* It is when the cylinder is extending that is meter-out controlled by speed controller which is directly connected with cylinder, and its needle valve with being fully open.

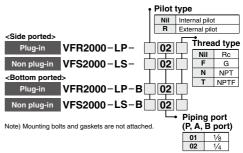

* The average velocity of the cylinder is what the stroke is divided by the total stroke time.

* Load factor: ((Load mass x 9.8)/Theoretical force) x 100%

How to Order Manifold Assembly

<Example> Plug-in type with terminal block (6 stations, one-piece junction cover)

VV5FR2-01T1-061-02 (-Q) 1 set (Manifold base part no.) vVFR2100-5FZ (-Q) 3 sets (2 position single part no.) *VFR2200-5FZ (-Q) 2 sets (2 position double part no.) *VVFS200-10A 1 set (Blanking plate assembly part no.)
The asterisk denotes the symbol for assembly. Prefix it to the part nos. of the solenoid valve, etc.

Valve arrangement is counted from the D side.

When ordering, specify the part nos. in order from the 1st. station in the D side

When entry of part numbers becomes complicated, indicate on the manifold specification sheet.

<Example> Non plug-in type: 6 stations

 VV5FR2-10-061-01 (-Q)
 1 set (Manifold base part no.)

 *VFR2110-5D (-Q)
 5 sets (2 position single part no.)

 *VFR2410-5D (-Q)
 1 set (3 position exhaust part no.)

 *VVFS2000-R-01-2
 1 set (1ndividual EXH spacer part no.)

 *Dreasterisk denotes the symbol for assembly. Prefix it to the part nos of the solenoid value, etc.

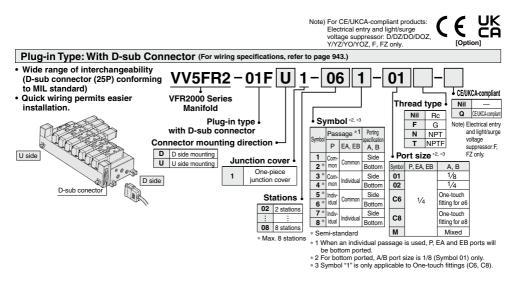

Valve arrangement is counted from the D side.

When ordering, specify the part nos. in order from the 1st. station in the D side. When entry of part numbers becomes complicated, indicate on the manifold specification sheet.

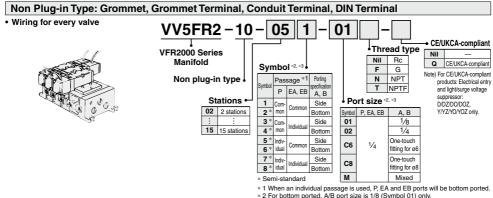

@SMC

5 Port Pilot Operated Solenoid Valve Rubber Seal, Plug-in/Non Plug-in VFR2000 Series

Note) P port or EA/EB port of symbol "3" to "8" can be individual port with block plate. Therefore, if using individual SUP spacer or individual EXH interface for individual port, its symbol is "1".

* 3 Symbol "1" is only applicable to One-touch fittings (C6, C8).

Note) P port or EA/EB port of symbol "3" to "8" can be individual port with block plate.

Therefore, if using individual SUP spacer or individual EXH spacer for individual port, its symbol is "1".

Manifold/Option Parts Assembly

Individual SUP spacer

Setting individual SUP spacer on the manifold block enables individual SUP port for each valve.

Bo	dy type	Plug-in type	Non plug-in type	
no.	Rc1/8	VVFS2000-P-01-1	VVFS2000-P-01-2	
Part	Rc1/4	VVFS2000-P-02-1	VVFS2000-P-02-2	

Individual EXH spacer

Setting individual EXH spacer on the manifold block enables individual EXH port for each valve.

Bo	dy type	Plug-in type	Non plug-in type		
t no.			VVFS2000-R-01-2		
Part	Rc1/4	VVFS2000-R-02-1	VVFS2000-R-02-2		

SUP block disk Note)

When supplying manifold with more than two different kinds of pressure, high and low, insert a block disk in between stations subjected to different pressures.

Body type	Plug-in type	Non plug-in type				
Part no.	AXT625-12A					

EXH block disk Note)

When valve exhaust affects the other stations in the circuit, insert EXH block disk in between stations to separate valve exhaust.

Body type	Plug-in type Non plug-in typ					
Part no.	AXT625-12A					

Note) Cannot be used for the 2 stations integrated manifold block

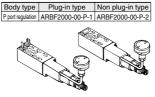

Throttle valve spacer

Needle valve set on the manifold block can control cylinder speed by throttling exhaust.

Interface regulator

Interface regulator set on the manifold block can regulate pressure for each valve. (Refer to "Flow Rate Characteristics" on page 941 before operation.)

Air release valve spacer

Valve VFR21□0 (single) can be used as air release valve by combining with release valve spacer.

Body type	Plug-in type	Non plug-in type				
Part no.	VVFS2000-24A-1	VVFS2000-24A-2 k				
Note) L: U side mount R: D side mount						

SUP stop valve spacer Note)

If SUP stop valve spacer is set, valve can be removed for maintenance without stopping air pressure supply for other valves.

Body type	Plug-in type	Non plug-in type					
Part no.	VVFS2000-37A-1	VVFS2000-37A-2					
(Height will be 23.2 mm higher.)							

Note) Used with manifold base.

Please contact SMC for details

Blanking plate

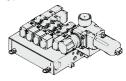

It is used by attaching on the manifold block for being prepared for removing a valve for maintenance reasons or planning to mount a spare valve, etc.

Body type	Plug-in type	Non plug-in type				
Part no.	VVFS2000-10A					

Manifold Option

With control unit Plug-in/Non plug-in type

- Filter, regulation valve, pressure switch
- and air release valve all combine to form one unit.
- Piping processes are eliminated.

For details, refer to page 863.

