping

Symbol	Port size	Applicable series

N11	ø3/8"	_	_	•

## 12 Thread type

Nil	Rc
F	G
N	NPT
Т	NPTF

Only Nil is available for M5.

## Type of mounting screw

Nil	Round head combination screw
В	Hexagon socket head cap screw
K	Round head combination screw (Drop prevention type)
Н	Hexagon socket head cap screw (Drop prevention type)

- For "K" and "H," the valve body cover has a drop prevention construction to stop the mounting screws from falling out when the valve is removed for maintenance, etc.
- When ordering a valve individually, the base gasket is not included.

Since the base gasket is attached to the manifold, please order the base gasket separately if it is needed for maintenance. Refer to page 198 for base gasket and mounting screw part numbers.

"B" and "H" cannot be selected for the individual SUP/EXH spacer assembly or interface regulator.

- \*1: To avoid interference with the body or piping, select downward elbow port when mounting the optional spacer assembly (pages 204 to 207).
- \*2: When using mixed sizes for the A and B ports, please indicate so on the separate manifold specification sheet.

## **How to Order Manifold Assembly**

- \$\$\$73-10\$AANY2-05D-C6 ...1 set (Type 10 5-station manifold base part no.)

  \$\$Y3100-5U1 ......3 sets (2-position single part no.)

  \$\$Y3200-5U1 .....1 set (2-position double part no.)

  \$\$Y3300-5U1 .....1 set (3-position closed center part no.)

  \$\$EX245-DX1 .....1 set I/O module part no.
- \*EX245-DY1 .....1set I/O module part no.
  - The asterisk denotes the symbol for assembly. Prefix it to the part numbers of the valve etc.
- The valve arrangement is numbered as the 1st station from the D side.
- The I/O module station arrangement is numbered starting from the SI unit side.
- Under the manifold part number, state the valves to be mounted, then the I/O module in order from the 1st station as shown in the figure above. If the arrangement becomes complicated, specify on a manifold specification sheet.
- \*1: Do not enter the SI Unit part number and the end plate part number together.
- \*: When mixing top ported configurations, select from page 124-6. In this case, use caution as there is also output on the A and B port on base side. Specify on a manifold specification sheet if plugs are required on the A and B port on base side.

## **How to Order Valves (With mounting screw)**

Refer to page 15 for valve specifications.

## 1 Series

3	SY3000
5	SY5000
7	SY7000

2 Type of actuation

1	Opposition	Single						
2	2-position	Double						
3		Closed center						
4	3-position	Exhaust center						
5		Pressure center						
<b>A</b> *1	4 manikina	N.C./N.C.						
B*1	4-position dual 3-port	N.O./N.O.						
C*1	duai 5-port	N.C./N.O.						

\*1: Only rubber seal type is available for the 4-position dual 3-port valve.

## 3 Seal type

0	Rubber seal	
1	Metal seal	

#### Pilot type

Nil	Internal pilot
R	External pilot

## Back pressure check valve (Built-in valve type)

Nil	None
Н	Built-in

- \*: Only rubber seal type. Manifold installed type is available if the back pressure check valve is required for a valve with metal seal. Refer to page 212 for Ordering Example. However, it is not recommended to use the built-in valve type and the manifold installed type at the same time because it will reduce the flow.
- \*: The built-in valve type back pressure check valve is not available for the 3-position type or the SY7000.

## 6 Pilot valve option

Nil	Standard (0.7 MPa)
В	Quick response type (0.7 MPa)
<b>K</b> *1	High pressure type (1.0 MPa)

\*1: Only metal seal type is available for the high pressure type.

## Coil type

	, po
Nil	Standard
Т	With power saving circuit (Continuous duty type)
	with power saving circuit (Continuous duty type)

- \*: Be sure to select the power saving circuit type when the valve is continuously energized for long periods of time.
- \*: Be careful of the energizing time when the power saving circuit is selected. Refer to page 292 for details.

#### Rated voltage

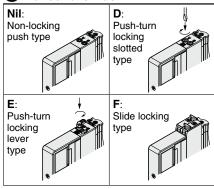

•		
5	24 VDC	

## 9 Light/surge voltage suppressor and common specification

Symbol	With light	Surge voltage suppressor	Common specification

PROFIBUS DP compatible products (3SI unit/Symbol: N) are to be discontinued as of November 2022. As a substitute, please consider the use of an EX600 series product (SI unit/Symbol: N). However, keep in mind that the product specifications, external appearance, etc., differ. For details, please contact your SMC sales representative.

CE CH CRUS ROHS

## How to Order Manifolds

Refer to pages 160 (SY5000) and 161 (SY7000) for the dimensions of Type 11/Bottom-ported type.

## Series

3	SY3000
5	SY5000
7	SY7000

## 2 Type

<u> </u>				
10	Side ported			
11	Bottom ported*1			

The SY5000 manifold base is used for the bottom-ported SY3000. When ordering, refer to the "Plug-in Mixed Mounting Type Manifold" (from page 165).

## 4 Input block stations

Nil	None	
1	1 station	
:	:	
8	8 stations	

\* When not selecting an SI unit, the symbol will be "nil." The maximum number of stations is limited for the AS-Interface applicable SI unit.

## 3 SI unit

0	Without SI unit		
Q	Device	Net® (N	egative common)
N	PROFIB	US DP (	Negative common)
TA		2 power	8 in/8 out, 31 slave modes
TB	AS-Interface (Negative	1 power	4 in/4 out, 31 slave modes
TC	common)		8 in/8 out, 31 slave modes
TD	Commony		4 in/4 out, 31 slave modes
Υ	CANopen (Negative common)		
ZE	EtherNe	et/IP™ (N	Negative common)

- Ensure a match with the common specification of the valve to be used.
- Input block cannot be mounted without SI
- The supply current from the SI unit of AS-Interface applicable 1 power supply system specification to the input block and valve is limited.

## 6 Input block type

o input block	type		
	PNP sensor	NPN sensor	
	input	input	
Without input block	Nil		
M12, 2 inputs	Α	D	
M12, 4 inputs	В	E	
M8, 4 inputs	С	F	

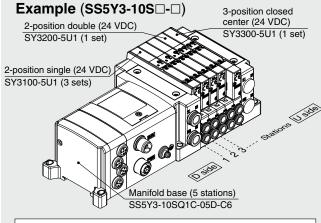

\* When not selecting an SI unit, the symbol will be "nil."

## 6 Valve stations

_		, o talii o 1.0					
Symbol	Stations	Note					
02	2 stations						
:	:	Double wiring*1					
16	16 stations	-					
02	2 stations	Considered lawayet*2					
:	:	Specified layout*2 (Up to 32 solenoids available)					
24	24 stations	(Op to 32 solenoids available)					

- \*1 Double wiring: 2-position single, double, 3-position, and 4-position valves can be used on all manifold stations. Use of a 2-position single solenoid will result in an unused control signal. If this is not desired, order with a specified layout.
- \*2 Specified layout: Indicate the wiring specifications on the manifold specification sheet. (Note that 2-position double, 3-position, and 4-position valves cannot be used where single wiring has been specified.) When determining the number of valve stations, note that the maximum number of solenoids for the AS-Interface applicable SI Unit specification is as follows.
  - 8 in/8 out specification: Max. 8 solenoids
- 4 in/4 out specification: Max. 4 solenoids
- This also includes the number of the blanking plate assembly.
- For the product without the SI unit (S0), note the maximum number of solenoids of the SI unit that will be mounted. If the layout is specified, indicate it on the manifold specification sheet.

*SY3200-5U1 1 set (2-position double part no.)
*SY3300-5U1 1 set (3-position closed center part no.)
The asterisk denotes the symbol for the assembly.  Prefix it to the part numbers of the valve, etc.

- For the valve arrangement, the valve closest to the D side is considered the 1st station.
- Under the manifold part number, state the valves to be mounted in order starting with the 1st station as shown in the figure above. If the arrangement becomes too complicated, specify the details on a manifold specification sheet.
- When mixing top-ported configurations, select from those listed on page 132. In such cases, use caution as there is also output on the A and B ports on the base side. Specify on the manifold specification sheet if plugs are required for the A and B ports on

## P, E port entry, SUP/EXH block assembly

P, E port entry	Internal pilot	Internal pilot, Built-in silencer	External pilot
U side (2 to 10 stations)	U	С	G
D side (2 to 10 stations)	D	E	Н
Both sides (2 to 24 stations)	В	F	J

- \* 3/5(E) port is plugged for the built-in silencer type.
- When the built-in silencer type is used, keep the exhaust port from coming into direct contact with water or other liquids.

For details on the EX250 Integrated Type (For Input/Output) Serial Transmission System, refer to the Web Catalog and the Operation Manual. For the part numbers of the SI units to be mounted, refer to page 193. Please download the Operation Manual via the SMC website, https://www.smcworld.com

\*1 Indicate the sizes on the manifold specification sheet in the case of "CM" or "LM." The direction of P, E port fittings is the same as for the A, B port. If selecting "LM," indicate it on the manifold specification sheet for the P, E port fitting

\*2 To avoid interference with the body or piping, select a downward elbow port when mounting the optional spacer assembly (pages 204 to 206).

9 Mounting and Option

Cum	Cumple of	Mounting	Option		
Sylli	IDUI		Name plate	Station number	
Ni	il	Direct mounting	_	_	
A	Ą		•	•	
В	4		•	_	
D		DIN "	_	_	
A		DIN rail mounting	•	•	
B			•	_	

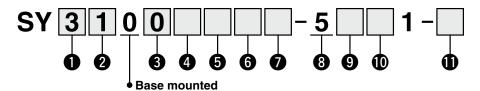

**DIN Rail Option** 

Nil	Standard length			
0	Without DIN rail (with bracket)			
3	For 3 stations	Specify a longer rail than the total		
:	÷	rail than the total length of specified		
24	For 24 stations	stations.		

- Enter the number of stations inside  $\square$  when it is larger than the number of valve stations. (Refer to "DIN Rail Option" above.)
- Only direct mounting is available for the type 11 bottom-ported type.
- Refer to page 295 for the fixation of DIN rail mounting type manifold.
- If the DIN rail must be mounted without an SI unit, select D0. Then, refer to L3 of the dimensions for the DIN rail length and order separately. (Refer to page 203 for the DIN rail part number.)

## How to Order Valves (With mounting screw)

Refer to page 15 for valve specifications.

## Series

3	SY3000
5	SY5000
7	SY7000

Type of actuation

Type of actuation					
1	2-position	Single			
2	z-position	Double			
3	3-position	Closed center			
4		Exhaust center			
5		Pressure center			
<b>A</b> *1	4	N.C./N.C.			
<b>B</b> *1	4-position dual 3-port	N.O./N.O.			
<b>C</b> *1		N.C./N.O.			

\*1 Only the rubber seal type is available for the 4-position dual 3-port valve.

3 Seal type

0	Rubber seal
1	Metal seal

4 Pilot type

Nil	Internal pilot
R	External pilot

Back pressure check valve (Built-in valve type)

Nil	None
Н	Built-in
. Only 4	ha wilahawaaal turaa ia ayallahla. A

- \* Only the rubber seal type is available. A manifold installed type is available if a back pressure check valve with a metal seal is required. Refer to page 212 for ordering examples. However, it is not recommended to use the built-in valve type and the manifold installed type at the same time because it will reduce the flow.
- The built-in valve type back pressure check valve is not available for the 3-position type or the SY7000.

6 Pilot valve option

Nil	Standard (0.7 MPa)
В	Quick response type (0.7 MPa)
<b>K</b> *1	High pressure type (1.0 MPa)

\*1 Only the metal seal type is available for the high pressure type.

Coil type

9	Oon type										
Nil	Standard										
Т	With power saving circuit (Continuous duty type)										

- Be sure to select the power saving circuit type if the valve is to be continuously energized for long periods of time.
- \* Be careful of the energizing time when the power saving circuit is selected. Refer to page 292 for details.

8 Rated voltage

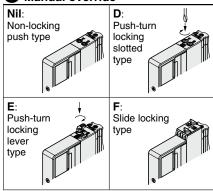

5	24 VDC
---	--------

9 Light/surge voltage suppressor and common specification

Symbol	With light	Surge voltage suppressor	Common specification
R	_		Non-polar
U	•		Non-polai
S	_		Positive
Z	•	_	common
NS	_		Negative
NZ	•		common

- \* "R" and "U" are applicable for every SI unit. However, "S" and "Z" can be used only for CC-Link applicable unit and "NS" and "NZ" are for units which are not CC-Link applicable.
- \* Only "Z" and "NZ" types are available with a power saving circuit.

Manual override

 Refer to page 34 for the safety slide locking manual override.

Type of mounting screw

Nil	Round head combination screw
В	Hexagon socket head cap screw
K	Round head combination screw (Drop prevention type)
Н	Hexagon socket head cap screw (Drop prevention type)

- \* For "K" and "H," the valve body cover has a drop prevention construction to stop the mounting screws from falling out when the valve is removed for maintenance, etc.
- When ordering a valve individually, the base gasket is not included. Since the base gasket is attached to the manifold, please order the base gasket separately if it is needed for maintenance. Refer to page 198 for base gasket and mounting screw part numbers.
- \* "B" and "H" cannot be selected for the individual SUP/EXH spacer assembly, interface regulator, or double check spacer assembly with residual pressure release valve.

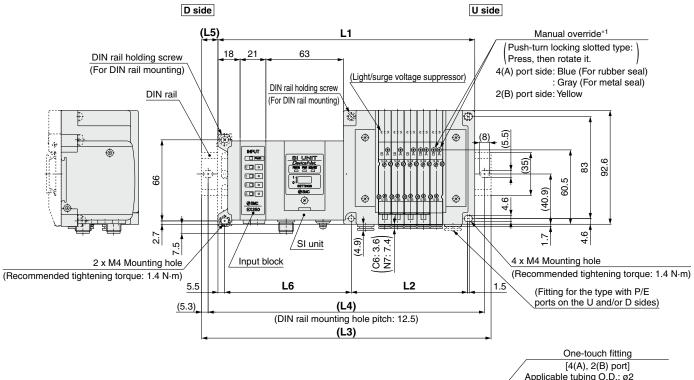

Type 10/Side Ported

- \* Ensure a match with the common specification of the valve to be used.
- Input block cannot be mounted without SI unit.
- The supply current from the SI unit of AS-Interface applicable 1 power supply system specification to the input block and valve is

## **5** Valve stations

Symbol	Stations	Note		
02	2 stations			
:	1	Double wiring*1		
16	16 stations			
02	2 stations	0		
:	1	Specified layout*2 (Up to 32 solenoids available)		
24	24 stations	(Op to 32 solerious available)		

- \*1 Double wiring: 2-position single, double, 3-position, and 4-position valves can be used on all manifold stations.
  - Use of a 2-position single solenoid will result in an unused control signal. If this is not desired, order with a specified layout.
- \*2 Specified layout: Indicate the wiring specifications on the manifold specification sheet. (Note that 2-position double, 3-position, and 4-position valves cannot be used where single wiring has been specified.) When determining the number of valve stations, note that the maximum number of solenoids for the AS-Interface applicable SI unit specification is as follows.
  - 8 in/8 out specification: Max. 8 solenoids
    4 in/4 out specification: Max. 4 solenoids
- This also includes the number of the blanking
- plate assembly.
  For the product without the SI unit (S0), note the maximum number of solenoids of the SI unit that will be mounted. If the layout is specified, indicate it on the manifold specification sheet.

## How to Order Manifold Assembly

 $\ensuremath{\mathsf{SS5Y3\text{-}12SQ1C\text{-}05D}}$   $\cdots$  1 set (Type 12 5-station manifold base part no.) \*SY3130-5U1-C6------ 3 sets (2-position single part no.) \*SY3230-5U1-C6------ 1 set (2-position double part no.) \*SY3330-5U1-C6----------1 set (3-position closed center part no.) The asterisk denotes the symbol for the assembly.

• For the valve arrangement, the valve closest to the D side is considered the 1st station.

Prefix it to the part numbers of the valve, etc.

• Under the manifold part number, state the valves to be mounted in order starting with the 1st station as shown in the figure above. If the arrangement becomes too complicated, specify the details on a manifold specification sheet.

## 6 P, E port entry, SUP/EXH block assembly

P, E port entry	Internal pilot	Internal pilot, Built-in silencer	External pilot
U side (2 to 10 stations)	U	C*1	G
D side (2 to 10 stations)	D	<b>E</b> *1	Н
Both sides (2 to 24 stations)	В	_	J

- For SUP/EXH block assembly specifications, built-in silencer types will have port entry stipulated.
- The P and E ports are only available on the U and D sides for the built-in silencer type. 3/5(E) port is plugged. The silencer exhaust port is located on the opposite side of the P and E port entry. (Example: When the P and E port entry is on the D side, the silencer exhaust port is on the U side.)
- When the built-in silencer type is used, keep the exhaust port from coming into direct contact with water or other liquids.

#### P, E port size (One-touch fittings)

<u> </u>				
Symbol	SY3000	SY5000	SY7000

- \* Select "R," "U," "S," or "Z" for the valve when the SI unit output polarity is NiI (positive common). Select "R," "U," "NS," or "NZ" for the valve when the SI unit output polarity is N (negative common).
- Only "Z" and "NZ" types are available with a power saving circuit.

