(Update)

Notification Regarding Mitigation Measures for the COVID-19

We would like to inform you of SMC Group's current mitigation measures taken to cope with the Coronavirus Disease of 2019 (COVID-19) as described below.

1) Production and Shipment Situation

- SMC's major factories (Japan and China) have been maintaining full scale production since February, 2020.
- Each factory (Singapore, US, India and Vietnam) are also in full scale production, under the guidance of local government.
- Each factory has been implementing measures to prevent the spread of this disease. As a result, very few employees have been confirmed to be infected by COVID-19.
- Even though there have been flight restrictions, vessel container shortages and transit delays, we have been taking countermeasures to steady our supply chain.
- SMC has sufficient stock of parts and products to supply our customers without interruption.

2) Sales Situation

- All of SMC's major sales branches are operating as normal.
- Some sales branches located in South America and Europe have had interruptions with lock downs. However, there have been no major issues for SMC's sales activities.
- Those customers that cannot accept visits by SMC salespersons are being taken care of via email and telephone calls.

Respectfully,