Stations	2 to 15 stations * (With multi-connector/D-sub connector: 2 to 8 stations)				

* Including station of control unit

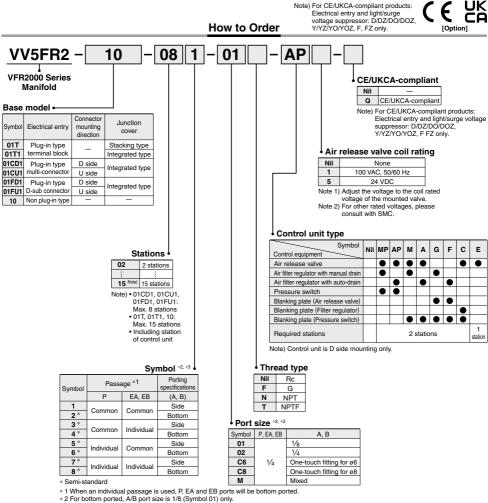

Control Unit Specifications

Air filter (With aut	o-drain/With manual drain)						
Filtration degree	5 µm						
Regulator							
Set pressure	0.05 to 0.85 MPa						
(Outlet pressure)	0.05 to 0.85 MFa						
Pressure switch							
Set pressure	0.1 to 0.6 MPa						
range: OFF	0.1 10 0.8 MFa						
Differential	0.08 MPa						
Contact	1a						
Indicator light	LED (RED)						
Max. switch	2 VA AC, 2 W DC						
capacity	2 VA AC, 2 W DC						
Max. operating	24 VDC or less: 50 mA						
current	100 VAC: 20 mA						
Inside voltage	4 V or less						
drop	4 V or less						
Air release valve	(Single only)						
Operating	0.2 to 0.9 MPa						
pressure range	0.2 10 0.9 WFa						

Control Unit/Option

Air ⁽¹⁾ release	<plug-in type=""> VVFS2000-24A-1R (D side mounting) VVFS2000-24A-1L (U side mounting)</plug-in>						
valve spacer	<non plug-in="" type=""> VVFS2000-24A-2R (D side mounting) VVFS2000-24A-2L (U side mounting)</non>						
Pressure switch	IS1000P-2-1						
Blanking	For filter regulator	MP2-2					
plate	For pressure switch	MP3-2					
plato	For air release valve AXT625-18A						
Filter element	111511-5B						

Note 1) Refer to "Manifold Option" on page 862. Note 2) Pressure switch cannot be mounted later on non plug-in type.

* 3 Symbol "1" is only applicable to One-touch fittings (C6, C8).

Note) P port or EA/EB port of symbol "3" to "8" can be individual port with block disk.

Therefore, if using individual SUP spacer or individual EXH spacer for individual port, its symbol is "1".

How to Order Manifold Assembly

<Example> Plug-in type with terminal block

VV5FR2-01T1-091-02-MP5 (-Q) 1 set (Manifold base part no.)
*VFR2100-5FZ (-Q) 5 sets (2 position single part no.)
*VFR2200-5FZ (-Q) ······ 2 sets (2 position double part no.)
The asterisk denotes the symbol for assembly. Prefix it to the part nos. of the solenoid valve, etc.

The 1st and 2nd station are used for control unit mounting.

When ordering, specify the part nos. in order from the 3rd. station in the D side. When entry of part numbers becomes complicated, indicate on the manifold specification sheet. <Example> Non plug-in type

 VV5FR2-10-071-01-M5 (-Q)
 1 set (Manifold base part no.)

 *VFR2110-5D (-Q)
 5 sets (2 position single part no.)

The asterisk denotes the symbol for assembly. Prefix it to the part nos. of the solenoid valve, etc.

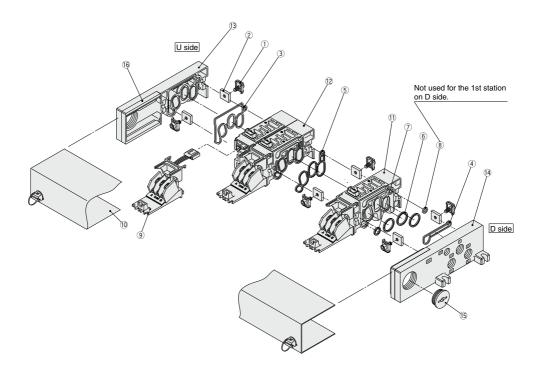

The 1st and 2nd station are used for control unit mounting. When ordering, specify the part nos. in order from the 3rd. station in the D side. When entry of part numbers becomes complicated, indicate on the manifold specification sheet.

Manifold with Control Unit: Plug-in Type/Non Plug-in Type

Manifold Base Construction — Plug-in Type, Non Plug-in Type

* Manifold Base/Construction: Plug-in type with terminal block (01T1).

- For increasing the manifold bases, please order the manifold block assembly number of the principle number assembly (1) and (2). For plug-in type: The manifold base with terminal stand (integrated with a junction cover) is required with the (1) junction cover assembly.
- · Manifold base is consisted of the junction of 2 and 3 station bases.

$Example) \ \fbox{U side} \ (n) \cdots (6) \cdots (5) \cdots (4) \cdots (3) \cdots (2) \cdots (1) \ \fbox{D side}$						
<5 stations (Odd number)>	2 stations	2 stations	1 station			
<6 stations (Even number> [2 stations 2 sta	tions 1 station	1 station			

Note) When A and B ports are C6 or C8, the manifold base is consisted of 1 station base.

Note) If silencer is mounted to EA/EB port, use silencer "AN403-04" (O.D. ø27).

How to Order Manifold Assembly

<Example> Plug-in type with terminal block: 6 stations

VV5FR3-01T-061-02 (-Q) 1 set (Manifold base part no.)
*VFR3100-5FZ (-Q)
*VFR3200-5FZ (-Q) 2 sets (2 position double part no.)
*VVFS3000-10A ······ 1 set (Blanking plate)
The asterisk denotes the symbol for assembly. Prefix it to the part nos. of the solenoid valve, etc.

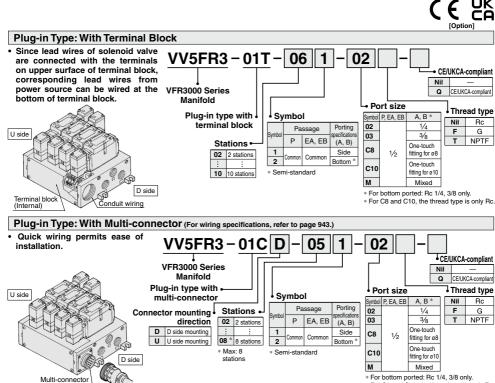

Valve arrangement is counted from the D side

When ordering, specify the part nos. in order from the 1st. station in the D side When entry of part numbers becomes complicated, indicate on the manifold specification sheet. <Example> Non plug-in type: 6 stations

VV5FR3-10-061-03 (-Q) ········ 1 set (Manifold base part no.)
*VFR3110-5D (-Q) 5 sets (2 position single part no.)
*VFR3410-5D (-Q) 1 set (3 position exhaust center part no.)
*VVFS3000-R-03-2 ······· 1 set (Individual EXH spacer part no.)
The asterisk denotes the symbol for assembly. Prefix it to the part nos. of the solenoid valve, etc.