#### Manual override

 Refer to page 34 for the safety slide locking manual override.

#### Type of mounting screw

Nil	Round head combination screw
В	Hexagon socket head cap screw
K	Round head combination screw (Drop prevention type)
Н	Hexagon socket head cap screw (Drop prevention type)

- \* For "K" and "H," the valve body cover has a drop prevention construction to stop the mounting screws from falling out when the valve is removed for maintenance, etc.
- When ordering a valve individually, the base gasket is not included.
  Since the base gasket is attached to the manifold, please order the base gasket separately if it is needed for maintenance. Refer to page 198 for base gasket and mounting screw part numbers.
- \* "B" and "H" cannot be selected for the individual SUP/EXH spacer assembly, interface regulator, or double check spacer assembly with residual pressure release valve.

Type 10 Side Ported

Type 11 **Bottom Ported** 

## Plug-in Connector Connecting Base

Safety Communication Protocol (PROFIsafe)

# SY3000/5000/7000 Series

#### Using the safety communication protocol

Refer to the EX260 Web Catalog for details on units that support the safety communication protocol. When using a manifold valve within an ISO 13849-compliant safety system, the device needs to be considered from both the pneumatic circuit and the electric side.

Devices (including valves) need to be selected based on whether their functions are in line with the safety level of the equipment as a whole.

The use of valves that have been validated as being compliant with ISO 13849-2 may be required. For details on valves that have been validated, please contact SMC.

In addition, refer to "Safety Instructions" for precautions on model selection.

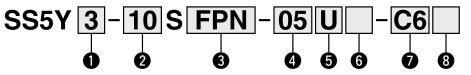

## 

Refer to page 133 for details on manifolds that support Fieldbus and Industrial Ethernet.

#### How to Order Manifolds

Refer to pages 160 (SY5000) and 161 (SY7000) for the dimensions of Type 11/Bottom-ported type.

#### Series

3	SY3000
5	SY5000
7	SY7000

• . , pe			
10	Side ported		
11	Bottom ported*1		

\*1 The SY5000 manifold base is used for the bottom-ported SY3000. When ordering, refer to the "Plug-in Mixed Type Manifold" (from page 165).

#### 3 SI unit specifications

(Output polarity, Protocol, Number of outputs, Communication connector)

Symbol (Ou	tput polarity)		Number	Communication
Positive common (NPN)	Negative common (PNP)	Protocol	of outputs	connector
0	*1	Without	SI unit	i
_*3	FPN	PROFIsafe	32*4	M12

- \*1 Without SI unit, the output polarity is decided by the SI unit used. Ensure a match with the common specification of the valves to be used.
- \*2 DIN rail cannot be mounted without SI unit.
- \*3 Positive common (NPN) type is not applicable.
- \*4 Only the 32 outputs type is available.

4 Valve stations

Symbol	Stations	Note				
02	2 stations					
	:	Double wiring*1				
16	16 stations	_				
02	2 stations	0				
•	:	Specified layout*2				
24	24 stations	(Up to 32 solenoids available)				

- \*1 Double wiring: 2-position single, double, 3-position, and 4-position valves can be used on all manifold stations. Use of a 2-position single solenoid will result in an unused control signal. If this is not desired, order with a specified layout
- Specified layout: Indicate the wiring specifications on the manifold specification
  - (Note that 2-position double, 3-position, and 4-position valves cannot be used where single wiring has been specified.)
- This also includes the number of the blanking plate assembly.

#### P, E port entry

\*1 Indicate the sizes on the manifold specification sheet in the case of "CM" or "LM." The direction of P, E port fittings is the same as for the A, B port. If selecting "LM," indicate it on the manifold specification sheet for the P, E port fitting

\*2 To avoid interference with the body or piping, select a downward elbow port when mounting the optional spacer assembly (pages 204 to 206).

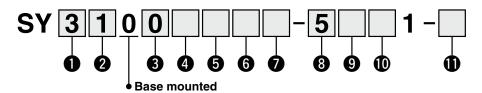

#### [Validated product examples]

Please contact SMC for further details as supported variations are continually being added.

 2-position double of rubber seal and manual override with locking function (D, E, F type) are excluded, because they don't comply with safety standard.

#### How to Order Valves (With mounting screw)

Refer to page 15 for valve specifications.

#### Series

3	SY3000
5	SY5000
7	SY7000

2 Type of actuation

<u>• ,, ,</u>					
1	O position	Single			
2	2-position	Double*2			
3	3-position	Closed center			
4		Exhaust center			
5		Pressure center			
<b>A</b> *1	4-position dual 3-port	N.C./N.C.			
B*1		N.O./N.O.			
C*1	duai 5-port	N.C./N.O.			

- \*1 Only the rubber seal type is available for the 4-position dual 3-port valve.
- \*2 Except the rubber seal

3 Seal type

0	Rubber seal
1	Metal seal

4 Pilot type

	71
Nil	Internal pilot
R	External pilot

5 Back pressure check valve (Built-in valve type)

Nil	None
Н	Built-in

- \* Only the rubber seal type is available. A manifold installed type is available if a back pressure check valve with a metal seal is required. Refer to page 212 for ordering examples. However, it is not recommended to use the built-in valve type and the manifold installed type at the same time because it will reduce the flow.
- The back pressure check valve is not available for the 3-position type or the SY7000.

6 Pilot valve option

<u> </u>	ot varvo option
Nil	Standard (0.7 MPa)
В	Quick response type (0.7 MPa)
<b>K</b> *1	High pressure type (1.0 MPa)

\*1 Only the metal seal type is available for the high pressure type.

Coil type

Nil	Standard
Т	With power saving circuit (Continuous duty type)

- Be sure to select the power saving circuit type if the valve is to be continuously energized for long periods of time.
- \* Be careful of the energizing time when the power saving circuit is selected. Refer to page 292 for details.

8 Rated voltage

5	24 VDC

9 Light/surge voltage suppressor and common specification

Symbol	With light	Surge voltage suppressor	Common specification
Nil	_	_	
R	_		Non-polar
U	•		
NS	_	_	Negative
NZ	•		common

 Only "NZ" type is available with a power saving circuit.

#### Manual override

Type of mounting screw

- 11.	70 01 1110 unituing 001 011
Nil	Round head combination screw
В	Hexagon socket head cap screw
K	Round head combination screw (Drop prevention type)
Н	Hexagon socket head cap screw (Drop prevention type)

- \* For "K" and "H," the valve body cover has a drop prevention construction to stop the mounting screws from falling out when the valve is removed for maintenance, etc.
- When ordering a valve individually, the base gasket is not included.
  Since the base gasket is attached to the manifold, please order the base gasket separately if it is needed for maintenance.
  Refer to page 198 for base gasket and mounting screw part numbers.
- \* "B" and "H" cannot be selected for the individual SUP/EXH spacer assembly, interface regulator, or double check spacer assembly with residual pressure release valve.

FA	FAN	PROFINET	32	M12
FB	FBN	THOTINE	16	IVIIZ
EA	EAN	EtherNet/IP™	32	M12
EB	EBN	Luicine/iF	16	IVITZ
*3	GAN	Ethernet	32	M12
*3	GBN	POWERLINK	16	IVITZ
*3	KAN	IO-Link	32*5	M12

- Without SI unit, the output polarity is decided by the SI unit used.
  - Ensure a match with the common specification of the valves to be used.
- \*2 DIN rail cannot be mounted without SI unit.
- \*3 Positive common (NPN) type is not applicable. \*4 IP40 for the D-sub applicable communication
- connector specification
- \*5 Only the 32 outputs type is available.

3 Valve stations

In the case of the 32-output SI unit

Symbol	Stations	Note
02	2 stations	
	÷	Double wiring*1
16	16 stations	
02	2 stations	Connection delegants
	:	Specified layout*2 (Up to 32 solenoids available)
24	24 stations	

#### In the case of the 16-output SI unit

Symbol	Stations	Note
02	2 stations	
	÷	Double wiring*1
08	8 stations	
02	2 stations	0
•	:	Specified layout*2 (Up to 16 solenoids available)
16	16 stations	

- \*1 Double wiring: 2-position single, double, 3-position, and 4-position valves can be used on all manifold stations.
- Use of a 2-position single solenoid will result in an unused control signal. If this is not desired, order with a specified layout.
- \*2 Specified layout: Indicate the wiring specifications on the manifold specification
  - (Note that 2-position double, 3-position, and 4-position valves cannot be used where single wiring has been specified.)
- This also includes the number of the blanking
- plate assembly.
  For the model without the SI unit (S0), note the maximum number of solenoids of the SI unit that will be mounted. If the layout is specified, indicate it on the manifold specification sheet.

P. E port entry

<u> </u>	
<b>U</b> *1	U side (2 to 10 stations)
<b>D</b> *1	D side (2 to 10 stations)
В	Both sides (2 to 24 stations)

\*1 5 For type "S", SUP/EXH block assembly with a built-in silencer, choose U or D for P, E port

#### SUP/EXH block assembly

Nil	Internal pilot	
S	Internal pilot, Built-in silencer	
R	External pilot	

- The P and E ports are only available on the U and D sides for the built-in silencer type. 3/5(E) port is plugged. The silencer exhaust port is located on the opposite side of the P and E port entry. (Example: When the P and E port entry is on the D side, the silencer exhaust port is on the U side.)
- When the built-in silencer type is used, keep the exhaust port from coming into direct contact with water or other liquids.

#### P, E port size (One-touch fittings)

Symbol	SY3000	SY5000	SY7000	
Nil	ø8	ø10	ø12	
N	ø5/16"	ø3/8"	ø1/2"	

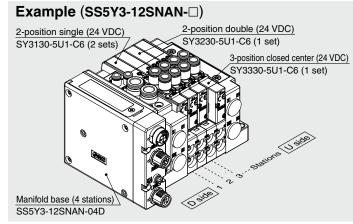

\* For N. sizes are in inches

#### Mounting

Nil	Direct mounting	
D	DIN rail mounting (With DIN rail)	
D0	DIN rail mounting (Without DIN rail)	
D3	For 3 stations Specify a length longer	
:	than that of the standard	
D24	For 24 stations	rail.

- If the DIN rail must be mounted without an SI unit, select D0. Then, refer to L3 of the dimensions for the DIN rail length and order separately. (Refer to
- page 203 for the DIN rail part number.) Refer to page 295 for the fixation of DIN rail mounting type manifold.

#### **How to Order Manifold Assembly**

For details on the EX260 Integrated Type (For Output) Serial Transmission System, refer to the **Web Catalog** and the Operation Manual. For the part numbers of the SI units to be mounted, refer to page 194.

Please download the Operation Manual via the SMC website, https://www.smcworld.com

SS5Y3-12SNAN-04D ····· 1 set (Type 12 4-station manifold base part no.) \*SY3130-5U1-C6 ...... 2 sets (2-position single part no.) \*SY3230-5U1-C6 ...... 1 set (2-position double part no.) \*SY3330-5U1-C6 ...... 1 set (3-position closed center part no.)

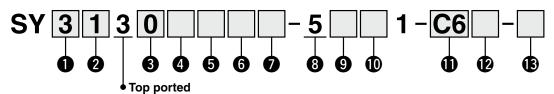

The asterisk denotes the symbol for the assembly. Prefix it to the part numbers of the valve, etc.

- For the valve arrangement, the valve closest to the D side is considered the 1st station.
- Under the manifold part number, state the valves to be mounted in order starting with the 1st station as shown in the figure above. If the arrangement becomes too complicated, specify the details on a manifold specification sheet.

Valve Specifications

#### How to Order Valves (With mounting screw)

Refer to page 15 for valve specifications.

#### Series

3	SY3000
5	SY5000
7	SY7000

2 Type of actuation

1	O manitian	Single
2	2-position	Double
3		Closed center
4	3-position	Exhaust center
5	5	Pressure center
<b>A</b> *1		N.C./N.C.
	4	14.0./14.0.
B*1	4-position	N.O./N.O.
	4-position dual 3-port	

\*1 Only the rubber seal type is available for the 4-position dual 3-port valve.

3 Seal type

0	Rubber seal
1	Metal seal

4 Pilot type

Nil	Internal pilot
R	External pilot

Back pressure check valve (Built-in valve type)

ı	Nil	None
	Н	Built-in
	* Only t	he rubber seal type is available. A

- \* Only the rubber seat type is available. A manifold installed type is available if a back pressure check valve with a metal seal is required. Refer to page 212 for ordering examples. However, it is not recommended to use the built-in valve type and the manifold installed type at the same time because it will reduce the flow.
- The built-in valve type back pressure check valve is not available for the 3-position type or the SY7000.

6 Pilot valve option

Nil	Standard (0.7 MPa)
В	Quick response type (0.7 MPa)
<b>K</b> *1	High pressure type (1.0 MPa)

\*1 Only the metal seal type is available for the high pressure type.

Coil type

Nil	Standard	
Т	With power saving circuit (Continuous duty type)	

- \* Be sure to select the power saving circuit type if the valve is to be continuously energized for long periods of time.
- \* Be careful of the energizing time when the power saving circuit is selected. Refer to page 292 for details.

8 Rated voltage

|--|

Light/surge voltage suppressor and common specification

Symbol	With light	Surge voltage suppressor	Common specification
R			Non-polar
U	•		Non-polar
S	_	•	Positive
Z	•	•	common
NS	_		Negative
NZ	•		common

- \* Select "R," "U," "S," or "Z" for the valve when the SI unit output polarity is NiI (positive common). Select "R," "U," "NS," or "NZ" for the valve when the SI unit output polarity is N (negative common).
- Only "Z" and "NZ" types are available with a power saving circuit.

Manual override

D: Push-turn locking slotted type
F: Slide locking type

 Refer to page 34 for the safety slide locking manual override.

#### A, B port size

Thread piping

## **Plug-in Connector Connecting Base**

**EX126** 

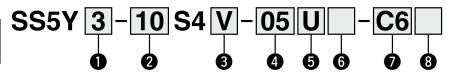

# SY3000/5000/7000 Series

(€ CA

#### **How to Order Manifolds**

Refer to pages 160 (SY5000) and 161 (SY7000) for the dimensions of Type 11/Bottom-ported type.

#### Series

3	SY3000
5	SY5000
7	SY7000

#### 2 Type

10 Side ported	
11 Bottom ported*1	

\*1 The SY5000 manifold base is used for the bottom-ported SY3000. When ordering, refer to the "Plug-in Mixed Mounting Type Manifold" (from page 165).

#### 3 SI unit

0	Without SI unit
V	CC-Link (Positive common NPN)

 Only a terminal block plate is mounted for the valve without SI unit.

#### 4 Valve stations

<u> </u>						
Symbol	Stations	Note				
02	2 stations					
1	:	Double wiring*1				
08	8 stations					
02	2 stations	Considered lawayee?				
1	:	Specified layout*2				
16	16 stations	(Up to 16 solenoids available)				

- \*1 Double wiring: 2-position single, double, 3-position, and 4-position valves can be used on all manifold stations. Use of a 2-position single solenoid will result in an unused control signal. If this is not desired, order with a specified layout.
- \*2 Specified layout: Indicate the wiring specifications with the manifold specification sheet. (Note that 2-position double, 3-position, and 4-position valves cannot be used where single wiring has been specified.)
- This also includes the number of the blanking plate assembly.

## How to Order Manifold Assembly

- For the valve arrangement, the valve closest to the D side is considered the 1st station.
- Under the manifold part number, state the valves to be mounted in order starting
  with the 1st station as shown in the figure above. If the arrangement becomes too
  complicated, specify the details on a manifold specification sheet.
- \* When mixing top-ported configurations, select from those listed on page 148. In such cases, use caution as there is also output on the A and B ports on the base side.
  Specify on the manifold expedification shoot if place are required for the A and

Specify on the manifold specification sheet if plugs are required for the A and R norts on the base side

**6** P, E port entry

U	U side (2 to 10 stations)
D	D side (2 to 10 stations)
В	Both sides (2 to 16 stations)

#### 6 SUP/EXH block assembly

Nil	Internal pilot
S	Internal pilot, Built-in silencer
R	External pilot

- 3/5(E) port is plugged for the built-in silencer type
- When the built-in silencer type is used, keep the exhaust port from coming into direct contact with water or other liquids.

For details on the EX126 Integrated Type (For Output) Serial Transmission System, refer to the **Web Catalog** and the Operation Manual. For the part numbers of the SI units to be mounted, refer to page 195. Please download the Operation Manual via the SMC website, https://www.smcworld.com

## Plug-in Connector Connecting Base

**EX126** 

Type 12 Top Ported

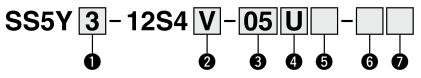

# SY3000/5000/7000 Series

( E UK ROHS

#### How to Order Manifolds

Refer to pages 162 to 164 for the dimensions of Type 12/Top-ported type.

#### Series

3	SY3000
5	SY5000
7	SY7000

#### SI unit

0	Without SI unit
V	CC-Link (Positive common NPN)

\* Only a terminal block plate is mounted for the valve without SI unit.

