## 2-Color Display Digital Pressure Switch ZSE80(F)/ISE80(H) Series

## Stainless diaphragm

Oil-free (Single-layer diaphragm structure)
Sensor unit: Stainless steel 630
Fitting parts: Stainless steel $304 \mathbb{P} 65$ compliant
The sensor unit and fitting parts are also applicable to stainless steel 316L.

## 2-color display

## See abnormal values at a glance. <br> 

3-step setting

Choice of 2 piping directions

Bottom ported

Rated pressure range
0.0 to -101.0 kPa and -0.100 to 2.00 MPa available as standard

- Leakage
$1 \times 10^{-10} \mathrm{~Pa} \cdot \mathrm{~m}^{3} / \mathrm{s}$
<Face seal and compression fitting> $1 \times 10^{5} \mathrm{~Pa} \cdot \mathrm{~m}^{3} / \mathrm{s}$
<Threaded type (R, Rc, NPT, G)>

## Applicable Fluid Examples

\author{

- Water <br> - Hydraulic fluid (JIS-K2213) <br> - Silicon oil (JIS-K2213) <br> - Lubricant (JIS-K6301) <br> - Fluorocarbon
}
- Welded structure for sensor units and fitting parts
- Select from a face seal or compression fitting.

## - Argon <br> - Carbon dioxide <br> - Air-containing drainage <br> - Nitrogen

## Applications

Restrictor installed fitting type (-X510) Made to Order
A pressure switch that has a restrictor installed in the fitting is available to prevent the sensor from being damaged by water hammer or inertia of the fluid.

2-color display (LCD)
Can select from 4 indicator patterns of color combinations.

|  | ON | OFF |
| :---: | :---: | :---: |
| $\mathbf{1}$ | Red | Green |
| $\mathbf{2}$ | Green | Red |
| $\mathbf{3}$ | Red | Red |
| $\mathbf{4}$ | Green | Green |

## Output display

It lights when OUT1 or OUT2 outputs.

## Convex rubber button

Convex button is adopted and provides IP65 rating. Improved maneuverability and operability.

ZSE2O
ISE2O
ZSE30
ISE30
ZSE40
ISE40
ZSE10 ISE10

This ensures that only authorized persons can operate the switch when the key is locked.

Input an arbitrary 3 -digit value.

* The set-value can be confirmed even when the key is locked.

## Power-saving mode

Turning off the display can save power consumption.
(Power consumption: reduced by up to $18 \%$ )

The numerical value disappears and the decimal points blink.

Resolution switching function
It prevents minor variation of the indicated value.

MPa/kPa switching function
The indication unit for vacuum, compound pressure and positive pressure can be integrated into either MPa or kPa .

Panel mount

Suitable for side-by-side mounting

- Space-saving
- Reduced panel fitting labor

Bracket mount

## ZSE80/ISE80 Series

## Set Pressure Range and Rated Pressure Range

Set the pressure within the rated pressure range.
The set pressure range is the range of pressure that is possible in setting.
The rated pressure range is the range of pressure that satisfies the specifications (accuracy, linearity, etc.) on the switch.
Although it is possible to set a value outside the rated pressure range, the specifications will not be guaranteed even if the value stays within the set pressure range.

$\square$ Rated pressure range of switch
Set pressure range of switch

## Analog Output

Current output

Note) Analog output is $0.8[\mathrm{~V}]$ or $3.2[\mathrm{~mA}]$ at the pressure A.

## Internal Circuits and Wiring Examples

```
-P
PNP (1 output)
```

-B
PNP (2 outputs)

-T/-V
PNP (2 outputs) + Auto-shift input

## ZSE80/ISE80 Series

Dimensions (For details about lead wires, refer to the product specifications.)

When the pressure switch is used in a place where water and dust splashes may occur, insert a tube into the atmospheric vent port, and route the other end of the tube to a safe place away from water and dust.

* SMC TU0425 (polyurethane, O.D. ø4, I.D. ø2.5) suits to the pressure switch.

Note) If it is predicted that the pressure, such as the water hammer or surge pressure fluctuates rapidly, refer to the Handling Precautions stated in the Operation Manual at SMC website (http://www.smcworld.com).

Dimensions (For details about lead wires, refer to the product specifications.)

## Function Details

## A Auto-shift function (F4)

When there are large fluctuations in the supply pressure, the switch may fail to operate correctly. The auto-shift function compensates such supply pressure fluctuations. It measures the pressure at the time of auto-shift signal input and uses it as the reference pressure to correct the set-value on the switch.

Set-value correction by auto-shift function

* Rectified value

When the auto-shift is selected, "000" will be displayed for approximately 1 second, and the pressure value at that point will be saved as a rectified value "C_5". Based on the saved rectified values, the setvalue Note) of "P_1", "H_1", "P_2", and "H_2" will likewise be rectified.

Note) When an output is reversed, " $n \_1$ ", "H_1", " $n \_2$ ", "H_2" will be rectified.
Settable Range for Auto-Shift Input

|  | Set pressure range | Settable range |
| :--- | :---: | :---: |
| Compound pressure | -110.0 to 110.0 kPa | -220 to 220 kPa |
| Vacuum pressure | 10.0 to -111.0 kPa | 121.0 to -121.0 kPa |
| Positive pressure | -0.105 to 1.100 MPa | -1.205 to 1.205 MPa |
|  | -0.105 to 2.20 MPa | -2.31 to 2.31 MPa |

## Auto-shift zero

The basic function of auto-shift zero is the same as the function for auto-shift. Also, it corrects values on the display, based on a pressure value of 0 , when the auto-shift is selected.