Valve arrangement is counted from the D side.

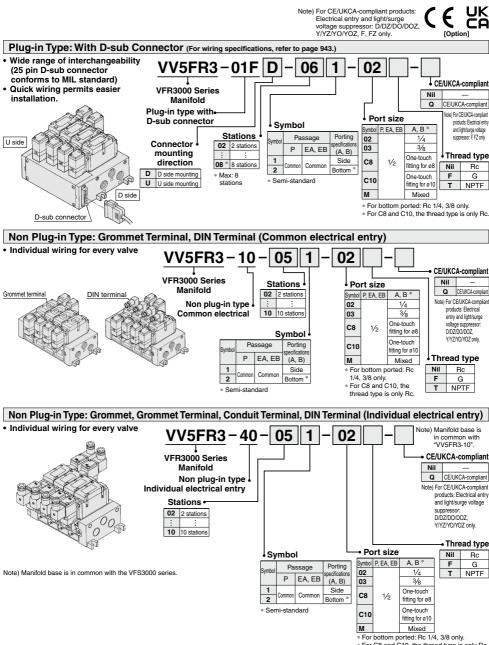

When ordering, specify the part nos. in order from the 1st. station in the D side. When entry of part numbers becomes complicated, indicate on the manifold specification sheet.

* For C8 and C10, the thread type is only Rc.

Manifold Specifications VFR3000 Series

* For C8 and C10, the thread type is only Rc.

Manifold/Option Parts Assembly

Individual SUP spacer

Setting individual SUP spacer on the manifold block enables individual SUP port for each valve.

Individual EXH spacer

Setting individual EXH spacer on the manifold block enables individual EXH port for each valve.

When supplying manifold with more than two different pressures, high and low, insert a block disk in between stations subjected to different pressures.

Body type	Plug-in type	Non plug-in type
Part no.	AXT636-1A	

EXH block disk Note)

When valve exhaust affects the other stations on the circuit, insert EXH block disk in between stations to separate valve exhaust.

Body type	Plug-in type	Non plug-in type		
Part no.	AXT636-1A			

Note) When mounting on the 2 stations integrated manifold block, be sure to mount it only after the gasket has been cut.

Throttle valve spacer

Needle valve set on the manifold block can control cylinder speed by throttling exhaust.

Interface regulator

Interface regulator set on the manifold block can regulate pressure for each valve. (Refer to "Flow Rate Characteristics" on page 941 before operation.)

Body type	Plug-in type	Non plug-in type
P port regulation	ARBF3050-00-P-1	ARBF3050-00-P-2
A port regulation	ARBF3050-00-A-1	ARBF3050-00-A-2
B port regulation	ARBF3050-00-B-1	ARBF3050-00-B-2

SUP stop valve spacer

If SUP stop valve spacer is set, valve can be removed for maintenance without stopping air pressure supply for other valves.

Body type	Plug-in type	Non plug-in type		
Part no.	VVFS3000-37A-1	VVFS3000-37A-2		
(Height will be 27.5 mm higher				

Blanking plate

It is used by attaching on the manifold block for being prepared for removing a valve for maintenance reasons or planning to mount a spare valve, etc.

Body type	Plug-in type	Non plug-in type	
Part no.	VVFS3000-10A		

* Mounting screws: 4 positions

Manifold Option

With exhaust cleaner

- Plug-in type/Non plug-in type • Valve exhaust noise dampening: 35 dB or more
- Collects oil mist: collecting rate 99.9% or more
- Piping process reduced.

For details, refer to page 883.

With control unit

Plug-in type/Non plug-in type

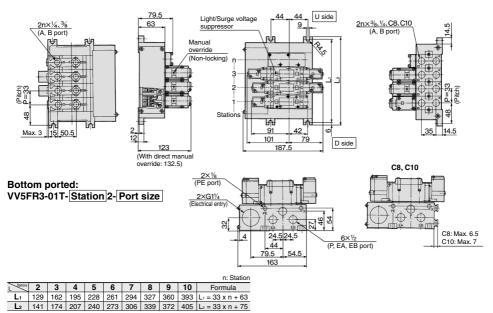

- Filter, regulation valve, pressure switch and air release valve are all combined to form one unit.
- · Piping processes are eliminated.

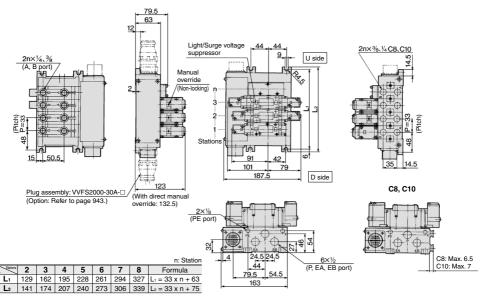

For details, refer to page 886.

Manifold with Control Unit

- · Control unit (Filter, Regulator, Pressure switch. Air release valve) are all standardized to the one unit, and can be mounted on the manifold base without any attachments.
- Piping processes are eliminated.

Non plug-in type

▲ Caution

Air filter with auto-drain or manual drain must be mounted with the air filter at the bottom.

How to Order Manifold Assembly

<Example> Plug-in type with terminal block: 6 stations

VV5FR4-01T-061-03 (-Q) ········· 1 set (Manifold base part no.)
*VFR4100-5FZ (-Q)
*VFR4200-5FZ (-Q) ······ 2 sets (2 position double part no.)
*VVFS4000-10A ······ 1 set (Blanking plate assembly part no.)
The asterisk denotes the symbol for assembly. Prefix it to the part nos. of the solenoid valve, etc.