#### 3 Valve stations

Symbol	Stations	Note
02	2 stations	
:	:	Double wiring*1
08	8 stations	
02	2 stations	Considered laways
:	:	Specified layout*2 (Up to 16 solenoids available)
16	16 stations	(Op to 10 soleriolds available)

- \*1 Double wiring: 2-position single, double, 3-position, and 4-position valves can be used on all manifold stations. Use of a 2-position single solenoid will result in an unused control signal. If this is not
- desired, order with a specified layout. \*2 Specified layout: Indicate the wiring specifications on the manifold specification sheet. (Note that 2-position double, 3-position, and 4-position valves cannot be used where single wiring has been specified.)
- This also includes the number of the blanking plate assembly.

#### 4 P, E port entry

<b>U</b> *1	U side (2 to 10 stations)
<b>D</b> *1	D side (2 to 10 stations)
В	Both sides (2 to 16 stations)

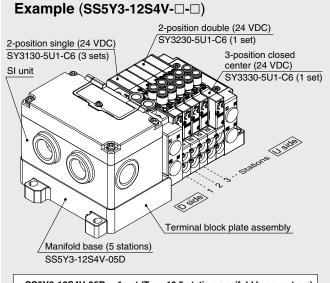

\*1 5 For type "S", SUP/EXH block assembly with a built-in silencer, choose U or D for P,

#### 5 SUP/EXH block assembly

Nil	Internal pilot
S	Internal pilot, Built-in silencer
R	External pilot

- The P and E ports are only available on the U and D sides for the built-in silencer type. 3/5(E) port is plugged. The silencer exhaust port is located on the opposite side of the P and E port entry. (Example: When the P and E port entry is on the D side, the silencer exhaust port is on the U side.)
- When the built-in silencer type is used, keep the exhaust port from coming into direct contact with water or other liquids.

#### **How to Order Manifold Assembly**

SS5Y3-12S4V-05D ... 1 set (Type 12 5-station manifold base part no.)

\*SY3130-5U1-C6...... 3 sets (2-position single part no.)

\*SY3230-5U1-C6...... 1 set (2-position double part no.)

\*SY3330-5U1-C6...... 1 set (3-position closed center part no.)

The asterisk denotes the symbol for the assembly. Prefix it to the part numbers of the valve, etc.

- For the valve arrangement, the valve closest to the D side is considered the 1st station. • Under the manifold part number, state the valves to be mounted in order starting
- with the 1st station as shown in the figure above. If the arrangement becomes too complicated, specify the details on a manifold specification sheet.

#### 6 P, E port size (One-touch fittings)

## **Plug-in Connector Connecting Base**

EX120

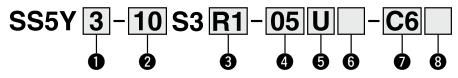

# SY3000/5000/7000 Series

(€ CA

#### **How to Order Manifolds**

Refer to pages 160 (SY5000) and 161 (SY7000) for the dimensions of Type 11/Bottom-ported type.

#### 1 Series

3	SY3000
5	SY5000
7	SY7000

#### 2 Туре

<u> </u>	<b>,</b>
10	Side ported
11	Bottom ported*1

\*1 The SY5000 manifold base is used for the bottom-ported SY3000. When ordering, refer to the "Plug-in Mixed Mounting Type Manifold" (from page 165).

#### **3** SI unit

0	Without SI unit		
Q	DeviceNet® (Positive common NPN)		
R1	OMRON CompoBus/S	16 outputs	
R2	(Positive common NPN)	8 outputs	
V	CC-Link (Positive common NPN)		
ZB*1	CompoNet®	Positive common NPN	
ZBN*1	Componer	Negative common PNP	

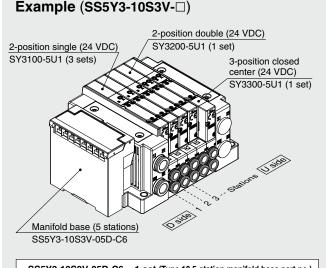

- \*1 The communication connector (for the opposite side) is not provided. Please order it separately.
- \* Ensure a match with the common specification of the valve to be used.

#### 4 Valve stations

_		
Symbol	Stations	Note
02	2 stations	
:	:	Double wiring*1
08	8 stations	
02	2 stations	Crossified laws with 2
:	:	Specified layout*2 (Up to 16 solenoids available)
16	16 stations	

- \*1 Double wiring: 2-position single, double, 3-position, and 4-position valves can be used on all manifold stations. Use of a 2-position single solenoid will result in an unused control signal. If this is not desired, order with a specified layout.
- \*2 Specified layout: Indicate the wiring specifications on the manifold specification sheet. (Note that 2-position double, 3-position, and 4-position valves cannot be used where single wiring has been specified.)
- This also includes the number of the blanking plate assembly.
- \* Since R2 type SI unit has 8 outputs, note that up to 8 solenoids can be accommodated.

## How to Order Manifold Assembly

- SS5Y3-10S3V-05D-C6 ··· 1 set (Type 10 5-station manifold base part no.)

  \*SY3100-5U1 ················· 3 sets (2-position single part no.)

  \*SY3200-5U1 ················ 1 set (2-position double part no.)

  \*SY3300-5U1 ················ 1 set (3-position closed center part no.)

  The asterisk denotes the symbol for the assembly.
- Prefix it to the part numbers of the valve, etc.

   For the valve arrangement, the valve closest to the D side is considered the 1st station.
- Under the manifold part number, state the valves to be mounted in order starting
  with the 1st station as shown in the figure above. If the arrangement becomes too
  complicated, specify the details on a manifold specification sheet.
- \* When mixing top-ported configurations, select from those listed on page 156. In such cases, use caution as there is also output on the A and B ports on the base side.

Specify on the manifold specification sheet if plugs are required for the A and B ports on the base side.

**5** P, E port entry

O 1, 2 port ontry		
U	U side (2 to 10 stations)	
D	D side (2 to 10 stations)	
В	Both sides (2 to 16 stations)	

#### 6 SUP/EXH block assembly

Nil	Internal pilot
S	Internal pilot, Built-in silencer
R	External pilot

 3/5(E) port is plugged for the built-in silencer type.

For details on the EX120 Integrated Type (For Output) Serial Transmission System, refer to the **Web Catalog** and the Operation Manual. For the part numbers of the SI units to be mounted, refer to page 196. Please download the Operation Manual via the SMC website, https://www.smcworld.com

C*1	dual 5-port	N.C./N.O.	

\*1 Only the rubber seal type is available for the 4-position dual 3-port valve.

#### **3** Seal type

0	Rubber seal
1	Metal seal

#### 4 Pilot type

_	<b>7</b> 1
Nil	Internal pilot
R	External pilot

## Back pressure check valve (Built-in valve type)

Nil	None
Н	Built-in

- \* Only the rubber seal type is available. A manifold installed type is available if a back pressure check valve with a metal seal is required. Refer to page 212 for ordering examples. However, it is not recommended to use the built-in valve type and the manifold installed type at the same time because it will reduce the flow.
- \* The built-in valve type back pressure check valve is not available for the 3-position type or the SY7000.

#### 6 Pilot valve option

Nil	Standard (0.7 MPa)
В	Quick response type (0.7 MPa)
<b>K</b> *1	High pressure type (1.0 MPa)

\*1 Only the metal seal type is available for the high pressure type.

#### Coil type

• con type		
Nil	Standard	
T	With power saving circuit (Continuous duty type)	

- \* Be sure to select the power saving circuit type if the valve is to be continuously energized for long periods of time.
- Be careful of the energizing time when the power saving circuit is selected. Refer to page 292 for details.

#### 8 Rated voltage

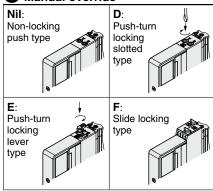

5 24 VDC		
	5	1 2/1 (/1)(:

## Light/surge voltage suppressor and common specification

Symbol	With light	Surge voltage suppressor	Common specification
R	_		Non-polar
U	•		Non-polai
S	_		Positive
Z	•	_	common
NS	_		Negative
NZ	•		common

- \* Select "R," "U," "S," or "Z" for the valve when the SI unit specification is positive common. Select "R," "U," "NS," or "NZ" for the valve when the SI unit specification is ZBN (negative common).
- \* Only "Z" and "NZ" types are available with a power saving circuit.

#### Manual override

 Refer to page 34 for the safety slide locking manual override.

#### Type of mounting screw

<u> </u>	
Nil	Round head combination screw
В	Hexagon socket head cap screw
K	Round head combination screw (Drop prevention type)
Н	Hexagon socket head cap screw (Drop prevention type)

- \* For "K" and "H," the valve body cover has a drop prevention construction to stop the mounting screws from falling out when the valve is removed for maintenance, etc.
- When ordering a valve individually, the base gasket is not included. Since the base gasket is attached to the manifold, please order the base gasket separately if it is needed for maintenance. Refer to page 198 for base gasket and mounting screw part numbers.
- \* "B" and "H" cannot be selected for the individual SUP/EXH spacer assembly, interface regulator, or double check spacer assembly with residual pressure release valve.

  \*2 Specified layout: Indicate the wiring specifications on the manifold specification sheet. (Note that 2-position double, 3-position, and 4-position valves cannot be used where single wiring has been specified.)
- This also includes the number of the blanking plate assembly.
- Since R2 type SI unit has 8 outputs, note that up to 8 solenoids can be accommodated.

#### 4 P, E port entry

	_ I
U*1	U side (2 to 10 stations)
<b>D</b> *1	D side (2 to 10 stations)
В	Both sides (2 to 16 stations)

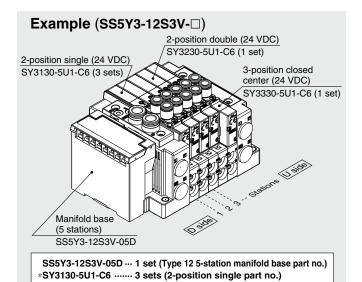

\*1 § For type "S", SUP/EXH block assembly with a built-in silencer, choose U or D for P, E port entry.

#### 5 SUP/EXH block assembly

Nil	Internal pilot
S	Internal pilot, Built-in silencer
R	External pilot

\* The P and E ports are only available on the U and D sides for the built-in silencer type. 3/5(E) port is plugged. The silencer exhaust port is located on the opposite side of the P and E port entry. (Example: When the P and E port entry is on the D side, the silencer exhaust port is on the U side.)

#### **How to Order Manifold Assembly**

• For the valve arrangement, the valve closest to the D side is considered the 1st station.

\*SY3230-5U1-C6 ...... 1 set (2-position double part no.)

\*SY3330-5U1-C6 ...... 1 set (3-position closed center part no.)

The asterisk denotes the symbol for the assembly.

Prefix it to the part numbers of the valve, etc.

Under the manifold part number, state the valves to be mounted in order starting
with the 1st station as shown in the figure above. If the arrangement becomes too
complicated, specify the details on a manifold specification sheet.

#### 6 P, E port size (One-touch fittings)

Symbol	SY3000	SY5000	SY7000	
Nil	ø8	ø10	ø12	
N	ø5/16"	ø3/8"	ø1/2"	1100

\* For N. sizes are in inches.

#### Mounting

<u> </u>			
Nil	Direct mounting  DIN rail mounting (With DIN rail)		
D			
D0	DIN rail mounting (Without DIN ra		
D3	For 3 stations	Specify a length	
:	:	longer than that of	
D16	For 16 stations	the standard rail.	

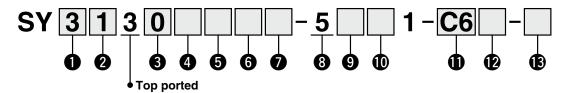

- \* If the DIN rail must be mounted without an SI unit, select D0. Then, refer to L3 of the dimensions for the DIN rail length and order separately. (Refer to page 203 for the DIN rail part number.)
- Refer to page 295 for the fixation of DIN rail mounting type manifold.

For details on the EX120 Integrated Type (For Output) Serial Transmission System, refer to the **Web Catalog** and the Operation Manual. For the part numbers of the SI units to be mounted, refer to page 196. Please download the Operation Manual via the SMC website, https://www.smcworld.com

#### How to Order Valves (With mounting screw)

Refer to page 15 for valve specifications.

#### Series

3	SY3000
5	SY5000
7	SY7000

2 Type of actuation

<u> </u>			
1	2-position	Single	
2		Double	
3	3-position	Closed center	
4		Exhaust center	
5		Pressure center	
<b>A</b> *1	4-position dual 3-port	N.C./N.C.	
B*1		N.O./N.O.	
C*1		N.C./N.O.	

\*1 Only the rubber seal type is available for the 4-position dual 3-port valve.

#### Seal type

0	Rubber seal
1	Metal seal

#### 4 Pilot type

Nil	Internal pilot
R	External pilot

#### Back pressure check valve (Built-in valve type)

Nil	None
Н	Built-in

- \* Only the rubber seal type is available. A manifold installed type is available if a back pressure check valve with a metal seal is required. Refer to page 212 for ordering examples. However, it is not recommended to use the built-in valve type and the manifold installed type at the same time because it will reduce the flow.
- The built-in valve type back pressure check valve is not available for the 3-position type or the SY7000.

#### 6 Pilot valve option

Nil	Standard (0.7 MPa)	
В	Quick response type (0.7 MPa)	
<b>K</b> *1	High pressure type (1.0 MPa)	

\*1 Only the metal seal type is available for the high pressure type.

#### A Call tuna

	ii type		
Nil	Standard		
Т	With power saving circuit (Continuous duty type)		

- \* Be sure to select the power saving circuit type if the valve is to be continuously energized for long periods of time.
- Be careful of the energizing time when the power saving circuit is selected. Refer to page 292 for details.

#### 8 Rated voltage

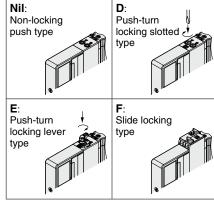

5	24 VDC
	27 100

#### 9 Light/surge voltage suppressor and common specification

Symbol	With light	Surge voltage suppressor	Common specification	
R	_		Non-polar	
U	•	•		
S			Positive	
Z	•		common	
NS	_		Negative	
NZ	•		common	

- Select "R," "U," "S," or "Z" for the valve when the SI unit specification is positive common. Select "R," "U," "NS," or "NZ" for the valve when the SI unit specification is ZBN (negative common).
- Only "Z" and "NZ" types are available with a power saving circuit.

#### Manual override

Refer to page 34 for the safety slide locking manual override.

16	16 stations		
02	2 stations	Considered laws wh*2	
:	:	Specified layout*2 (Up to 32 solenoids available)	
24	24 stations	(Op to 32 soleriolds available)	

#### In the case of the 16-output SI unit

		•
Symbol	Stations	Note
02	2 stations	
•	:	Double wiring*1
08	8 stations	
02	2 stations	Consisted lawww.k*2
:	:	Specified layout*2 (Up to 16 solenoids available)
16	16 stations	(Op to 10 soleriolds available)

- \*1 Double wiring: 2-position single, double, 3-position, and 4-position valves can be used on all manifold stations. Use of a 2-position single solenoid will result in an unused control signal. If this is not desired, order with a specified layout.
- \*2 Specified layout: Indicate the wiring specifications on the manifold specification sheet. (Note that 2-position double, 3-position, and 4-position valves cannot be used where single wiring has been specified.)
- This also includes the number of the blanking plate assembly.
- For the product without the SI unit (S80), note the maximum number of solenoids of the SI unit that will be mounted. If the layout is specified, indicate it on the manifold specification sheet.

#### **How to Order Manifold Assembly**

SS5Y3-10S8V2-05D-C6 ··· 1 set (Type 10 5-station manifold base part no.)		
*SY3100-5U1 3 sets (2-position single part no.)		
*SY3200-5U1 1 set (2-position double part no.)		
*SY3300-5U1 1 set (3-position closed center part no.)		
► The asterisk denotes the symbol for the assembly.		
Prefix it to the part numbers of the valve letc		

- For the valve arrangement, the valve closest to the D side is considered the 1st station.
- Under the manifold part number, state the valves to be mounted in order starting with the 1st station as shown in the figure above. If the arrangement becomes too complicated, specify the details on a manifold specification sheet.
- When mixing top-ported configurations, select from those listed on page 156-8. In such cases, use caution as there is also output on the A and B ports on the base side. Specify on the manifold specification sheet if plugs are required for the A and B

#### P, E port entry, SUP/EXH block assembly

<u> </u>				
P, E port entry	Internal pilot	Internal pilot, Built-in silencer	External pilot	
U side (2 to 10 stations)	U	С	G	
D side (2 to 10 stations)	D	E	Н	
Both sides (2 to 24 stations)	В	F	J	

- 3/5(E) port is plugged for the built-in silencer type.
- When the built-in silencer type is used, keep the exhaust port from coming in direct contact with water or other liquids.

For details on the EX180 Integrated Type (For Output) Serial Transmission System, refer to the Web Catalog and the Operation Manual. For the part numbers of the SI units to be mounted, refer to page 196-1. Please download the Operation Manual via the SMC website:

https://www.smcworld.com

## Plug-in Connector Connecting Base

**EX180** 

Type 12
Top Ported

# SY3000/5000/7000 Series

CE CA CRUS ROHS

#### How to Order Manifolds

#### Series

3	SY3000
5	SY5000
7	SY7000

#### 3 SI unit output polarity, Number of outputs

	32 outputs	16 outputs
Without SI unit	N	iil
Positive common (NPN)	2	3
Negative common (PNP)	4	5

- \* When "V" (CC-Link) is selected for the SI unit, only symbol "2" or "4" (32 outputs) can be selected.
- Ensure a match with the common specification of the valves to be used.