Output specifications: -R/-S NPN (2 outputs) + Auto-shift input

Output specifications: -T/-V PNP (2 outputs) + Auto-shift input

## Auto-preset function (F8)

Auto-preset function, when selected in the initial setting, calculates and stores the set-value from the measured pressure.
The optimum set-value is determined automatically by repeating vacuum and break with the target workpiece several times.

## Suction Verification

Formula for Obtaining the Set-Value

| P_1 or P_2 | H_1 or H_2 |
| :---: | :---: |
| P_1 $\left(P \_2\right)=A ~-~(A-B) / 4 ~$ <br> $n \_1\left(n \_2\right)=B+(A-B) / 4$ | $H \_1\left(H \_2\right)=\|(A-B) / 2\|$ |

Note) When the display calibration function is used, the set pressure value may change $\pm 1$ digit.

## D Peak/Bottom value indication

This function constantly detects and updates the maximum (minimum) value and allows to hold the maximum (minimum) pressure value.
When the (©) () buttons are simultaneously pressed for 1 second or longer, while "holding", the hold value will be reset.

## E Keylock function

Prevents operation errors such as accidentally changing setting values.

## F Zero-clear function

This function clears and resets the zero value on the display of measured pressure.
For the pressure switch with analog output, the analog output shifts according to the indication. The indicated value can be adjusted within $\pm 10 \%$ F.S. of the pressure when ex-factory.

## ZSE80/ISE80 Series

## Function Details

The F $\square$ in () shows the function code number. Refer to the Operation Manual for the details of operation procedures and function codes. Click here for details.

## G Error indication function

| Error <br> $n a m e ~$ | Error code |  |
| :--- | :--- | :--- |
| Description |  |  |

## H Anti-chattering function (F3)

A large bore cylinder or ejector consumes a large volume of air in operation and may experience a temporary drop in the supply pressure. This function prevents detection of such temporary drops in the supply pressure as an error.

| Available response time settings |
| :---: |
| $20 \mathrm{~ms}, 100 \mathrm{~ms}, 500 \mathrm{~ms}, 1000 \mathrm{~ms}, 2000 \mathrm{~ms}$ |

<Principle>
This function averages pressure values measured during the response time set by the user and then compares the average pressure value with the pressure set point value to output the result on the switch.

## I Display unit switching function (F0)

Display units can be switched with this function.

| Pressure range |  | For compound pressure | For vacuum pressure | For positive pressure |  |
| :---: | :---: | :---: | :---: | :---: | :---: |
| Model |  | ZSE80F | ZSE80 | ISE80 | ISE80H* |
| 口П | kPa | 0.1 | 0.1 | 1 | - |
|  | MPa | 0.001 | 0.001 | 0.001 | 0.001 |
| LiF | kgf/cm ${ }^{2}$ | 0.001 | 0.001 | 0.01 | 0.01 |
| b月r | bar | 0.001 | 0.001 | 0.01 | 0.01 |
| ¢5 1 | psi | 0.02 | 0.02 | 0.1 | 1 |
| 1 OH | inHg | 0.1 | 0.1 | - | - |
| กัท | mmHg | 1 | 1 | - | - |

* ISE80H: Does not indicate the last digit when the pressure is 2.000 MPa or higher.

## Power-saving mode (F9)

Power-saving mode can be selected.
It shifts to the power-saving mode without button operation for 30 seconds. It is set to the normal mode (Power-saving mode is OFF.) when ex-factory. (Decimal points and operation indicator light (only when the switch output is turned ON.) blink in the power-saving mode.)

K Setting of secret code (F10)

* The set-value can be confirmed when the key is locked.

Users can select whether a secret code must be entered to release key lock. At the time of shipment from the factory, it is set such that the secret code is not required.

# ZSE80/ISE80 Series <br> Made to Order 1 

Please contact SMC for detailed dimensions, specifications and lead times.

## 1 Wetted Parts: Stainless Steel 316L

This pressure switch has better corrosion resistance that uses stainless steel 316L for the wetted parts (pressure sensor and fitting).

Models other than above are the same specifications as standard.

## 3 Restrictor Installed Fitting

A restrictor is installed inside the fitting in order to improve endurance of water collision with inertia force in the piping when adsorption is broken.

Made to Order "-X510"

Note 1) Not applicable for piping specifications A2(L) and B2(L).
Note 2) Sometimes does not work for suppression of water hammer effect even if this product is used. Take other measures in such a case.

## 2 Lead Wire Length 3 m

It has a lead wire extended to 3 meters.

* Refer to "How to Order" on page 92 for standard specifications.

Output specifications
A: NPN open collector 2 outputs
B: PNP open collector 2 outputs

## ZSE80/ISE80 Series

Please contact SMC for detailed dimensions, specifications and lead times.

## 5 Rated Pressure -100 to $\mathbf{3 0 0}$ kPa

It has an extended pressure range of ZSE80F (compound pressure) to -100 to 300 kPa .

How to Order

R: NPN open collector 2 outputs + Analog voltage output/Auto-shift switching
T: PNP open collector 2 outputs + Analog voltage output/Auto-shift switching

Note) The output is applicable to R, T only.