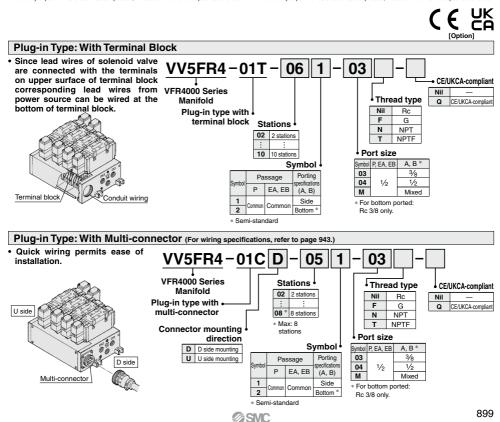

Valve arrangement is counted from the D side

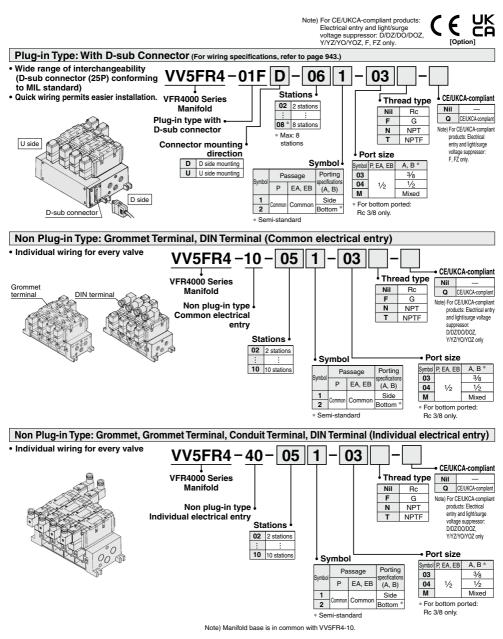

When ordering, specify the part nos. in order from the 1st. station in the D side. When entry of part numbers becomes complicated, indicate on the manifold specification sheet <Example> Non plug-in type: 6 stations

VV5FR4-10-061-03 (-Q) ········· 1 set (Manifold base part no.)
*VFR4110-5D (-Q) 5 sets (2 position single part no.)
*VFR4410-5D (-Q) ······ 1 set (3 position exhaust center part no.)
*VVFS4000-R-04-2 ······ 1 set (Individual EXH spacer part no.)
The asterisk denotes the symbol for assembly. Prefix it to the part nos. of the solenoid valve, etc.

Valve arrangement is counted from the D side.

When ordering, specify the part nos. in order from the 1st. station in the D side. When entry of part numbers becomes complicated, indicate on the manifold specification she

Note) Manifold base is in common with VFS4000 series but the connection of terminal block for plug-in type is different

5 Port Pilot Operated Solenoid Valve Rubber Seal, Plug-in/Non Plug-in VFR4000 Series

Manifold/Option Parts Assembly

Individual SUP spacer

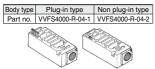

Setting individual SUP spacer on the manifold block enables individual SUP port for each valve.

Body type	Plug-in type	Non plug-in type	
Part no.	VVFS4000-P-03-1	VVFS4000-P-03-2	
		53	

Individual EXH spacer

Setting individual EXH spacer on the manifold block enables individual EXH port for each valve.

SUP block disk

When supplying manifold with more than two different pressures, high and low, insert a block disk in between stations subjected to plug-in different pressures.

Body type	Plug-in type	Non plug-in type
Part no.	AXT63	34-10A

EXH block disk

When valve exhaust affects the other stations on the circuit, insert EXH block disk in between stations to separate valve exhaust.

Body type	Plug-in type	Non plug-in type
Part no.	AXTE	34-11A

EXH block disk

SUP block disk

Throttle valve spacer

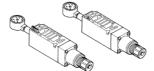

Needle valve set on the manifold block can control cylinder speed by throttling exhaust.

Interface regulator

Interface regulator set on the manifold block can regulate pressure for each valve. (Refer to "Flow Rate Characteristics" on page 941 before operation.)

Body type	Plug-in type	Non plug-in type
P port regulation	ARBF4050-00-P-1	ARBF4050-00-P-2
A port regulation	ARBF4050-00-A-1	ARBF4050-00-A-2
B port regulation	ARBF4050-00-B-1	ARBF4050-00-B-2

Blanking plate

It is used by attaching on the manifold block for being prepared for removing a valve for maintenance reasons or planning to mount a spare valve, etc.

Body type	Plug-in type	Non plug-in type
Part no.	VVFS40	000-10A

Manifold Option

With exhaust cleaner

- Valve exhaust noise dampening: 35 dB or more.
- Collects oil mist: collecting rate 99.9% or more
- Piping process reduced.

For details, refer to page 906.

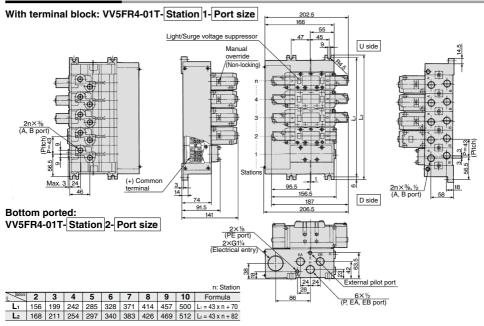

With control unit

- Plug-in type/Non plug-in type
- Filter, regulation valve, pressure switch and air release valve are all combined to form one unit.
- · Piping processes are eliminated.

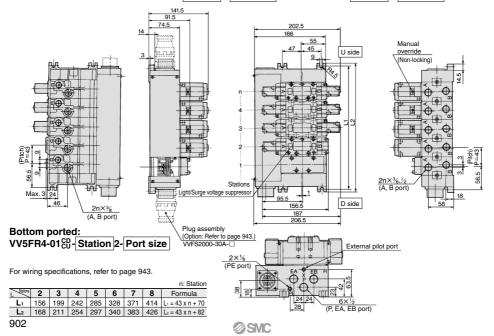

For details, refer to page 909.