#### 2 SI unit

0	Without SI unit
Q	DeviceNet®
V	CC-Link

Only the connector block assembly is mounted for models without an SI unit.

#### 4 Communication connector

Nil	T-branch type	
Α	Straight type	

- \* The communication connector and power connector are shipped together with the manifold. The power connector is only available for the straight type.
- When not selecting an SI unit, the symbol will be "nil."

Symbol	Stations	Note
02	2 stations	
:	:	Double wiring*1
16	16 stations	
02	2 stations	Considered laws which
1	:	Specified layout*2 (Up to 32 solenoids available)
24	24 stations	(Op to 32 sole lolds available)

#### In the case of the 16-output SI unit

In the case of the 32-output SI unit

Valve stations

Symbol	Stations	Note
02	2 stations	
:	:	Double wiring*1
08	8 stations	
02	2 stations	0
•	:	Specified layout*2 (Up to 16 solenoids available)
16	16 stations	(Op to 10 solerious available)

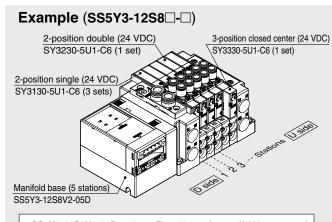

- \*1 Double wiring: 2-position single, double, 3-position, and 4-position valves can be used on all manifold stations. Use of a 2-position single solenoid will result in an unused control signal. If this is not desired, order with a specified layout.
- \*2 Specified layout: Indicate the wiring specifications on the manifold specification sheet. (Note that 2-position double, 3-position, and 4-position valves cannot be used where single wiring has been specified.)
- \* This also includes the number of the blanking plate assembly.
- \* For the product without the SI unit (S80), note the maximum number of solenoids of the SI unit that will be mounted. If the layout is specified, indicate it on the manifold specification sheet.

### P, E port entry, SUP/EXH block assembly

P, E port entry	Internal pilot	Internal pilot, Built-in silencer	External pilot
U side (2 to 10 stations)	U	C*1	G
D side (2 to 10 stations)	D	E*1	Н
Both sides (2 to 24 stations)	В	_	J

- \*1 For SUP/EXH block assembly specifications, built-in silencer types will have P port entry stipulated.
- \* For built-in silencer type, P and E ports are available on U and D sides. 3/5(E) port is plugged. The silencer exhaust port is located on the opposite side of P, E port entry. (Example: When the P, E port entry is D side, the silencer exhaust port is U side.)
- When the built-in silencer type is used, keep the exhaust port from coming in direct contact with

#### **How to Order Manifold Assembly**

SS5Y3-12S8V2-05D ···· 1 set (Type 10 5-station manifold base part no.) \*SY3130-5U1-C6...... 3 sets (2-position single part no.) \*SY3230-5U1-C6------ 1 set (2-position double part no.) \*SY3330-5U1-C6------ 1 set (3-position closed center part no.)

The asterisk denotes the symbol for the assembly. Prefix it to the part numbers of the valve, etc.

- For the valve arrangement, the valve closest to the D side is considered the 1st station.
- Under the manifold part number, state the valves to be mounted in order starting with the 1st station as shown in the figure above. If the arrangement becomes too complicated, specify the details on a manifold specification sheet.

#### ■ P F port size (One-touch fittings)

<u>U F, I</u>	P, E port size (One-touch littings)			
Symbol	SY3000	SY5000	SY7000	D
Nil	ø8	ø10	ø12	
N	ø5/16"	ø3/8"	ø1/2"	

For N, sizes are in inches.

#### Mounting

• mounting				
Nil	Direct mounting  DIN rail mounting (With DIN rail)			
D				
D0	DIN rail mounting (Without DIN rail)			
D3	For 3 stations	Specify a longer		
:	:	rail than the		
D24	For 24 stations	standard length.		

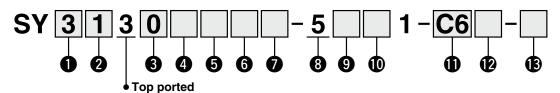

\* Refer to page 295 for the fixation of DIN rail mounting type manifold.

For details on the EX180 Integrated Type (For Output) Serial Transmission System, refer to the Web Catalog and the Operation Manual. For the part numbers of the SI units to be mounted, refer to page 196-1. Please download the Operation Manual via the SMC website: https://www.smcworld.com

## How to Order Valves (With mounting screw)

Refer to page 15 for valve specifications.

#### Series

3	SY3000
5	SY5000
7	SY7000

2 Type of actuation

Type of actuation

Т	NPTF

\* Only Nil is available for M5.

## **B** Type of mounting screw

Nil	Round head combination screw
В	Hexagon socket head cap screw
K	Round head combination screw (Drop prevention type)
Н	Hexagon socket head cap screw (Drop prevention type)

- \* For "K" and "H," the valve body cover has a drop prevention construction to stop the mounting screws from falling out when the valve is removed for maintenance, etc.
- When ordering a valve individually, the base gasket is not included.
   Since the base gasket is attached to the

manifold, please order the base gasket separately if it is needed for maintenance. Refer to page 367 for base gasket and mounting screw part numbers.

 "B" and "H" cannot be selected for the individual SUP/EXH spacer assembly or interface regulator.

Nil	Round head combination screw
В	Hexagon socket head cap screw
K	Round head combination screw (Drop prevention type)
Н	Hexagon socket head cap screw (Drop prevention type)

- \* For "K" and "H," the valve body cover has a drop prevention construction to stop the mounting screws from falling out when the valve is removed for maintenance, etc.
- When ordering a valve individually, the base gasket is not included. Since the base gasket is attached to the manifold, please order the base gasket separately if it is needed for maintenance. Refer to page 198 for base gasket and mounting screw part numbers.
- \* "B" and "H" cannot be selected for the individual SUP/EXH spacer assembly, interface regulator, or double check spacer assembly with residual pressure release valve.

( € CA

c **FLI**® US

The SY5000 can be mounted onto the SY7000 size manifold.

**How to Order Manifolds** 

Refer to page 175 for the dimensions of Type 11/ Bottom-ported type.

It is possible to mount the SY5000 size valves on all stations. In this case, there is no need to fill in part (3) in the order code. However, the manifold block width should be 19 mm.

- The valve pitch is 19 mm, the same as that of the SY7000.
- No symbol needs to be specified when fitting type "CM" or "LM" is selected.

#### Mounting and Option

<u> </u>				
Cumbal	Mounting	Option		
Symbol		Name plate	Station number	
Nil	Direct mounting	_	_	
AA		•	•	
BA		•	_	
D□	DIN rail mounting	_	_	
A□		•	•	
B□		•	_	

Enter the number of stations inside □ when it is larger than the number of valve stations. (Refer to "DIN Rail Option" above.)

**DIN Rail Option** 

Standard length

Without DIN rail (with bracket)

For 3 stations | Specify a longer rail than the total length For 24 stations of specified stations.

Nil

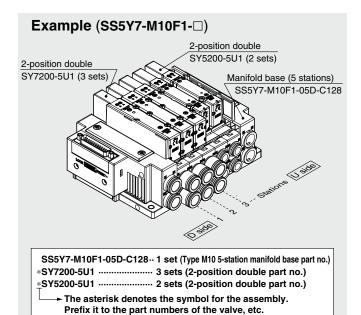

0

3

24

- Only direct mounting is available for the type 11 bottom-ported type.
- Refer to page 172 to determine the L3 using "Calculation formula" for the DIN rail length. (For the SY3000 and SY5000 mixed mounting type)
- The manifold block width is 19 mm for both the SY5000 and SY7000
- \* Refer to page 295 for the fixation of DIN rail mounting type manifold.

#### How to Order Manifold Assembly

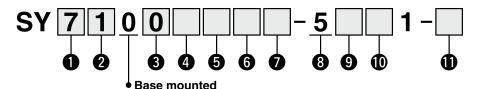

- For the valve arrangement, the valve closest to the D side is considered the 1st station. • Under the manifold part number, state the valves to be mounted in order starting
- with the 1st station as shown in the figure above. If the arrangement becomes too complicated, specify the details on a manifold specification sheet.
- When mixing top-ported configurations, select from those listed on page 178. In such cases, use caution as there is also output on the A and B ports on the base side.
  - Specify on the manifold specification sheet if plugs are required for the A and B ports on the base side.

#### How to Order Valves (With mounting screw)

Refer to page 15 for valve specifications.

#### Series

5	SY5000
7	SY7000

2 Type of actuation

O Type of actuation

	D0			
	D3	stations	Specify a length longer than that of the standard rail.	
	•	÷	[For the SS5Y5-M12, the SY5000 valve is now at a mountable	
	D24	For 24 stations	length (manifold block length of 16 mm).]	

- \* Refer to page 179 to determine the L3 using "Calculation formula" for the DIN rail length. (For the SY3000 and SY5000 mixed mounting type)
- \* Refer to page 295 for the fixation of DIN rail mounting type manifold.

## How to Order Manifold Assembly

SS5Y5-M12F1-05D ··· 1 set (Type M12 5-station manifold base part no.) \*SY5230-5U1-C8 ...... 3 sets (2-position double part no.)

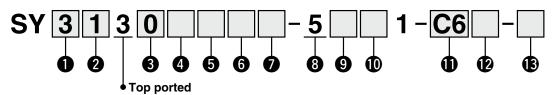

\*SY3230-5U1-C6 ...... 2 sets (2-position double part no.)

The asterisk denotes the symbol for the assembly. Prefix it to the part numbers of the valve, etc.

- For the valve arrangement, the valve closest to the D side is considered the 1st station.
- Under the manifold part number, state the valves to be mounted in order starting with the 1st station as shown in the figure above. If the arrangement becomes too complicated, specify the details on a manifold specification sheet.

## How to Order Valves (With mounting screw)

Refer to page 15 for valve specifications.

#### Series

3	SY3000
5	SY5000
7	SY7000

2 Type of actuation

• ',				
1	2-position	Single		
2		Double		
3	3-position	Closed center		
4		Exhaust center		
5		Pressure center		
A*1 B*1 C*1	4	N.C./N.C.		
	4-position dual 3-port	N.O./N.O.		
		N.C./N.O.		

\*1 Only the rubber seal type is available for the 4-position dual 3-port valve.

#### 3 Seal type

0	Rubber seal
1	Metal seal

#### 4 Pilot type

<u> </u>	ot typo
Nil	Internal pilot
R	External pilot

#### Back pressure check valve (Built-in valve type)

Г	Nil	None	
Н		Built-in	
*		he rubber seal type is available. A	
	manifold installed type is available if a back		

- pressure check valve with a metal seal is required. Refer to page 212 for ordering examples. However, it is not recommended to use the built-in valve type and the manifold installed type at the same time because it will reduce the flow.
- The built-in valve type back pressure check valve is not available for the 3-position type or the SY7000.

#### 6 Pilot valve option

Nil	Standard (0.7 MPa)	
В	Quick response type (0.7 MPa)	
<b>K</b> *1	High pressure type (1.0 MPa)	

\*1 Only the metal seal type is available for the high pressure type.

### Coil type

Nil	Standard
Т	With power saving circuit (Continuous duty type)

- Be sure to select the power saving circuit type if the valve is to be continuously energized for long periods of time.
- Be careful of the energizing time when the power saving circuit is selected. Refer to page 292 for details.

#### 8 Rated voltage

5	24 VDC
6	12 VDC

Only 24 VDC is available for the serial transmission type.

#### 9 Light/surge voltage suppressor and common specification

Symbol	With light	Surge voltage suppressor	Common specification	
Nil	_	_	Non-polar	
R				
U	•			
S	_		Positive	
Z	•	_	common	
NS	_		Negative	
NZ	•		common	

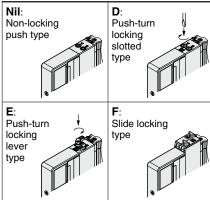

- "Nil" is not available for the SI unit manifold.
- For the non-polar type, be careful of surge voltage intrusion.

Refer to page 293 for details. (Excludes

when an SI unit manifold is used)
Only "Z" and "NZ" types are available with a power saving circuit. Select a valve which is suited to the SI unit output polarity or SI unit specification when the SI unit is selected. Refer to the pages below for details.

EX500: pp. 110, 112 EX600: p. 124 EX245: p. 124-1 EX250: p. 132 EX260: p. 140 EX126: p. 148 EX120: p. 156 EX180: p. 156-1

#### Manual override

Refer to page 34 for the safety slide locking manual override.

## A, B port size

#### Thread piping

Symbol	Port size	Applicable series			
M5	M5 x 0.8	SY3000			
01	1/8	SY5000			
02	1/4	SY7000

N9	ø5/16"	_	•	•		
N11	ø3/8"	_	_	•		

#### 1 Thread type

<b>•</b> • • • • • • • • • • • • • • • • • •					
Nil	Rc				
F	G				
N	NPT				
Т	NPTF				

\* Only Nil is available for M5.

## Type of mounting screw

Nil	Round head combination screw
В	Hexagon socket head cap screw
K	Round head combination screw (Drop prevention type)
Н	Hexagon socket head cap screw (Drop prevention type)

\* For "K" and "H," the valve body cover has a drop prevention construction to stop the mounting screws from falling out when the valve is removed for maintenance, etc.

When ordering a valve individually, the base gasket is not included. Since the base gasket is attached to the

manifold, please order the base gasket separately if it is needed for maintenance. Refer to page 198 for base gasket and mounting screw part numbers.

"B" and "H" cannot be selected for the individual SUP/EXH spacer assembly or interface regulator.

#### Calculation formula for dimensions with D-sub connector <IP40> and Flat ribbon cable

 $L1 = 12.5 \times n1 + 16 \times n2 + 76.4$  $L2 = 12.5 \times n1 + 16 \times n2 + 48$ 

M = (L1 + 6.1)/12.5 + 1 Decimal fractions are truncated.

 $L3 = 12.5 \times M + 23$ 

L4 = L3 - 10.5

(61.7)

L5 = (L3 - L1 + 6.1)/2

n1: Number of valve stations of the SY3000

n2: Number of valve stations of the SY5000

Calculation formula for dimensions with D-sub connector <IP67>, Terminal block box (Spring type), Terminal block box, Lead wire, Circular connector, EX500/600/250/260/126/120 serial transmission

 $L1 = 12.5 \times n1 + 16 \times n2 + a + b \times n3$ 

 $L2 = 12.5 \times n1 + 16 \times n2 \times 48$ 

M = L1/12.5 + 1 Decimal fractions are truncated.

 $L3 = 12.5 \times M + 23$ 

L4 = L3 - 10.5

L5 = (L3 - L1)/2

 $L6 = b \times n3 + c$ 

- n1: Number of valve stations of the SY3000
- n2: Number of valve stations of the SY5000
- n3: Number of I/O units or input block stations
- Refer to pages 118 and 119 for dimensions of the EX600 serial transmission with I/O unit and page 129 for the EX250 serial transmission with input block when L6, b, and c are used for the calculation formula.

<sup>\*:</sup> Communication and power supply connectors are included.

Straight type

# Manifold Exploded View (Common Parts)

#### Type 10, 11, 12: How to Increase Connector Type Manifolds

1 Loosen the U-side tension bolt ⓐ, and remove the ® SUP/EXH end block assembly.

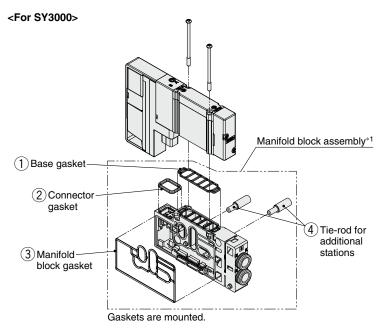

Screw them in until there is no gap between the tie-rods.

Connect the (A) manifold block assembly and (B) SUP/EXH end block assembly to be added, and tighten the tension bolt (a).

Tightening torque for tension bolt @ (M3): 0.8 N·m

#### **⚠** Caution

- Be sure to shut off the power and air supplies before disassembly.
  - Furthermore, since air may remain inside the actuator, piping and manifold, confirm that the air is completely exhausted before performing any work.
- When disassembly and assembly are performed, air leakage may result if the tightening of the tension bolt is inadequate.

\*1 Manifold block assembly

■ Cover assembly/Silencer cover assembly/Port block assembly for SUP/EXH (end) block assembly

#### **⚠** Caution

- Be sure to shut off the power and air supplies before disassembly.
  - Furthermore, since air may remain inside the actuator, piping, and manifold, confirm that the air is completely exhausted before performing any work.
- When disassembly and assembly are performed, air leakage may result if the tightening of the cover and port block assemblies are inadequate.

# Manifold Options **SY3000/5000/7000 Series**

#### **.** Caution

Tightening torque for mounting screw M2: 0.16 N·m (SY3000)

M3: 0.8 N·m (SY5000/7000)

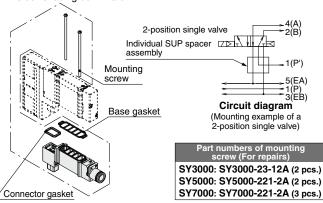

#### **Manifold Options**

#### ■ Individual SUP spacer assembly

[With a connector gasket, a base gasket, and two mounting screws (3 pcs. for the SY7000)]

When the same manifold is used for different pressures, an individual SUP spacer assembly is used as a supply port for different pressures.

- When selecting a One-touch fitting elbow type for a spacer assembly, use it faced upward, since it interferes with A and B port piping of Type 10 manifolds.
- When the elbows are facing upward in A and B ports in Type 10 manifolds, they will interfere with the piping for the spacer assembly. Therefore, combine the A and B ports with straight types or elbows facing downward.

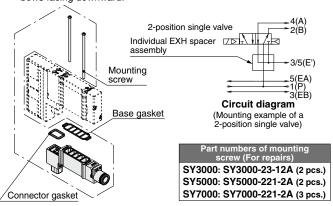

#### ■ Individual EXH spacer assembly

[With a connector gasket, a base gasket, and two mounting screws (3 pcs. for the SY7000)]

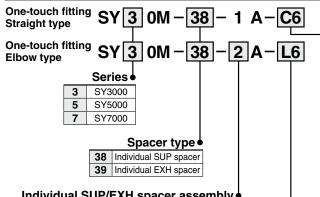

When valve exhaust affects other stations due to the circuit configuration, this spacer assembly is used for individual valve exhaust.

- When selecting a One-touch fitting elbow type for a spacer assembly, use it faced upward, since it interferes with A and B port piping of Type 10 manifolds.
- When the elbows are facing upward in A and B ports in Type 10 manifolds, they will interfere with the piping for the spacer assembly. Therefore, combine the A and B ports with straight types or elbows facing downward.

#### How to Order Individual SUP/EXH Spacer Assembly

\* Refer to pages 215 to 217 for dimensions.

#### Individual SUP/EXH spacer assembly

2	Short elbow type	
3	Long elbow type	

\* Select the long elbow type for a 3-position valve when using Type 11 and Type 12 downward. However, Type 11 of the SY3000 series for the mixed mounting of connector connecting bases cannot be used

#### ■ SUP stop valve spacer assembly with residual pressure release valve

[With a connector gasket, a base gasket, and two mounting screws (3 pcs. for the SY7000)]

It is used to shut off the supply air to valves individually.

 Cannot be selected when the elbows are facing upward in A and B ports in Type 10 manifolds, since they will interfere with the piping for the spacer assembly

\* For lever type:

When locking the lever type manual override, push the lever down in the PUSH position with your fingers until it stops, then turn the lever  $90^{\circ}$  clockwise. (PUSH  $\rightarrow$  LOCK)

Turning the lever without pushing it down until it stops can cause damage to the manual override and other problems such as air leakages.

To unlock the manual override, turn the lever counterclockwise. (LOCK → PUSH)

# Connector gasket Part numbers of mounting screw (For repairs) SY3000: SY30M-56-1A (2 pcs.) SY5000: SY50M-56-1A (2 pcs.) SY7000: SY70M-56-1A (3 pcs.)

# [How to mount SUP stop valve spacer assembly with residual pressure release valve] Insert the SUP stop valve mounting screw from the side of the spacer assembly, and mount it to the manifold.

Tighten the SUP stop valve mounting screw to the specified tightening torque. Mount the valve and tighten the valve mounting screws to the specified tightening torque after mounting the SUP stop valve spacer assembly with residual pressure release valve.

- \* Install the plate type nut to the spacer assembly as shown in the figure if it comes off. The SUP stop valve mounting screws can be tightened with a hexagon wrench without removing the plate type nut.
- \* When the elbows are facing upward in A and B ports in Type 10 manifolds, they will interfere with the piping for the spacer assembly. Therefore, combine the A and B ports with straight types or elbows facing downward.
- \* This product is only for internal pilot specifications, as the external pilot air cannot be shut off.
- If the product is equipped with a 3-position closed center, residual pressure cannot be released, so use in combination with a 3-port valve, which can be connected to the A, B piping port.

#### Tightening torque for mounting screw M2: 0.16 N·m (SY3000) M3: 0.8 N·m (SY5000/7000)

#### **Manifold Options**

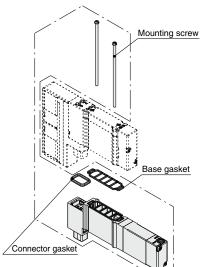

\* Refer to pages 215 to 217 for dimensions.

■ Double check spacer assembly with residual pressure release valve (Side/Bottom ported) [With a connector gasket, a base gasket, and two mounting screws (3 pcs. for the SY7000)] It is used to hold the intermediate position of the cylinder for a long period of time. Use a 3-position exhaust center valve when the double check spacer assembly with residual exhaust valve is used. It can also be used for drop prevention at the cylinder stroke end when supply residual pressure is released by using a 2-position single/double valve.

When the elbows are facing upward in A and B ports in Type 10 manifolds, they will interfere with the piping for the spacer assembly. Therefore, combine the A and B ports with straight types or elbows facing downward.

SY7000: SY7000-221-4A (3 pcs.)

#### **⚠** Caution

- Air leakage from the pipe between the valve and cylinder or from the fittings will prevent the cylinder from stopping for a long period of time. Check the leakage using neutral household detergent, such as dish washing soap. Also, check the cylinder's tube gasket, piston seal, and rod seal for air leakage.
- Combining with 3-position closed center or pressure center valve will not work.
- If the exhaust of the double check spacer is restricted too much, the cylinder may not operate properly
- Set the cylinder load so that the cylinder pressure will be within two times that of the supply pressure.
- If using a double check spacer that is built in to the sub-plate, refer to page 283.

- and may not stop intermediately.

M3: 0.8 N·m (SY5000/7000)

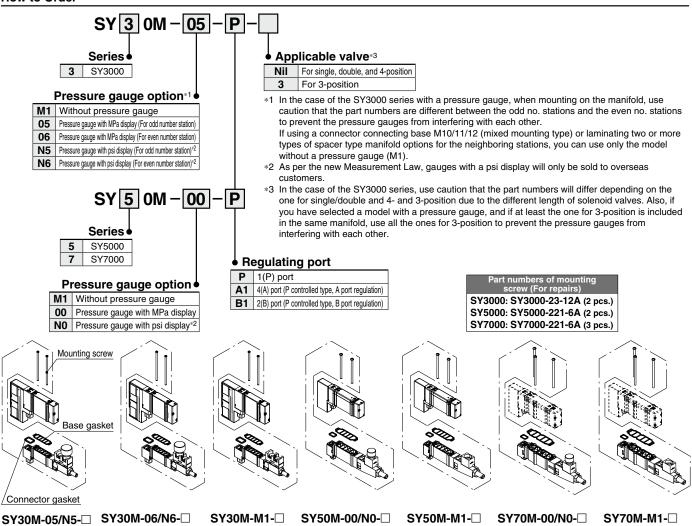

#### **Manifold Options**

#### ■ Individual SUP block assembly

On the circuit of the plug-in connector connection base, an individual SUP block assembly can be used to supply air to a series of valves if a separate air supply is required, or if addition air is required for additional air flow.

Individual SUP block assembly occupies 1 station.

Blocking disks also supplied (2 pieces). Can be used to block both sides of the number of stations being isolated for individual air supply (as shown in example).

- \* Specify the mounting position of the block as well as the position where the SUP passage is to be blocked on the manifold specification sheet. Blocking is required for 1 or 2 positions for 1 set. (2 SUP blocking disks to block SUP is attached to individual SUP block.)
- \* Electrical wiring is connected to a number of stations in the individual SUP block manifold.
- \* When used in M10/11/12 (mixed mounting type), select the SY50M type for SS5Y5 and the SY70M type for SS5Y7.
- \* A structure to prevent screws falling out is in place on the individual SUP block, making it much harder for the mounting screws to fall out.

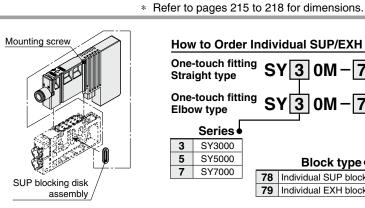

#### ■ Individual EXH block assembly

On the circuit of the plug-in connector connection base, individual EXH block assembly can be used to individually exhaust series of valves when the exhaust from the valves would affect a number of other stations.

Individual EXH block assembly occupies 1 station.

Blocking disks also supplied (4 pieces). Can be used to block both sides of the number of stations being isolated for individual exhaust. (as shown in example).

- \* Specify the mounting position of the block as well as the position where the EXH passage is to be blocked on the manifold specification sheet. Blocking is required for 1 or 2 positions for 1 set. (2 sets of EXH blocking disks (4 pcs.) to block EXH is attached to individual EXH block.)
- Electrical wiring is connected to a number of stations in the individual EXH block manifold.
- \* When used in M10/11/12 (mixed mounting type), select the SY50M type for SS5Y5 and the SY70M type for SS5Y7.
- \* A structure to prevent screws falling out is in place on the individual EXH block, making it much harder for the mounting screws to fall out.

Mixed Mounting Manifold

Fitting

#### **Manifold Options**

# ■ Blanking Plate with Output [With two mounting screws]

The blanking plate extracts the individual signal of the manifold valve.

#### **Specifications**

Number of outputs	2 outputs
Load voltage	12 VDC, 24 VDC (Dependent on the rated voltage of the built-in manifold)
Load current	42 mA/point (Max.)
Enclosure	Dust proof (M12 connector: IP67)

- $\ast\,$  For serial transmission-capable manifolds, only the 24 VDC is applicable.
- When non-polar type valves are mounted on the same manifold (excludes SI unit manifolds), be careful of surge voltage intrusion. Refer to page 293 for details.

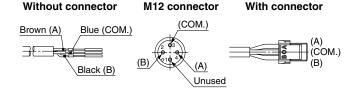

#### **⚠** Caution

Tightening torque for mounting screw
M2: 0.16 N·m

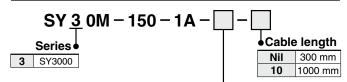

#### **Output Polarity**

Manifold common specifications	Α	В	COM.
Positive common	_	_	+
Negative common	+	+	_

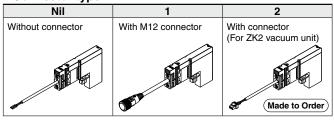

\* Specifications are the same as the manifold common specifications.

#### How to Order Blanking Plate with Output

Connector type

\* Refer to the specifications for output polarity.

### ■ SUP/EXH blocking disk assembly (for connector type manifold, Type 10, 11, 12)

#### [SUP blocking disk]

By inserting the SUP blocking disk in the pressure supply passage of the manifold valve, can provide two different high and low pressure in one manifold.

#### [EXH blocking disk]

By inserting the EXH blocking disk in the exhaust passage of the manifold valve, can separate the exhaust from the valve so it does not affect the other valves. It can also be used for the manifold for the positive pressure and vacuum mixed manifold. (2 pcs. are required to block FA/EB both sides of the EXH.)

3/5 3/5

B 2

Series	SUP blocking disk assembly	EXH blocking disk assembly

If the blocking disk assembly is ordered using the manifold specification sheet and ordered at the same time as the manifold, the position where the blocking disk assembly is inserted will be labeled and shipped out.

#### **Manifold Options**

#### ■ Back pressure check valve assembly (Retrofit or pre-installed type)

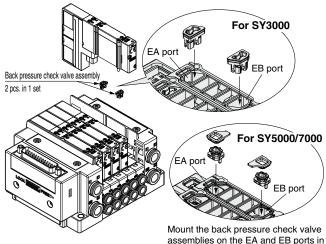

It prevents cylinder malfunction caused by other valve exhaust entry. Insert it into EA/EB port (valve mounting side) on the manifold side of a valve which is affected. It is effective when a single-acting cylinder is used.

- When ordering assemblies incorporated with a manifold, refer to the Ordering Example below (when installed in all stations.)
- When a check valve for back pressure prevention is desired and is to be installed only in certain manifold stations, clearly indicate the part number and specify the mounting position on the manifold specification sheet.

- 1. The manifold installed type back pressure check valve assembly is assembly parts with a check valve structure. However, since slight air leakage against the back pressure is allowed due to its structure, adverse effects of the back pressure due to increase in exhaust resistance cannot be prevented if the manifold exhaust port and other exhaust ports are put together for piping or if the piping diameter is narrowed. As a result, this may cause the actuator and air operated equipment to malfunction. So, be careful not to restrict the exh large, select a built-in valve ty
- 2. When the back pressure chec SMC for valve flow rate charac

The asterisk denotes the symbol for the assembly.

2.	careful not to restrict the exhaust air. If the exhaust resistance becomes large, select a built-in valve type with rubber seal.  When the back pressure check valve assembly is mounted, please contact SMC for valve flow rate characteristics.

Dual flow fitting

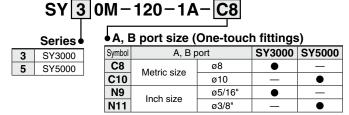

#### ■ Dual flow fitting (for connector connecting base, Type 10, side ported)

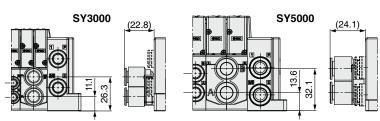

\*SY30M-24-1A-----5 sets (Back pressure check valve assembly part no.)

This is a fitting for cylinder ports which enables simultaneous actuation and increase in flow rate of valves for 2 stations.

\* When ordering assemblies incorporated into a manifold, refer to the Ordering Example below and specify on the manifold specification sheet.

#### **How to Order Dual Flow Fitting**

Ordering Example SS5Y3-10F1-08B-CM \*SY3100-5U1 \*SY30M-120-1A-C8 The asterisk denotes the symbol for the assembly.

> Specifically for side porting for a connector connecting base Cannot be attached to bottom or top ported, or mixed mounting

> types that are metal or connector connecting bases When adding or changing clips, push them into the very end of the manifold for each station. Also, make sure to use the clip that was packed together, as the clip and the fitting for one station differ among products that can be used with the SY5000. Not available for the SY7000 series

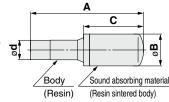

Refer to the table below to see which spacers are applicable.

Each type of anger	Series		
Each type of spacer	SY3000	SY5000	
Individual SUP (EXH) spacer assembly	×	0	
SUP stop valve spacer assembly with residual pressure release valve	×	0	
Double check spacer assembly with residual pressure release valve	×	0	
Interface regulator	×	×	

O: Can be built in X: Cannot be built in

#### ■ Silencer (One-touch fitting connection type)

This silencer can be mounted to the 3/5 (E: EXH) port of the manifold in one step.

Specific Product Precaution

#### Manifold Options

\* A transparent plastic plate to put a label with the name of the function of the solenoid valve

#### ■ If adding a name plate

If adding a name plate to a manifold in use, order a name plate bracket assembly, in addition to ordering a name plate. Refer to the table below for the part number and the amount.

#### Name plate part number

Мо	del	SS5Y3-10	SS5Y5-10/11	SS5Y7-(M)10/11	Note
Name	Printed	SY30M-86-□N	SY50M-86-□N	SY70M-86-□N	☐:Number of stations
plate	No printing	SY30M-86-□	SY50M-86-□	SY70M-86-□	(1 to 24)

#### Name plate bracket assembly part number and number of items ordered

Mode		SS5Y3-10	SS5Y5-10/11
Name plate assemb	ly part number	SY30M-85-1A	SY50M-85-1A
Manifold SUP/EXH	Internal pilot U/D piping	2 pcs.	
block assembly	Internal pilot double sided piping	2 pcs.	0 000
Pilot type and	External pilot U/D piping	1 pc.*1	2 pcs.
P, E port entry	External pilot double sided piping	Not required*1	

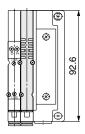

- \*1 If the manifold is an external pilot, an insertion slot for name plates is on the port block of the SUP/EXH block assembly. Thus, a bracket assembly is no longer required on the port piping side.
- \* Name plate bracket assembly is not required for the SY7000.

#### **⚠** Caution

- Be sure to shut off the power and air supplies before mounting the name plate bracket assembly. Furthermore, since air may remain inside the actuator, piping, and manifold, confirm that the air is completely exhausted before performing any work.
- When disassembly and assembly are performed, air leakage may result if the tightening of the bracket mounting screws is inadequate.

#### How to Order Valves (With mounting screw)

Refer to page 15 for valve specifications.

#### Series

3	SY3000
5	SY5000
7	SY7000

2 Type of actuation

2-position	Single
	Double
3 4 3-position 5	Closed center
	Exhaust center
	Pressure center
4 manikina	N.C./N.C.
dual 3-port	N.O./N.O.
	N.C./N.O.
	2-position 3-position 4-position

\*1 Only the rubber seal type is available for the 4-position dual 3-port valve.

#### 3 Seal type

	71
0	Rubber seal
1	Metal seal

Pilot type

Nil	Internal pilot
R	External pilot

# Back pressure check valve (Built-in valve type)

Nil	None
Н	Built-in

- \* Only the rubber seal type is available.
- The back pressure check valve is not available for the 3-position type or the SY7000.

#### 6 Pilot valve option

• I not raine opnon		
Nil	Standard (0.7 MPa)	
В	Quick response type (0.7 MPa)	
<b>K</b> *1	High pressure type (1.0 MPa)	

\*1 Only the metal seal type is available for the high pressure type.