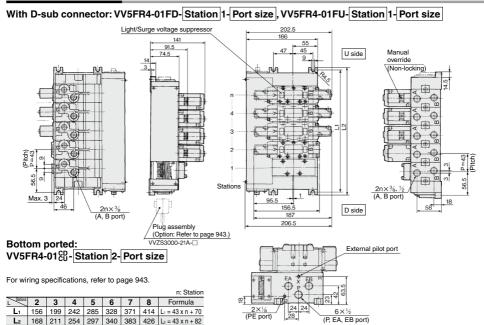

Manifold/Plug-in Type

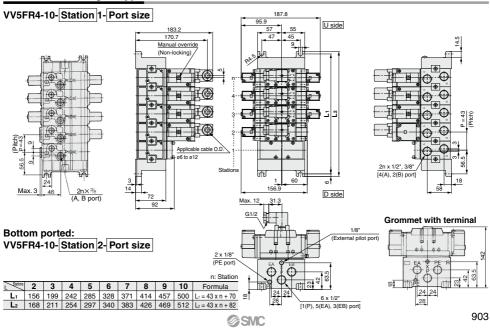

With multi-connector: VV5FR4-01CD-Station 1-Port size, VV5FR4-01CU-Station 1-Port size

How to Order Manifold Assembly

Exhaust cleaner

(Option)

<example></example>	Dlug in	time	ith tormino	block	(6 stations)	
<example></example>	riug-iii	type w	iui termina	DIOCK	(o stations)	

VV5FR4-01T-061-03-CD (-Q) ··· 1 set (Manifold base part no.)
*VFR4100-5FZ (-Q) ······· 3 sets (2 position single part no.)
*VFR4200-5FZ (-Q) ······ 2 sets (2 position double part no.)
*VVFS4000-10A 1 set (Blanking plate assembly part no.)
AMC610-10 ······ 1 set (Exhaust cleaner part no.)

The asterisk denotes the symbol for assembly. Prefix it to the part nos. of the solenoid valve, etc.

When ordering, specify the part nos. in order from the 1st. station in the D side

When entry of part numbers becomes complicated, indicate on the manifold specification sheet.

When using an exhaust cleaner, mount it downwards.

<Example> Non plug-in type: 6 stations

VV5FR4-10-061-03-CU (-Q) ······ 1 set (Manifold base part no.)
*VFR4110-5E (-Q)
*VFR4210-5E (-Q) ······ 2 sets (2 position double part no.)
*VVFS4000-10A ······· 1 set (Blanking plate assembly part no.)
*AMC810-14 ······ 1 set (Exhaust cleaner part no.)
The asterisk denotes the symbol for assembly. Prefix it to the part nos. of the solenoid valve, etc.

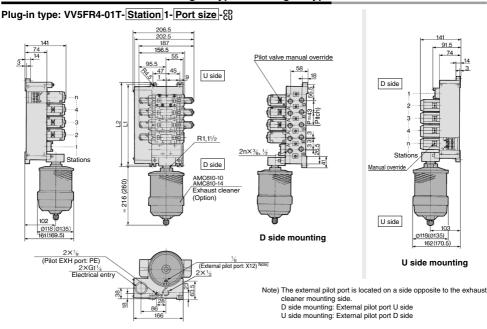

Valve arrangement is counted from the D side.

When ordering, specify the part nos. in order from the 1st. station in the D side. When entry of part numbers becomes complicated, indicate on the manifold specification sheet.

Refer to the Web Catalog for Exhaust Cleaner details.

Manifold with Control Unit

- Control unit (Filter, Regulator, Pressure switch, Air release valve) are all standardized to the one unit, and can be mounted on the manifold base without any attachments.
- Piping processes are eliminated.

▲ Caution

Air filter with auto-drain or manual drain must be mounted with the air filter at the bottom.

How to Order Manifold Assembly

Instruct by specifying the valves, blanking plate and manifold option parts assembly to be mounted on the manifold along with the manifold base model no.

<Example> Plug-in type with terminal block: 6 stations

VV5FR5-10T-061-04 (-Q) ········· 1 set (Manifold part number)
*VFR5100-5FZ (-Q) 3 sets (2 position single)
*VFR5200-5FZ (-Q) 2 sets (2 position double)
*VVFS5000-10A ···································1 set (Blanking plate assembly part no.)
The asterisk denotes the symbol for assembly. Prefix it to the part nos. of the solenoid valve, etc.

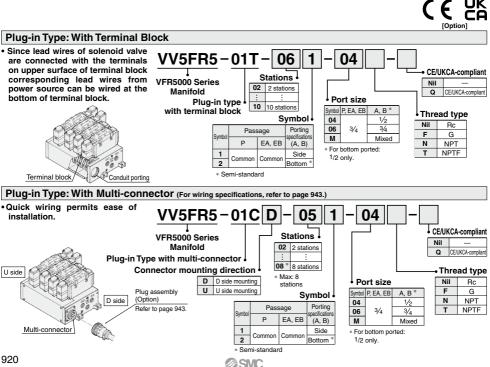

Valve arrangement is counted from the D side

When ordering, specify the part nos. in order from the 1st. station in the D side When entry of part numbers becomes complicated, indicate on the manifold specification sheet <Example> Non plug-in type: 6 stations

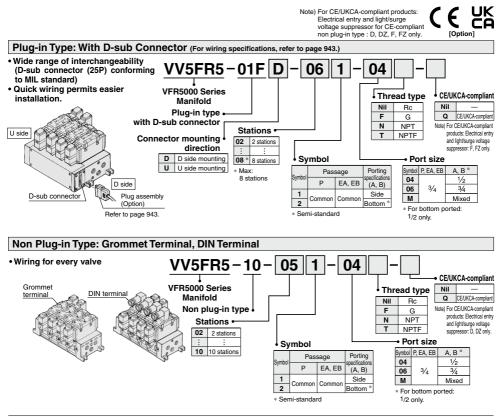

VV5FR5-10-061-04 (-Q) 1 set (Manifold part number)
*VFR5110-5D (-Q) 5 sets (2 position single)
*VFR5410-5D (-Q) 1 set (3 position exhaust center)
∗VVFS5000-R-04-2 ······· 1 set (Individual EXH spacer)
The asterisk denotes the symbol for assembly. Prefix it to the part nos. of the solenoid valve, etc.

Valve arrangement is counted from the D side.

When ordering, specify the part nos. in order from the 1st. station in the D side. When entry of part numbers becomes complicated, indicate on the manifold specification sheet

Manifold Specifications **VFR5000** Series

Note) Manifold base is common for the VFS5000 series. Terminal block is not required.

VFR5000 Series

Manifold/Option Parts Assembly

Individual SUP spacer

Supply port can be located at each valve individually after individual SUP spacer is mounted on manifold block.

Individual EXH spacer

Exhaust port can be located at each valve individually after individual EXH spacer is mounted on manifold block. (Common EXH type)

Body type	Plug-in type	Non plug-in type
Part no.	VVFS5000-R-04-1	VVFS5000-R-04-2

SUP block disk

When 2 or more pressures (high and low) are supplied to one manifold, insert a disk between the stations which are supplied different pressures.

Body type	Plug-in type	Non plug-in type
Part no.	AXT628-12A	

EXH block disk

Use exhaust blocks to eliminate back flow to other stations. Use supply disks to operate two pressures on the same manifold.

EXH block disk

Throttle valve spacer

Mount interface speed control on manifold block. Cylinder speed can be controlled by metered out flow.

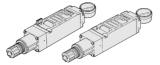

Interface regulator

When interface regulator is mounted on manifold block, regulation to that valve is possible.

(Refer to "Flow Rate Characteristics" on page 941 before operation.)

Body type	Plug-in type	Non plug-in type
P port regulation	ARBF5050-00-P-1	ARBF5050-00-P-2
A port regulation	ARBF5050-00-A-1	ARBF5050-00-A-2
B port regulation	ARBF5050-00-B-1	ARBF5050-00-B-2

Blanking plate

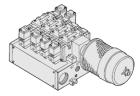

It is used by attaching on the manifold block for being prepared for removing a valve for maintenance reasons or planning to mount a spare valve, etc.

Body type	Plug-in type	Non plug-in type
Part no.	VVFS5000-10A	

Manifold Option

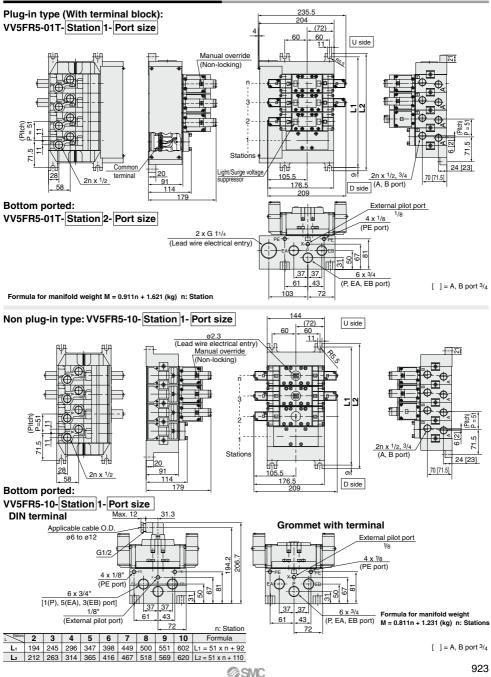

With exhaust cleaner Plug-in type/Non plug-in type

- •High noise reduction effect: 35 dB or more
- Drainage and mist are collected (99.9% or more).
- · Piping work is reduced.

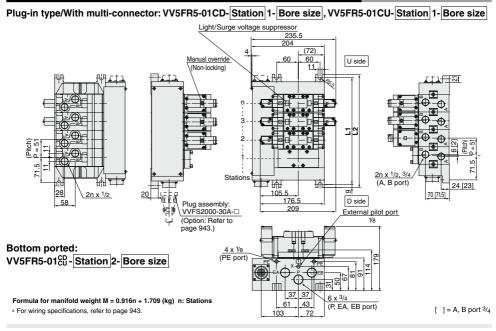

For details, refer to page 925.

▲ Caution

Plug-in type (With terminal block) VFR2000/3000/4000 Series

· If you remove the junction cover ① on the sub-plate, you will see the plug-in terminal block 2 attached to the inside of sub-plate.

· The following markings are on the terminal block Connect with corresponding power side

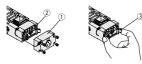

B side solenoid Common (COM) terminal A side solenoid

- · Although "A-", "B+" and "B-" marks are indicated on the terminal block, this can be used as either "+COM" or "-COM"
- Applicable terminal VFR2000, VFR3000: 1.25-3, 1.25-3S 1.25Y-3N, 1.25Y-3S VFR4000: 1.25-3.5M, 1.25Y-3L, 1.25Y-3M

VFR5000 Series

· Remove junction cover for sub-plate ①, depress levers (3) of terminal block assembly (2), pull out terminal block assembly.

· Terminal block assembly is marked as below Connect it to power supply side.

Terminal block Model marking	A– (1)	B+ (3)	B- (4)
VFR510□	A side	СОМ	
VFR520□	A side	СОМ	B side
VFR540□ 5	A side	СОМ	B side

Lead Wire Connection

- · Terminal block assembly can be used as "+" and -" common regardless of markings. Do not remove jumper bar because it is used for common connection.
- · Applicable terminal: 1.25-4, 1.25-4M

VFR6000 Series

· If you remove the junction cover ① on the sub-plate, you will see the plug-in terminal block 2 attached to the inside of sub-plate.

· Terminal block assembly is wired like the following figure. Connect it to each power supply side.

Position	Left	Center	Right
VFR610	A side	СОМ	
VFR620□	A side	сом	B side
VFR640□	A side	сом	B side

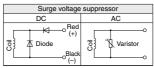

Can be used as either "+COM" or "-COM"

Applicable terminal:

1 25-4 1 25-4M

Non plug-in type VFR2000 Series VFR3000/4000 Series (VFR3 40/4 40)

. Type G: Lead wire comes directly from the solenoid part. Connect it with the power source. Grommet with DC voltage surge voltage suppressor has polarity. Connect red lead wire to + (positive) side and black to - (negative) side.

. Type E, T, D, Y: In the case of DIN terminal block and terminal block, there is no polarity of positive [+] and negative [-]. Connect no. 1 and no. 2 terminals with corresponding power side.

ÌSMC

- Applicable cable O.D. Type T: ø6 to ø8 mm
 - Type E: ø2.3 to ø2.8 mm
 - Type D (VFR2000 series): ø6 to ø8 mm
 - Type D (VFR3000/4000 series): ø4.5 to ø7 mm
 - Type Y: ø4.5 to ø7 mm
- Applicable crimp terminal
- Type E, T: 1.25-3, 1.25-3S, 1.25Y-3N, 1.25Y-3S (Round shape or Y shape crimp terminal cannot be used for Type D.)