#### Coil type

	ii typo
Nil	Standard
Т	With power saving circuit (Continuous duty type)

- Be sure to select the power saving circuit type if the valve is to be continuously energized for long periods of time.
- \* Be careful of the energizing time when the power saving circuit is selected. Refer to page 292 for details.

#### 8 Rated voltage

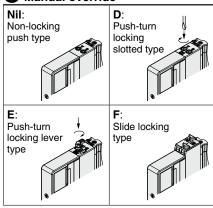

_		
	5	24 VDC
	6	12 VDC

# Light/surge voltage suppressor and common specification

Symbol	With light	Surge voltage suppressor	Common specification		
Nil	_	_			
R	_		Non-polar		
U	•				
S	_		Positive		
Z	•	_	common		
NS	_		Negative		
NZ	•		common		

- \* For the non-polar type, be careful of surge voltage intrusion. Refer to page 293 for details.
- Only "Z" and "NZ" types are available with a power saving circuit.

#### Manual override

 Refer to page 34 for the safety slide locking manual override

#### Type of mounting screw

.,,	
Nil	Round head combination screw
В	Hexagon socket head cap screw
K	Round head combination screw (Drop prevention type)
Н	Hexagon socket head cap screw (Drop prevention type)

- \* For "K" and "H," the valve body cover has a drop prevention construction to stop the mounting screws from falling out when the valve is removed for maintenance, etc.
- \* When ordering a valve individually, the base gasket is not included.

  Since the base gasket is attached to the manifold, please order the base gasket separately if it is needed for maintenance. Refer to page 266 for base gasket and mounting account not numbers.
- mounting screw part numbers.

  "B" and "H" cannot be selected for the individual SUP/EXH spacer assembly, interface regulator, or double check spacer assembly with residual pressure release valve.

8 Rated voltage

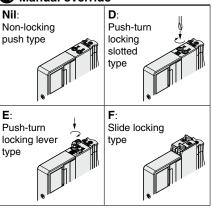

24 VDC

#### 9 Light/surge voltage suppressor and common specification

Symbol	With light	Surge voltage suppressor	Common specification		
R	_		Non-polar		
U	•		Non-polai		
S	_		Positive common		
Z	•	_	FOSILIVE COMMINON		
NS	_		Magativa common		
NZ	•		Negative common		

Only "Z" and "NZ" types are available with a power saving circuit. Select "R," "U," "S," or "Z" for the valve when the SI unit output polarity is Nil (positive common). Select "R," "U," "NS," or "NZ" for the valve when the SI unit output polarity is N (negative common).

#### Manual override

Refer to page 34 for the safety slide locking manual override.

## Type of mounting screw

	Nil	Round head combination screw						
B Hexagon socket head cap so								
	K	Round head combination screw (Drop prevention type)						
	Н	Hexagon socket head cap screw (Drop prevention type)						

For "K" and "H," the valve body cover has a drop prevention construction to stop the mounting screws from falling out when the valve is removed for maintenance, etc.

When ordering a valve individually, the base gasket is not included. Since the base gasket is attached to the manifold, please order the base gasket separately if it is needed for maintenance. Refer to page 266 for base gasket and

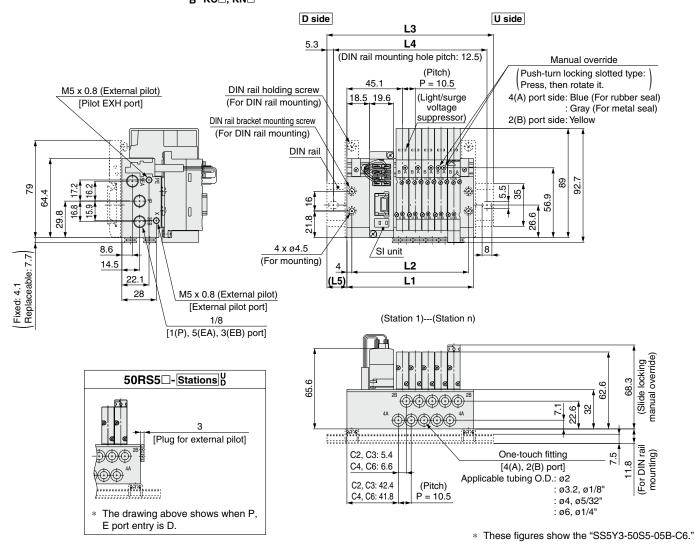

mounting screw part numbers.
"B" and "H" cannot be selected for the individual SUP/EXH spacer assembly, interface regulator, or double check spacer assembly with residual pressure release valve.

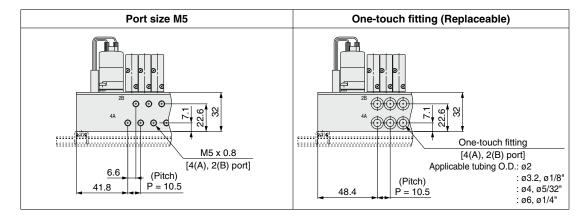

> Protective class class II (Mark: ⟨ii⟩)

## **How to Order Manifolds**

#### Series

3	SY3000
5	SY5000
7	SY7000

# **2** Type

F0.	Ton monted
52	Top ported
52R	Top ported, External pilot

# 4 Wiring type

	3 71 -
Nil	All double wiring*1
S	All single wiring*2

- \*1 All double wiring: 2-position single, double, 3-position, and 4-position valves can be used on all manifold stations.
- \*2 All single wiring: Available only for the manifold which has 2-position single for all stations Note that 2-position double, 3-, or 4-position valves cannot be used.
- \* If a mix of single and double wiring is required, it is supplied as a special order.

# **5** Valve stations

Symbol	Stations	Note
02	2 stations	All double
i	:	wiring
08 8 stations		wiiiig
02	2 stations	All single
<b>:</b> :		All single
12 12 stations		wiring

 This also includes the number of the blanking plate assembly.

# 3 SI unit output polarity

Nil	Positive common	
N	Negative common	

6 P, E port entry

U	U side*1
D	D side*1
В	Both sides

\*1 Plugs are mounted on the opposite side of the selected ports.

The asterisk denotes the symbol for the assembly. Prefix it to the part numbers of the valve, etc.

- For the valve arrangement, the valve closest to the D side is considered
  the 1st station.
- Under the manifold part number, state the valves to be mounted in order starting with the 1st station as shown in the figure above. If the arrangement becomes too complicated, specify the details on a manifold specification sheet.

Nil	Direct mounting		
D	DIN rail mounting (With DIN rail)		
D0	DIN rail mounting (Without DIN rail)		
D3	For 3 stations	Specify a length longer	
	:	than that of the standard rail.	
D12	For 12 stations		

 Refer to page 295 for the fixation of DIN rail mounting type manifold.

For details on the EX510 Gateway Type Serial Transmission System, refer to the **Web Catalog** and the Operation Manual. Please download the Operation Manual via the SMC website, https://www.smcworld.com

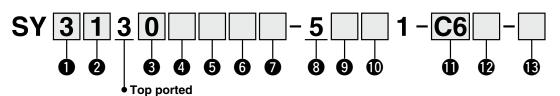

Valve Specifications

Valve Construction

# How to Order Valves (With mounting screw)

Refer to page 15 for valve specifications.

# Series

<b>O</b> 001100			
3	SY3000		
5	SY5000		
7	SY7000		

# 2 Type of actuation

	<u> </u>				
1	0	Single			
2	2-position	Double			
3		Closed center			
4	3-position	Exhaust center			
5		Pressure center			
<b>A</b> *1	4-position dual 3-port	N.C./N.C.			
<b>B</b> *1		N.O./N.O.			
C*1		N.C./N.O.			

\*1 Only the rubber seal type is available for the 4-position dual 3-port valve.

# 3 Seal type

O Sear type			
	0	Rubber seal	
	1	Metal seal	

# 4 Pilot type

Nil	Internal pilot
R	External pilot

# 5 Back pressure check valve (Built-in valve type)

Nil	None
Н	Built-in

- \* Only the rubber seal type is available.
- The back pressure check valve is not available for the 3-position type or the SY7000.

# 6 Pilot valve option

Nil Standard (0.7 MPa)	
В	Quick response type (0.7 MPa)
<b>K</b> *1	High pressure type (1.0 MPa)

\*1 Only the metal seal type is available for the high pressure type.

# Coil type

Nil	Standard	
Т	With power saving circuit (Continuous duty type)	

- \* Be sure to select the power saving circuit type if the valve is to be continuously energized for long periods of time.
- \* Be careful of the energizing time when the power saving circuit is selected. Refer to page 292 for details.

# 8 Rated voltage

# Light/surge voltage suppressor and common specification

Symbol	With light	Surge voltage suppressor	Common specification
R			Non-polar
U	•	•	
S			Positive
Z	•		common
NS	_		Negative
NZ	•		common

\* Only "Z" and "NZ" types are available with a power saving circuit. Select "R," "U," "S," or "Z" for the valve when the SI unit output polarity is Nil (positive common). Select "R," "U," "NS," or "NZ" for the valve when the SI unit output polarity is N (negative common).

## **.** Caution Tightening torque for mounting screw

# **Manifold Options**

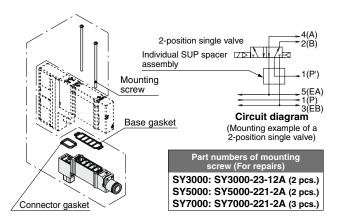

\* Refer to pages 276 to 278 for dimensions.

## ■ Individual SUP spacer assembly

[With a connector gasket, a base gasket, and two mounting screws (3 pcs. for the SY7000)]

When the same manifold is used for different pressures, an individual SUP spacer assembly is used as a supply port for different pressures.

When selecting a One-touch fitting elbow type for a spacer assembly, use it faced upward, since it interferes with A and B port piping of Type 50 manifolds.

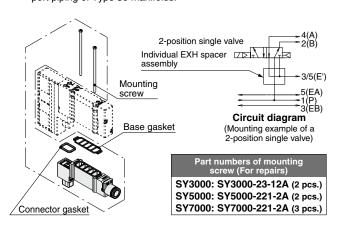

## ■ Individual EXH spacer assembly

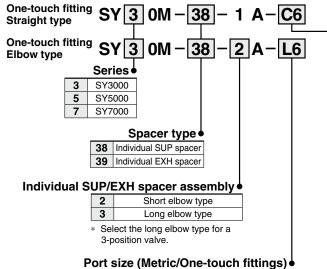

[With a connector gasket, a base gasket, and two mounting screws (3 pcs. for the SY7000)]

When valve exhaust affects other stations due to the circuit configuration, this spacer assembly is used for individual valve exhaust.

When selecting a One-touch fitting elbow type for a spacer assembly, use it faced upward, since it interferes with A and B port piping of Type 50 manifolds.

When using in combination with the  $SY_7^530_1^0\Box$ - $\Box$ 1-E (With residual pressure release valve), the length of the required mounting screws will differ. Please contact SMC for details.

# **.**⚠Caution

Tightening torque for mounting screw M2: 0.16 N·m (SY3000) M3: 0.8 N·m (SY5000/7000)

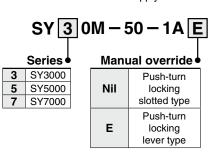

# **Manifold Options**

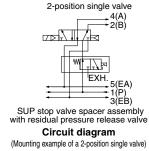

\* Refer to pages 276 to 278 for dimensions.

# ■ SUP stop valve spacer assembly with residual pressure release valve

[With a connector gasket, a base gasket, and two mounting screws (3 pcs. for the SY7000)]

It is used to shut off the supply air to valves individually.

\* For lever type

When locking the lever type manual override, push the lever down in the PUSH position with your fingers until it stops, then turn the lever  $90^{\circ}$  clockwise. (PUSH  $\rightarrow$  LOCK)

Turning the lever without pushing it down until it stops can cause damage to the manual override and other problems such as air leakages.

To unlock the manual override, turn the lever counterclockwise. (LOCK -> PUSH)

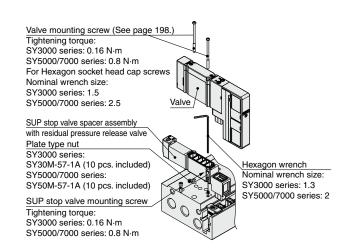

# Part numbers of mounting screw (For repairs) SY3000: SY30M-56-1A (2 pcs.) SY5000: SY50M-56-1A (2 pcs.) SY7000: SY70M-56-1A (3 pcs.)

# [How to mount SUP stop valve spacer assembly with residual pressure release valve]

Insert the SUP stop valve mounting screw from the side of the spacer assembly, and mount it to the manifold.

Tighten the SUP stop valve mounting screw to the specified tightening torque. Mount the valve and tighten the valve mounting screws to the specified tightening torque after mounting the SUP stop valve spacer assembly with residual pressure exhaust valve.

- \* Install the plate type nut to the spacer assembly as shown in the figure if it comes off. The SUP stop valve mounting screws can be tightened with a hexagon wrench without removing the plate type nut.
- \* This product is only for internal pilot specifications, as the external pilot air cannot be shut off.
- \* If the product is equipped with a 3-position closed center, residual pressure cannot be released, so use in combination with a 3-port valve, which can be connected to the A, B piping port.

# ■ Double check spacer assembly with residual pressure release valve (Side/Bottom ported)

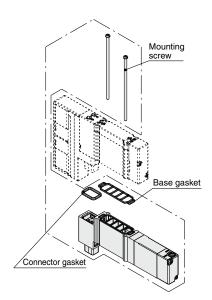

[With a connector gasket, a base gasket, and two mounting screws (3 pcs. for the SY7000)] It is used to hold the intermediate position of the cylinder for a long period of time. Use a 3-position exhaust center valve when the double check spacer assembly with residual exhaust valve is used.

It can also be used for drop prevention at the cylinder stroke end when supply residual pressure is released by using a 2-position single/double valve.

# **⚠** Caution

- · Air leakage from the pipe between the valve and cylinder or from the fittings will prevent the cylinder from stopping for a long period of time. Check the leakage using neutral household detergent, such as dish washing soap. Also, check the cylinder's tube gasket, piston seal, and rod seal for air leakage.
- Combining with 3-position closed center or pressure center valve will not work.
- If the exhaust of the double check spacer is restricted too much, the cylinder may not operate properly and may not stop intermediately.
- Set the cylinder load so that the cylinder pressure will be within two times that of the supply pressure.
- If using a double check spacer that is built in to the sub-plate, refer to page 283.

How to Order when mounting a special order (including Made-to-Order specification) valve on the sub-plate (Ordering example: X90)

SY30M-27-1-W1-01 ····· 1 set (Sub-plate single unit part no.)

\*SY3200-5U1-X90······· 1 set (2-position double part no./Main valve fluororubber specification)

Ordering example when mounting a manifold option (spacer, etc.)

SY30M-27-1-W1-01······ 1 set (Sub-plate single unit part no.)

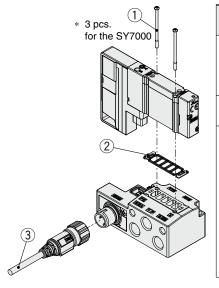

\*SY3400-5U1 ··········· 1 set (3-position exhaust center part no.)

\*SY30M-60-1A ·············· 1 set (Part no. for double check spacer with residual pressure release valve)

# **⚠** Caution

Due to the properties of the double check spacer, assembly carried out by the customer is not recommended. If a double check spacer is to be used, be sure to order the type that is built in to the sub-plate as shown in the ordering example above.

# Sub-plate Parts Nos.

# SY3000/5000/7000 Series Specific Product Precautions 1

Be sure to read this before handling the products. Refer to the back cover for safety instructions. For 3/4/5-port solenoid valve precautions, refer to the "Handling Precautions for SMC Products" and the "Operation Manual" on the SMC website: https://www.smcworld.com

#### **Environment**

# **Marning**

- Do not use valves in atmospheres of corrosive gases, chemicals, sea water, water, water vapor, or where there is direct contact with any of these.
- Products compliant with IP67 enclosures (based on IEC60529)
  are protected against dust and water, however, these products
  cannot be used in water. If using in an environment that is
  exposed to water and dust splashes, take measures such as
  using a protective cover.
- 3. When using built-in silencer type manifold with an IP67 enclosure, keep the exhaust port of the silencer from coming in direct contact with water or other liquids.
- The metal seal valve is provided with a hole to discharge the pilot EXH. When using in atmospheres containing water and dust, mount it horizontally.

#### **Valve Mounting**

# **A** Caution

Mount it so that there is no slippage or deformation in gaskets, and tighten with the tightening torque as shown to the right.

Series	Thread size	Tightening torque
SY3000	M2	0.16 N·m
SY5000/7000	М3	0.8 N·m

## **Manual Override**

# **Marning**

Regardless of an electric signal for the valve, the manual override is used for switching the main valve. Connected actuator is started by manual operation. Use the manual override after confirming that there is no danger.

■ Non-locking push type

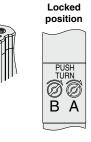

Push down on the manual override button until it stops.

#### ■ Push-turn locking slotted type [D type]

Push down on the manual override with a small flat head screwdriver until it stops, and then turn it  $90^{\circ}$  clockwise. The manual override is then locked. To release it, turn it counterclockwise.