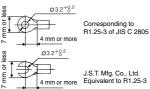

VFR3000/4000/5000/6000 Series (VFR3 10/4 10)

DIN terminal block type

· Male pin terminal of DIN terminal block of solenoid valves are wired as shown below. Connect to corresponding terminal on the connector

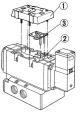

- · Can be used as either "+COM" or "-COM". · Applicable cable
- Cross section of the wire: 0.5 to 1.5 mm² Cable O.D.: ø8 to ø10
- · Applicable crimp terminal shown below.

- · Proper tightening torque of the connector Connector set screw 0.5 to 0.6 N-m Terminal screw 0.5 to 0.6 N-m
- Incorrect connection of "COM terminal" (DIN terminal no. 3) can cause damage on power source circuit.

Terminal block type

· Remove cover ①, over terminal block (2) attached to the inside of body. Connect with corresponding power side. For a type with light and surge voltage suppressor, straightly pull out the light and surge voltage suppressor substrate (3) and then connect them

- Applicable terminal:
 - VFR3000: 1.25-3, 1.25-3S, 1.25Y-3N, 1.25Y-3S VFR4000: 1.25-3.5M, 1.25Y-3L, 1.25Y-3M VFR5000/6000: 1.25-3.5M, 1.25-3L, 1.25-3M

Be sure to read this before handling the products. For safety instructions and 3/4/5-port solenoid valve precautions, refer to the "Handling Precautions for SMC Products" and the "Operation Manual" on the SMC website: https://www.smcworld.com

Light/Surge Voltage Suppressor

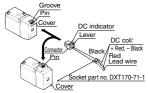

Refer to table 1 for "VFR2000 Series Plug-in type", "VFR3□10, VFR4□10 type of VFR3000/4000 Series" and

"VFR5000/6000", and table 2 for "VFR2000 Series Non plug-in type" and "VFR3040, VFR4040 type of

A Caution

Attaching and Detaching Connectors

- 1. To attach a connector, hold the lever and connector unit between your fingers and insert straight onto the pins of the solenoid valve so that the lever's pawl is pushed into the groove and locks.
- 2. To detach a connector, remove the pawl from the groove by pushing the lever downward with your thumb, and pull the connector straight out.

Attaching and Detaching Lead Wires with Sockets

Peel 3.2 to 3.7 mm of the tip of lead wire, enter the core wires neatly into a socket and crimp it with a special crimp tool. Be careful so that the cover of lead wire does not enter into the crimping part.

Attaching and Detaching Lead Wires with Sockets

1. Attaching

Insert the sockets into the square holes of the connector (with + and - indication) and, continue to push the sockets all the way in until the lock by hooking into the seats in the connector. (When they are pushed in, their hooks open and they are locked automatically.) Then confirm that they are locked by pulling lightly on the lead wires.

2. Detaching

To detach a socket from a connector, pull out the lead wire while pressing the socket's hook with a stick having a thin tip (approx, 1 mm). If the socket will be used again, first spread the hook outward Connecto

Plug Connector Lead Wire Length

Standard length is 300 mm, but the following lengths are also available

How to Order Connector Assembly ~~

	A-
Lead wire color	Lead wire length

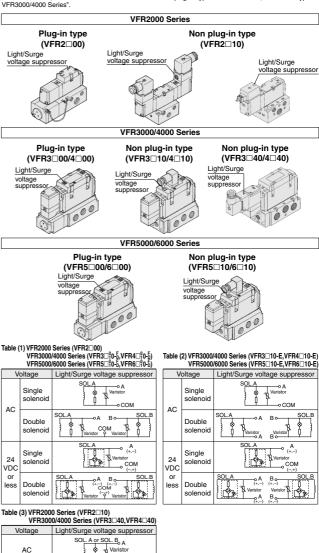

Symbol	Lead wire with socket	Note		Lead wire
Nil	Sockets (2 pcs.) only	Without lead wire	Symbol	length

AC	SOL. A or SOL. B _o A Varistor COM
24 VDC or less	SOL. A or SOL. B A

Light/Surge voltage suppressor is not available for grommet type. For grommet type with surge voltage suppressor,

refer to page 938.

939 A

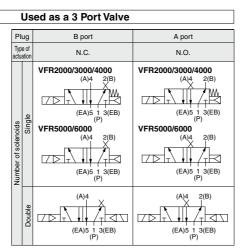

Be sure to read this before handling the products. For safety instructions and 3/4/5-port solenoid valve precautions, refer to the "Handling Precautions for SMC Products" and the "Operation Manual" on the SMC website: https://www.smcworld.com

▲ Caution

Plugging one of the cylinder ports (A or B) enables use as a normally closed (N.C.) or normally open (N.O.) 3 port valve.

It is convenient when 3 port valve is needed on a manifold, etc., but it can't be used in special applications such as using as a non-leakage valve. Use it with the exhaust port leaving open.

Change Direction of DIN Connector/Cable Entry

 Unscrew retaining screw, pull off outer cover, rotate connector block through 180°. Replace cover and tighten screw.

How to Calculate the Flow Rate

For obtaining the flow rate, refer to the **Web Catalog**.

How to Exchange Solenoid Valves, Pilot Valve Assemblies

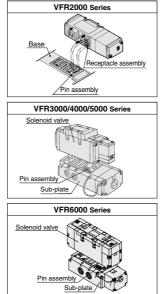

How to exchange solenoid valves

- Loosen set screw and take solenoid valve out vertically, otherwise it may cause damage to the solenoid valve. Never remove valve at an angle.
- When mounting solenoid valve on to the base, plug pin assembly (base-side) into receptacle assembly (body-side) vertically.

Tightening Torque for Mounting Bolt

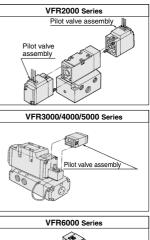

Model	Thread	Tightening torque					
Pilot valve assembly	M3 (2 pcs.)	0.6 N·m					
VFR2000	R2000 M3 (3 pcs.) 0.9 N·m						
VFR3000	M3 (3 pcs.)	1.1 N·m					
VFR4000	M4 (4 pcs.)	1.4 N·m					
VFR5000	VFR5000 M5 (4 pcs.) 2.8 N·m						
VFR6000 M8 (4 pcs.) 16 N·m							
Note) For more information about the procedure, refer to the							

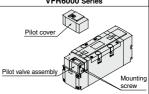

ote) For more information about the procedure, refer t Operation Manual.

How to exchange pilot valve assemblies • Possible to exchange pilot valve assemblies like the following figures.

Be sure to read this before handling the products. For safety instructions and 3/4/5-port solenoid valve precautions, refer to the "Handling Precautions for SMC Products" and the "Operation Manual" on the SMC website: https://www.smcworld.com

Interface Regulator

▲ Caution

Specifications

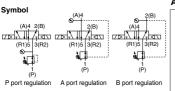

Interface regulator	ARBF2000	ARBF3050		ARBF4050		ARBF5050		050		
Applicable solenoid valve series	VFR2000	VF	R30	00	V	=R40	000	VFR5000		00
Regulating port	Р	A	В	Р	Α	В	Р	Α	В	Р
Maximum operating pressure	1.0 MPa (1)									
Set pressure range	0.05 to 0.83 MPa			0	.1 to ().83 I	MPa	2)		
Ambient and fluid temperature		-5 to 60°C (No freezing) (3)								
Port size for connection of pressure gauge	M5 x 0.8					Rc 1/8	3			
Weight (kg)	0.16 0.46 0.72				0.83					
Effective area at supply side (mm ²) P → A	5.5	21	18.5	11	35	31	26	44	38	32
S at P1 = 0.7 MPa/P2 = 0.5 MPa $P \rightarrow B$	5.1	18.5	22	12	31	31	24	38	40	31
Effective area at exhaust side (mm ²) $A \rightarrow EA$	A 12		40			55			90	
S at $P_2 = 0.5 \text{ MPa}$ B \rightarrow E	3 11		36			45			77	

- Note 1) Maximum operating pressure of solenoid valve is 0.9 MPa.
- Note 2) Set the pressure within operating pressure range of solenoid valve.
- Note 3) Solenoid valve: Max. 50°C

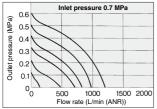

Note 4) Synthesized effective area with 2 position.

- Note 5) Operate an interface regulator only by applying pressure from the "P" port of the base, except when using it as a reverse pressure valve
 - To combine a pressure center valve and the A and B port pressure reduction interface regulator, use the ARBF3000, ARBF4000, or the ARBF5000 model.
 - To combine a reverse pressure valve and an interface regulator, use the ARBF3000, ARBF4000, or the ARBF5000 model. The P port pressure reduction cannot be used.
 - When combining a double check valve and an interface regulator, use a manifold or sub-plate as a basis, and stack them in the following order; the perfect spacer → the interface regulator → the valve.
 - When a closed center valve is combined with the interface regulator's A, B port regulation, note that it cannot be used for intermediate stops of a cylinder because there is leakage from relief port on the regulator.

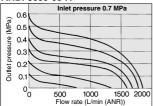

Flow Rate Characteristics (P \rightarrow A) (Condition: Inlet pressure 0.7 MPa when 2 position solenoid valve is mounted.)

Lead Wire Connection

A Caution

Type 01T with Terminal Block

VFR2000 Series

 Remove junction cover of manifold, exposing terminal block attached to the manifold block. Lead wires from solenoid valve are connected with the terminals on upper side of terminal block. (On the terminal block, lead wire is connected with both A and B sides of solenoid valve in accordance with the corresponding markings A and B on the block.)

Connect each lead wire of power side corresponding to respective solenoid valve on the lower terminal block.

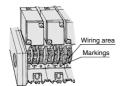

Terminal block wiring specifications is in accordance with COM.

Terminal block marking Model	A –	B +	В –

Applicable terminal:

- 1.25-3.5M, 1.25Y-3L, 1.25-3M
- Although "A-", "B+" and "B-" marks are indicated on the terminal block, VFR4000 can be used as either "+COM" or "-COM".

VFR5000 Series					
Terminal block Model A – B + B –					
VFR5100	A side	СОМ			
VFR5200	A side	СОМ	B side		
VFR5 ³ ₅ 00	A side	СОМ	B side		

Applicable terminal:

"+COM" or "-COM".

1.25-3.5M, 1.25Y-3L, 1.25-3M
Although "A-", "B+" and "B-" marks are indicated on the terminal block, VFR5000 can be used as either

Be sure to read this before handling the products. For safety instructions and 3/4/5-port solenoid valve precautions, refer to the "Handling Precautions for SMC Products" and the "Operation Manual" on the SMC website: https://www.smcworld.com

▲ Caution

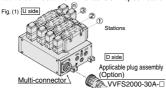

Lead Wire Connection

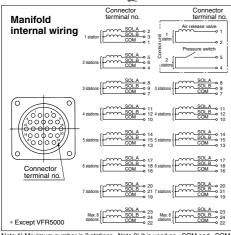

Manifold/Plug-in Type

Type 01C Circular Connector

VFR2000/3000/4000/5000 Series

- When multi-connector is used, mass-termination between power supply side and solenoid valve can be done. This saves the wiring connection labor.
- Wire connection specifications Lead wire for both solenoid A and B sides in manifold are connected to connector terminal as COM specifications.

Note 1) Maximum number is 8 stations. Note 2) It is used as +COM and -COM. Note 3) Station numbers are started from D side although connector is mounted on D or U Side.

Applicable Plug Assembly (Option)

Assembly part no.	Cable length	Component parts
VVFS2000-30A-1	1.5 m	
VVFS2000-30A-2	3 m	Plug 206837-1 1 pc.
VVFS2000-30A-3	5 m	Cable clamp 206138-1 1 pc.
VVFS2000-30A-4 *	7 m	Socket 66101-2 24 pcs.
VVFS2000-30A-5 *	10 m	Cable VCTF 24 cores x 0.75 mm ²
VVFS2000-30A-6 *	15 m	made by Tyco Electronics AMP K.K.
VVFS2000-30A-7 *	20 m	

* Option

Type 01F D-sub Connector

VFR2000/3000/4000/5000 Series

- MIL standard type D connector (Terminal: 25 pins) has wide exchangeability and saves wiring labor.
- Wire connection specifications
 Lead wire for both solenoid A and B sides in manifold are connected to connector terminal as COM specifications.

Note 1) Maximum number is 8 stations. Note 2) It is used as +COM and -COM. Note 3) Station numbers are started from D side although connector is mounted on D or U Side.