If it is not turned, it can be operated the same way as the non-locking push type.  $\mid\mid$ 

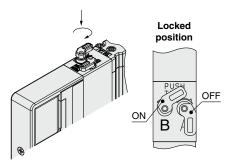

#### **Manual Override**

# **Marning**

### ■ Push-turn locking lever type [E type]

Push down on the manual override by finger until it stops, and then turn it  $60^{\circ}$  clockwise. The manual override is then locked. To release it, turn it counterclockwise. If it is not turned, it can be operated the same way as the non-locking push type.

Carefully check the manual override projection amount.

Max. (at OFF): 3.7 mm

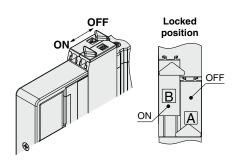

# **∧** Caution

Do not apply excessive torque when turning the manual override. [0.1 N·m]  $\,$ 

When locking the manual override, be sure to push it down before turning. Turning without first pushing it down can cause damage to the manual override and other trouble such as air leakage, etc.

#### ■ Slide locking type (Manual)

It is locked by sliding the manual override all the way in the direction indicated by the arrow (ON side) with a small flat head screwdriver or with your fingers. Slide it in the direction indicated by the arrow (OFF side) to release it.

# SY3000/5000/7000 Series Specific Product Precautions 2

Be sure to read this before handling the products. Refer to the back cover for safety instructions. For 3/4/5-port solenoid valve precautions, refer to the "Handling Precautions for SMC Products" and the "Operation Manual" on the SMC website: https://www.smcworld.com

#### **Back Pressure Check Valve**

# **⚠** Caution

•There are two types of back pressure check valves; the type which is built into a valve (rubber seal type only) and the type which is built in on the manifold side with a connector connection. Both types have a check valve built in to prevent back pressure.

Please note that for this reason, even if a valve with an external pilot specification is used, it cannot be pressurized from exhaust port [3/5(E)]. As compared with the types which do not integrate the back pressure check valve, C value of the flow rate characteristics goes down. Please contact SMC for details.

- The manifold installed type back pressure check valve assembly is assembly parts with a check valve structure. However, since slight air leakage against the back pressure is allowed due to its structure, adverse effects of the back pressure due to increase in exhaust resistance cannot be prevented if the manifold exhaust port and other exhaust ports are put together for piping or if the piping diameter is narrowed. As a result, this may cause the actuator and air operated equipment to malfunction. So, be careful not to restrict the exhaust air. If the exhaust resistance becomes large, select a built-in valve type with rubber seal.
- Do not switch valves when A or B port is open to the atmosphere, or while the actuators and air operated equipment are in operation. For built-in valve type with rubber seal, the back pressure prevention seal may be peeled off, which may cause air leakage or malfunctions. Use caution especially when performing a trial operation or maintenance work.

#### **Exhaust Throttle**

# **⚠** Caution

The SY series pilot valve and main valve share a common exhaust inside the valve. Therefore, do not block the exhaust port when arranging the piping.

#### Used as a 3-Port Valve

# **⚠** Caution

#### ■ In case of using a 5-port valve as a 3-port valve

The SY3000/5000/7000 series can be used as normally closed (N.C.) or normally open (N.O.) 3-port port valves by closing one of the cylinder ports 4(A) or 2(B) with a plug. However, they should be used with the exhaust ports kept open. They are convenient at times when a double solenoid type 3-port valve is required.

Plu	g position	B port	A port
Type of actuation		N.C.	N.O.
Number of solenoids	Single	(A)4 2(B) (EA)5 1 3(EB)	(A)4 2(B) (EA)5 1 3(EB) (P)
Number of	Double	(A)4 2(B) (EA)5 1 3(EB) (P)	(A)4 2(B) (EA)5 1 3(EB) (P)

#### **Valve and Manifold Combination**

The SY series plug-in valve has the common configuration of the valve mounting surface between base-mounted type (SY $\frac{3}{5}$  $\square 0$  $\square$ ) and top-ported type (SY $\frac{3}{5}$  $\square 3$  $\square$ ), therefore, it can be mounted to all manifolds of the side-ported type (Type 50 and Type 10), the bottom-ported type (Type 51 and Type 11), and the top-ported type (Type 52 and Type 12). For example, air output can be obtained from both sides of the A and B ports of the manifold and the valve by mounting a top-ported valve to a side-ported or bottom-ported manifold, and a pressure switch can be connected to the output port on one side. However, when selecting valves and manifolds, note that when a base-mounted valve is mounted to a top-ported manifold, there will be no output from the A and B port.

Valve Construction

# SY3000/5000/7000 Series Specific Product Precautions 3

Be sure to read this before handling the products. Refer to the back cover for safety instructions. For 3/4/5-port solenoid valve precautions, refer to the "Handling Precautions for SMC Products" and the "Operation Manual" on the SMC website: https://www.smcworld.com

# ■ Non-polar type

With surge voltage suppressor (□R)

#### Single solenoid

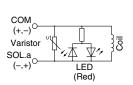

#### Double solenoid

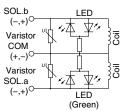

#### With light/surge voltage suppressor (□U)

#### Single solenoid

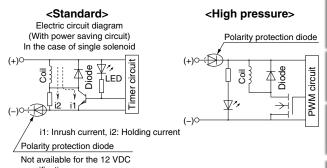

# Double solenoid

## ■ With power saving circuit

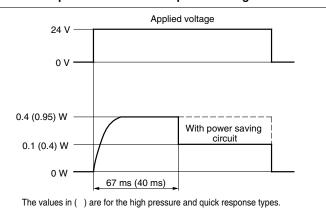

Power consumption is decreased to approx. 1/3 compared with the standard product by reducing the wattage required to hold the valve in an energized state. (Effective energizing time is over 67 ms at 24 VDC.)

\* Be careful of the energizing time, as quick response and high pressure types will become operational when the energizing time is over 40 ms.

The circuit shown above reduces the power consumption for holding in order to save energy. Refer to the electrical power waveform as shown below.

#### <Electrical power waveform with power saving circuit>

- The 12 VDC specification with power saving circuit (standard specification) does not have the polarity protection diode. Do not make a mistake with the polarity.
- Since the voltage will drop by approx. 0.5 V due to the transistor, pay attention to the allowable voltage fluctuation. (For details, refer to the solenoid specifications of each type of valve.)

#### Residual voltage of the surge voltage suppressor

\* If a varistor or diode surge voltage suppressor is used, there is some residual voltage to the protection element and rated voltage. Therefore, refer to the table below and pay attention to the surge voltage protection on the controller side. Also, since the response time does change, refer to the valve specifications on page 16.

#### **Residual Voltage**

Surge voltage	DC		
suppressor	24 V	12 V	
S, Z	Approx. 1 V		
R, U	Approx. 47 V	Approx. 32 V	

# SY3000/5000/7000 Series Specific Product Precautions 4

Be sure to read this before handling the products. Refer to the back cover for safety instructions. For 3/4/5-port solenoid valve precautions, refer to the "Handling Precautions for SMC Products" and the "Operation Manual" on the SMC website: https://www.smcworld.com

#### **Continuous Duty**

# **⚠** Caution

If a valve is energized continuously for long periods of time, the rise in temperature due to heat-up of the coil assembly may cause a decline in solenoid valve performance, reduce service life, or have adverse effects on peripheral equipment. If the valve is energized continuously for long periods of time, be sure to use a valve with power saving circuit. In particular, if three or more adjacent stations on the manifold are energized simultaneously for extended periods of time or if the valves on A side and B side are energized simultaneously for long periods of time, take special care as the temperature rise will be greater.

#### **UL Approved Product**

# **⚠** Caution

When conformity to UL is required, the product should be used with a UL1310 Class 2 power supply.

The product is a UL approved product only if it has a **c Thus** mark on the body.

#### **Countermeasure for Surge Voltage Intrusion**

#### ■ Surge voltage intrusion

With non-polar type valves, at times of sudden interruption of the loading power supply, such as emergency shutdown, surge voltage intrusion may be generated from loading equipment with a large capacity (power consumption), and a valve in a de-energized state may switch over (see Figure 1). When installing a breaker circuit for the loading power supply, consider using a valve with polarity (with polarity protection diode), or install a surge absorption diode between the loading equipment COM line and the output equipment COM line (see Figure 2).

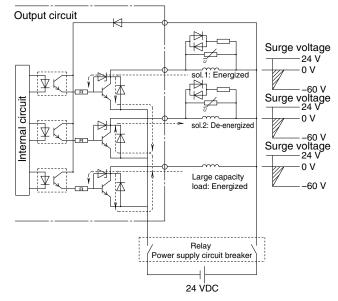

Figure 1. Surge intrusion circuit example (NPN outlet example) (24 VDC)

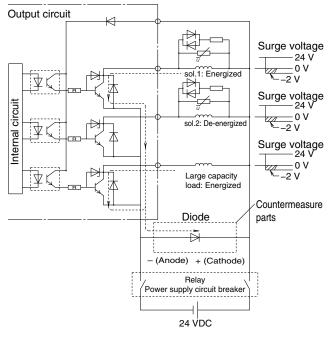

Figure 2. Surge intrusion countermeasure example (NPN outlet example) (24 VDC)

Valve Construction

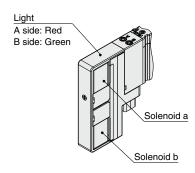

# SY3000/5000/7000 Series Specific Product Precautions 5

Be sure to read this before handling the products. Refer to the back cover for safety instructions. For 3/4/5-port solenoid valve precautions, refer to the "Handling Precautions for SMC Products" and the "Operation Manual" on the SMC website: https://www.smcworld.com

# **Light Indication**

When equipped with indicator light and surge voltage suppressor, the light window turns red when solenoid a is energized, and it turns green when solenoid b is energized.

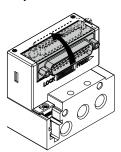

Type 5□ (Metal Base), Type 1□ (Connector Connecting Base) Changing Connector Entry Direction

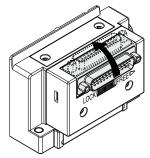

# **⚠** Caution

Connector direction for electrical entry of D-sub connector <IP40> and flat ribbon cable can be changed. If the directional change is required, slide the lever on the side of the connector block to the FREE position, and then change the direction as shown in the figure. Also, before connecting the connector, be sure to return the lever to the LOCK position. (If the lever is difficult to slide, move the connector a little bit to make it easier to slide the lever.)

If an excessive force is applied on the connector in the LOCK position, the connector block may be damaged. Also, using in such a way that the connector floats in the FREE position, it may cause the lead wire, etc., to break. Thus, refrain from using in these ways.

Type 5□ (Metal base)

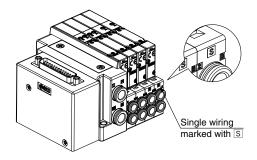

Type 1□ (Connector connecting base)

# **Manifold Indication Symbol**

# **⚠** Caution

The letter "S]" is indicated on manifold blocks for the SY series Type 1□ (connector connecting base) as shown below. This indication refers to the type of substrate assembly (single wiring) inside the manifold blocks. When there is no symbol, double wiring is used.

When the manifold specification sheet does not include a wiring specification, all stations will be double wiring specification. In this case, single and double solenoid valves can be mounted in any position, but when a single valve is used, there will be an unused control signal. To avoid this, indicate positions of manifold blocks for single wiring specification and double wiring specification on a manifold specification sheet. (Note that double, 3-, or 4-position valves cannot be used for manifolds blocks with single wiring specification S.)

Specific Product Precautions

# SY3000/5000/7000 Series Specific Product Precautions 6

Be sure to read this before handling the products. Refer to the back cover for safety instructions. For 3/4/5-port solenoid valve precautions, refer to the "Handling Precautions for SMC Products" and the "Operation Manual" on the SMC website: https://www.smcworld.com

#### Substrate Assemblies inside Manifolds

# **A** Caution

Substrate assemblies inside of manifolds cannot be taken apart. Attempting to do so may damage parts.

## **Fixation of DIN Rail Mounting Type Manifolds**

# **⚠** Caution

- 1. When the manifold is fixed with bolts on a mounting surface, etc., it can be operated just by fixing on both ends of the DIN rail if the bottom surface of the DIN rail is entirely in contact with the mounting surface when mounted horizontally. However, if it is used with other mounting or with side or reverse mounting, fix the DIN rail with bolts at regular intervals. As a guide, insert bolts in 2 locations for 2-5 stations, 3 locations for 6-10 stations, 4 locations for 11-15 stations, 5 locations for 16-20 stations, and 6 locations for 21-24 stations.
- 2. When using the manifold with DIN rail in an environment where any vibration or impact is applied to it, the DIN rail itself may be broken. In particular, if the installation surface vibrates when mounting the manifold on the wall or if a load is directly applied to the manifold, the DIN rail may be broken, causing the manifold to drop. When any vibration, impact, or load is applied to the manifold, be sure to use the direct mounting manifold.

Port Block Assembly and How to Change Piping Types between Top and Side

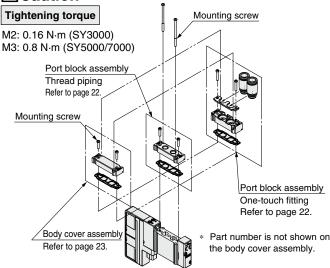

# **⚠** Caution

For the top-ported type, the port size of A and B ports can be changed by switching the port block assemblies which are mounted on the body. The piping method can also be changed by switching the top-ported type port block assembly with the side-ported type cover assembly. Also, it may cause air leakage if the mounting screws are not tightened securely enough when they are switched. Take care to tighten to the correct tightening torque.

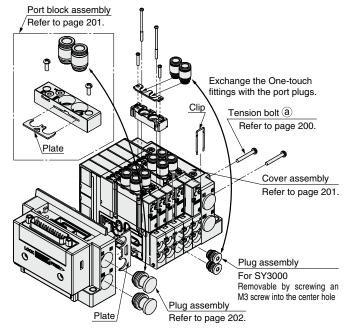

Refer to pages 22 and 23 for part numbers of port block assembly and body cover assembly for A, B port and page 201 for part numbers of port block assembly and body cover assembly for P, E port.

When switching them while valves are mounted on a manifold, remove the clip with a flat head screwdriver before switching the port plugs and the One-touch fittings. It may cause air leakage if the mounting screws are not tightened or the clip is not inserted securely enough when they are switched. Take care to tighten to the correct tightening torque.

## **⚠** Caution

# ■ How to change while mounted on a manifold

## SY3000/5000/7000 Series **Specific Product Precautions 7**

Be sure to read this before handling the products. Refer to the back cover for safety instructions. For 3/4/5-port solenoid valve precautions, refer to the "Handling Precautions for SMC Products" and the "Operation Manual" on the SMC website: https://www.smcworld.com

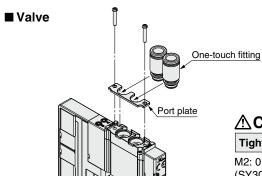

#### **How to Replace One-touch Fittings**

#### **.** Caution

By replacing One-touch fittings of valve or manifold base, it is possible to change the connection diameter of the 4(A), 2(B), 1(P), 3/5(E) ports.

When replacing the One-touch fittings, remove the clip or the plate and the plate mounting screws with a screwdriver before pulling the One-touch fittings off. Mount the One-touch fittings by following the removal procedure in reverse.

It may cause air leakage if the mounting screws are not tightened or the clip and the clip plate are not inserted securely enough when they are switched. Take care to tighten to the correct tightening torque. Refer to page 202 for part numbers of One-touch fittings for valve or manifold.

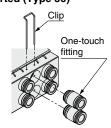

#### **∕** Caution

**Tightening torque**

#### Other Tube Brands

#### **⚠** Caution

1. When using other than SMC brand tube, confirm that the following specifications are satisfied with respect to the tube outside diameter tolerance.

1) Nylon tube within ±0.1 mm 2) Soft nylon tube within ±0.1 mm 3) Polyurethane tube within +0.15 mm -0.2 mm

Do not use tube which do not meet these outside diameter tolerances. It may not be possible to connect them, or they may cause other trouble, such as air leakage or the tube pulling out after connection.

#### **One-touch Fittings**

#### ■ Tube attachment/detachment for One-touch fittings

#### 1) Tube attachment

- 1. Take a tube having no flaws on its periphery and cut it off at a right angle. When cutting the tube, use tube cutters TK-1, 2, or 3. Do not use pliers, nippers, scissors, etc. If cutting is done with tools other than tube cutters, the tube may be cut diagonally or become flattened, etc., making a secure installation impossible, and causing problems such as the tube pulling out after installation or air leakage. Allow some extra length in the tube.
- 2. Grasp the tube and push it in slowly, inserting it securely all the way into the fitting.
- 3. After inserting the tube, pull on it lightly to confirm that it will not come out. If it is not installed securely all the way into the fitting, this can cause problems such as air leakage or the tube pulling out.

#### 2) Tube detachment

- 1. Push in the release button sufficiently, pushing its collar equally around the circumference.
- 2. Pull out the tube while holding down the release button so that it does not come out. If the release button is not pressed down sufficiently, there will be increased bite on the tube and it will become more difficult to pull it out.
- 3. When the removed tube is to be used again, cut off the portion which has been chewed before reusing it. If the chewed portion of the tube is used as is, this can cause trouble such as air leakage or difficulty in removing the

## SY3000/5000/7000 Series Specific Product Precautions 8

Be sure to read this before handling the products. Refer to the back cover for safety instructions. For 3/4/5-port solenoid valve precautions, refer to the "Handling Precautions for SMC Products" and the "Operation Manual" on the SMC website: https://www.smcworld.com

#### **One-touch Fittings**

#### **⚠** Caution

When fittings are used, they may interfere with one another depending on their types and sizes. Therefore, the dimensions of the fittings to be used should first be confirmed in their respective catalogs.

Fittings whose compliance with the SY series is already confirmed are stated below. If the fitting within the applicable range is selected, there will not be any interference.

#### **Revision History**

- Edition B \* The EX260 integrated type (for output) serial transmission system has been added.
  - \* EtherNet/IP™ and EtherCAT have been added to the EX600 integrated type (for input/output) serial transmission system (Fieldbus system).
  - \* Additional options:
  - $\cdot$  Interface regulator assembly  $\,\cdot$  Dual flow fitting
  - · Individual SUP block assembly · Name plate for manifolds
  - · Individual EXH block assembly
  - \* The part numbers for mixed port sizes of the A and B ports have been changed for type 10 (side ported), type 11 (bottom ported), and type 12 (top ported) plug-in connector connecting bases.
  - \* The mixed specification of A and B port piping has been deleted from the type 12 (top ported) plug-in connector connecting base.
  - \* Number of pages has been increased from 148 to 164.

- Edition C \* The SY7000 has been added.
  - \* A plug-in sub-plate (SY3000/5000) has been added.
  - \* A valve with a residual pressure release valve (SY5000) has been added.
  - \* A solenoid valve with a safety slide locking manual override has been added.
  - \* A D-sub connector (IP67) manifold has been added.
  - \* A PC wiring manifold (with power supply terminal) has been added.
  - \* Number of pages has been increased from 164 to 260.

#### SO

- Edition D \* A vacuum release valve with a restrictor has been added.
  - \* A dual port EX600 EtherNet/IP™ product has been added. \* Products for the EX500 gateway decentralized system 2 have been added.
  - \* A SUP stop valve spacer (with a residual pressure release valve) has been added.
  - \* A valve with a residual pressure release valve (SY7000) has been added.

#### \* Number of pages has been increased from 260 to 276.

- Edition E \* Flow rate characteristics (for the connector connecting base/manifold options) have been added.
  - \* A wireless system (EX600-W) has been added.
  - \* A valve with a 4(A)/2(B) port pressure sensor has been added.
  - \* A blanking plate with output has been added.
  - \* PC wiring has been deleted from the wiring types.
  - \* CC-Link has been deleted from the EX250 series.
  - \* The main/pilot valve common exhaust (-X16) option has been deleted from the made-to-order specifications.
  - \* The order of the catalog contents has been revised.
  - \* Number of pages has been increased from 276 to 304.

## **⚠** Safety Instructions

These safety instructions are intended to prevent hazardous situations and/or equipment damage. These instructions indicate the level of potential hazard with the labels of "Caution," "Warning" or "Danger." They are all important notes for safety and must be followed in addition to International Standards (ISO/IEC)\*1), and other safety regulations.

Caution: Caution indicates a hazard with a low level of risk which, If not avoided, could result in minor or moderate injury.

-----

Warning: Warning indicates a hazard with a medium level of risk which, if not avoided, could result in death or serious injury.

⚠ Danger: Danger indicates a nazaru wiun a nigin level on the first avoided, will result in death or serious injury. **Danger** indicates a hazard with a high level of risk which, \*1) ISO 4414: Pneumatic fluid power - General rules relating to systems.

ISO 4413: Hydraulic fluid power – General rules relating to systems.

IEC 60204-1: Safety of machinery - Electrical equipment of machines. (Part 1: General requirements)

ISO 10218-1: Manipulating industrial robots - Safety.

#### **⚠** Warning

1. The compatibility of the product is the responsibility of the person who designs the equipment or decides its specifications.

Since the product specified here is used under various operating conditions, its compatibility with specific equipment must be decided by the person who designs the equipment or decides its specifications based on necessary analysis and test results. The expected performance and safety assurance of the equipment will be the responsibility of the person who has determined its compatibility with the product. This person should also continuously review all specifications of the product referring to its latest catalog information, with a view to giving due consideration to any possibility of equipment failure when configuring the equipment.

2. Only personnel with appropriate training should operate machinery and equipment.

The product specified here may become unsafe if handled incorrectly. The assembly, operation and maintenance of machines or equipment including our products must be performed by an operator who is appropriately trained and experienced.

3. Do not service or attempt to remove product and machinery/ equipment until safety is confirmed.

- 1. The inspection and maintenance of machinery/equipment should only be performed after measures to prevent falling or runaway of the driven objects have been confirmed.
- 2. When the product is to be removed, confirm that the safety measures as mentioned above are implemented and the power from any appropriate source is cut, and read and understand the specific product precautions of all relevant products carefully.
- 3. Before machinery/equipment is restarted, take measures to prevent unexpected operation and malfunction.

4. Contact SMC beforehand and take special consideration of safety measures if the product is to be used in any of the following conditions.

- 1. Conditions and environments outside of the given specifications, or use outdoors or in a place exposed to direct sunlight.
- 2. Installation on equipment in conjunction with atomic energy, railways, air navigation, space, shipping, vehicles, military, medical treatment, combustion and recreation, or equipment in contact with food and beverages, emergency stop circuits, clutch and brake circuits in press applications, safety equipment or other applications unsuitable for the standard specifications described in the product catalog.
- 3. An application which could have negative effects on people, property, or animals requiring special safety analysis.
- 4. Use in an interlock circuit, which requires the provision of double interlock for possible failure by using a mechanical protective function, and periodical checks to confirm proper operation.

#### **⚠** Caution

1. The product is provided for use in manufacturing industries.

The product herein described is basically provided for peaceful use in manufacturing industries.

If considering using the product in other industries, consult SMC beforehand and exchange specifications or a contract if necessary.

If anything is unclear, contact your nearest sales branch.

#### Limited warranty and Disclaimer/ **Compliance Requirements**

The product used is subject to the following "Limited warranty and Disclaimer" and "Compliance Requirements".

Read and accept them before using the product.

#### **Limited warranty and Disclaimer**

- 1. The warranty period of the product is 1 year in service or 1.5 years after the product is delivered, whichever is first.\*2) Also, the product may have specified durability, running distance or
  - replacement parts. Please consult your nearest sales branch.
- 2. For any failure or damage reported within the warranty period which is clearly our responsibility, a replacement product or necessary parts will be provided. This limited warranty applies only to our product independently, and not to any other damage incurred due to the failure of the product.
- 3. Prior to using SMC products, please read and understand the warranty terms and disclaimers noted in the specified catalog for the particular products.
  - 2) Vacuum pads are excluded from this 1 year warranty.

A vacuum pad is a consumable part, so it is warranted for a year after it is delivered.

Also, even within the warranty period, the wear of a product due to the use of the vacuum pad or failure due to the deterioration of rubber material are not covered by the limited warranty.

#### Compliance Requirements

- 1. The use of SMC products with production equipment for the manufacture of weapons of mass destruction (WMD) or any other weapon is strictly prohibited.
- 2. The exports of SMC products or technology from one country to another are governed by the relevant security laws and regulations of the countries involved in the transaction. Prior to the shipment of a SMC product to another country, assure that all local rules governing that export are known and followed.

#### **⚠** Caution

SMC products are not intended for use as instruments for legal metrology.

Measurement instruments that SMC manufactures or sells have not been qualified by type approval tests relevant to the metrology (measurement) laws of each country. Therefore, SMC products cannot be used for business or certification ordained by the metrology (measurement) laws of each country.

# Modular Connection Type 5-Port Solenoid Valve

## Can be connected to F.R.L. units

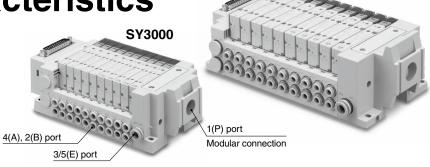

## Flow rate characteristics

C [dm³/(s·bar)]

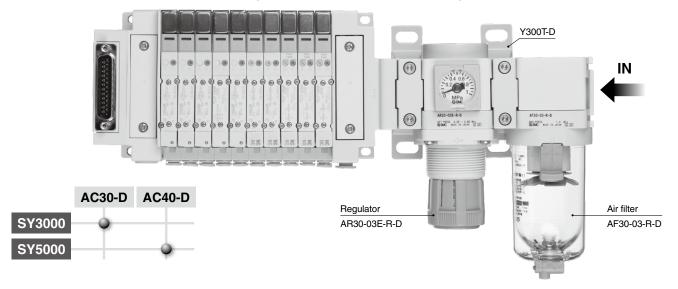

SY3000: 1.6\*1

SY5000: 3.6\*1

\*1 4/2 ⇒ 3/5 (A/B ⇒ E)

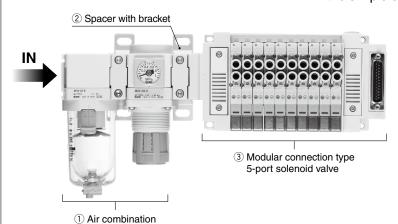

#### Allows for space saving and reduced piping labor.

#### **Simple Specials System**

For modular connection units (shipped assembled), the simple specials system can be used.

#### Ordering Example

- Products do not come assembled.
   They should be ordered separately and assembled by the customer.
- ① Air combination AC30C-03E-D ··············· 1 pc.
- 2 Spacer with bracket Y300T-D .....1 pc.
- Modular connection type/5-port solenoid valve
   SS5Y3-12F1-10U-X990 · · · · · · · · · · 1 pc.
  - \* SY3230-51-C4 ·······10 pcs.

	SY5A00	
	SY5B00	
	SY5C00	

## Valve Seal Type: Rubber Seal Top Ported (Type 12)

Manifold model	Valve model	Weight: W [g]*1 (n: stations)
SS5Y3	SY3130/SY3230	25.1n + 465
SS5Y5	SY5130/SY5230	66.3n + 717

<sup>\*1</sup> Weight: W is the value of the internal pilot and D-sub connector manifold with One-touch fitting straight piping type.

 The other specifications are the same as those of the standard model.
 For details, refer to the Web Catalog.

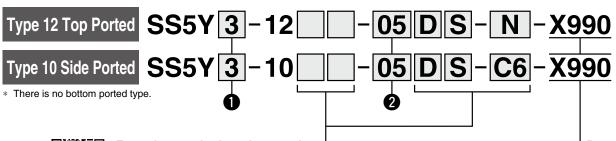

To obtain the weight with valves attached, add the valve weights given in the **Web Catalog** for the appropriate number of stations.

#### **How to Order Manifolds**

can be viewed here.

Enter the standard product number.

- \* The A and B ports are only compatible with straight unions.
- \* DIN rail mounting is not supported.

More information

P-port modular connection type SY3000 is 30.

SY5000 is 40.

<b>0</b> s	Series	Modular size

- \*1 Double wiring: 2-position single, 2-position double, 3-position, and 4-position valves can be used on all manifold stations. Use of a 2-position single solenoid will result in an unused control signal. If this is not desired, order with a specified layout.
- \*2 Specified layout: Indicate the wiring specifications on the manifold specification sheet. (Note that 2-position double, 3-position, and 4-position valves cannot be used where single wiring has been specified.)
- The blanking plate assembly is included in this number.

#### **How to Order Manifolds**

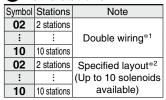

#### **EX500 128 Points: S**□

EX500 64 Points: S□

#### **EX600:** S6□□□

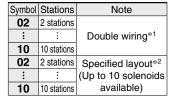

#### 2 Valve stations

- \*1 Double wiring: 2-position single, 2-position double, 3-position, and 4-position valves can be used on all manifold stations.
  - Use of a 2-position single solenoid will result in an unused control signal. If this is not desired, order with a specified layout.
- 2 Specified layout: Indicate the wiring specifications on the manifold specification sheet. (Note that 2-position double, 3-position, and 4-position valves cannot be used where single wiring has been specified.)
- \* The blanking plate assembly is included in this number.
- \* When the product without the SI unit (S0) is selected, note the maximum number of solenoids of the SI unit that will be mounted. If the layout is specified, indicate it on the manifold specification sheet. (Excludes the EX600)

#### **EX250:** S□□□

#### 2 Valve stations

- \*1 Double wiring: 2-position single, 2-position double, 3-position, and 4-position valves can be used on all manifold stations.
  - Use of a 2-position single solenoid will result in an unused control signal. If this is not desired, order with a specified layout.
- \*2 Specified layout: Indicate the wiring specifications on the manifold specification sheet.
- (Note that 2-position double, 3-position, and 4-position valves cannot be used where single wiring has been specified.)
- When determining the number of valve stations, note that the maximum number of solenoids for the AS-Interface applicable SI Unit specification is as follows.
- ·8 in/8 out specification: Max. 8 solenoids
- · 4 in/4 out specification: Max. 4 solenoids
- \* The blanking plate assembly is included in this number.
- \* For the product without the SI unit (S0), note the maximum number of solenoids of the SI unit that will be mounted. If the layout is specified, indicate it on the manifold specification sheet.

- \*1 Double wiring: 2-position single, 2-position double, 3-position, and 4-position valves can be used on all manifold stations.
  - Use of a 2-position single solenoid will result in an unused control signal. If this is not desired, order with a specified layout.
- \*2 Specified layout: Indicate the wiring specifications on the manifold specification sheet. (Note that 2-position double, 3-position, and 4-position valves cannot be used where single wiring has been specified.)
- \* The blanking plate assembly is included in this number.
- \* Since R2 type SI unit has 8 outputs, note that up to 8 solenoids can be accommodated. (For the EX120)

#### How to Order Equipped Valves (With mounting screw)

#### **Base Mounted**

EX500 (T	EX500 (Type SA2)  Refer to the table below for the L1 and L2 dimensions of the EX500 (Type SA2)											
L: Dimensi	ons											
n: Stations	2	3	4	5	6	7	8	9	10			
L1	146	162	178	194	210	226	242	258	274			
L2	87	103	119	135	151	167	183	199	215			

EX500 (Type SA3)  Refer to the table below for the L1 and L2 dimensions of the EX500 (Type SA3)											
L: Dimensio	ns										
n: Stations	2	3	4	5	6	7	8	9	10		
L1	146.2	162.2	178.2	194.2	210.2	226.2	242.2	258.2	274.2		
12	87	103	110	135	151	167	183	100	215		

EX600 (M12 Connector)	Calculate the L1 and L2 dimensions for the EX600 (M12 connector) using the formula shown below.

L1 =  $16 \times n1 + 167 + 47 \times n2$ L2 =  $16 \times n1 + 55$ n1: Valve stations

n2: I/O unit stations

#### Dimensions: SY5000 Series

#### EX600 (7/8 Inch Connector)

Calculate the L1 and L2 dimensions for the EX600 (7/8 inch connector) using the formula shown below.

L1 = 16 x n1 + 183.5 + 47 x n2 L2 = 16 x n1 + 55 n1: Valve stations

**EX250** 

n2: I/O unit stations

 $\label{lem:calculate} \mbox{ Calculate the L1 and L2 dimensions for the EX250 using the formula shown below.}$ 

L1 = 16 x n1 + 167 + 21 x n2 L2 = 16 x n1 + 55 n1: Valve stations n2: I/O unit stations

#### **EX260**

Refer to the table below for the L1 and L2 dimensions of the EX260.

#### L: Dimensions

n: Stations	2	3	4	5	6	7	8	9	10
L1	146.2	162.2	178.2	194.2	210.2	226.2	242.2	258.2	274.2
L2	87	103	119	135	151	167	183	199	215

#### **EX126**

Refer to the table below for the L1 and L2 dimensions of the EX126.

#### L: Dimensions

n: Stations	2	3	4	5	6	7	8	9	10
L1	206.8	222.8	238.8	254.8	270.8	286.8	302.8	318.8	334.8
L2	87	103	119	135	151	167	183	199	215

#### **EX120**

Refer to the table below for the L1 and L2 dimensions of the EX120.

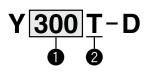

#### L: Dimensions

n: Stations	2	3	4	5	6	7	8	9	10
L1	142.2	158.2	174.2	190.2	206.2	222.2	238.2	254.2	270.2

Model	F	G	Н	J	K	Applicable	e size
Model Y300T-D	<b>F</b> 14	<b>G</b>	<b>H</b> 20	<b>J</b>	<b>K</b> 41	Applicable AC30	

#### **Specific Product Precautions**

Be sure to read this before handling the products. For safety instructions, 3/4/5-port solenoid valve precautions, SY3000/5000 specific product precautions, and F.R.L. units precautions, refer to the "Handling Precautions for SMC Products" and the "Operation Manual" on the SMC website: https://www.smcworld.com

#### Mounting

- When connecting other products such as F.R.L. units, use a spacer with a bracket (Y300T/Y400T-D series) to connect the manifold connection part so that no moment is applied.
- Be sure to secure the spacer with a bracket used for connection.
- Avoid excessive torsional moment and bending moment other than those caused by the manifold's own weight, as failure to do so may result in damage.
- Support external piping separately.
- Piping materials without flexibility, such as steel tube piping, are prone to being affected by excess moment loads and vibrations from the piping side. Use flexible tubing in between to avoid such effects.
